Why We Lost the ERA Oct 23 2021 In this work, Jane Mansbridge's fresh insights uncover a significant democratic irony - the development of self-defeating, contradictory forces within a democratic movement in the course of its struggle to promote its version of the common good. Mansbridge's book is absolutely essential reading for anyone interested in democratic theory and practice.

Journalism, Society and Politics in the Digital Media Era Oct 11 2020 Advances in digital communication have affected the relationship between society, journalism and politics within different contexts in varied ways and intensities. This volume, combining interdisciplinary academic and professional perspectives, assesses the impact of the digital media environment on citizens, journalists and politicians in diverse sociopolitical landscapes. The first part evaluates the transformative power of media literacy in the digital age and the challenges that journalism pedagogy encounters in global and fragmented environments. The second part critically examines the methods in which social media is used by politicians and activists to communicate during political campaigns and social protests. The third part analyses the impact of digitalization on professional journalism and news consumption strategies. The fourth part offers a range of case studies that illustrate the significant challenges facing online media regarding the framing and representation of communities in crisis and shifting contexts. The book is intended to introduce readers to the crucial dynamic and diverse challenges that affect our societies and communitive practices as a result of the interplay between digital media and political and societal structures.

Historical Dictionary of the Kennedy-Johnson Era Jan 02 2020 This second edition of Historical Dictionary of the Kennedy-Johnson Era covers its history through a chronology, an introductory essay, appendixes, and an extensive bibliography. This book is an excellent access point for students, researchers, and anyone wanting to know more about John F. Kennedy.

The Era of Chinese Multinationals Aug 28 2019 Chinese multinationals have grown in size and increased their global presence dramatically over the last decade. They have emerged as formidable competitors for western incumbents. These firms have instigated profound changes, such as displaced trade and investment flows, new business models, and the emergence of a new geography of global innovation. In a single volume, The Era of Chinese Multinationals captures the forces driving the disruptive growth of Chinese multinational corporations. Following a presentation of the surge of Chinese companies, the book turns to corporate characteristics of those firms and how they compare with western multinationals in terms of revenues, profits, branding, and business strategy. The book uses data and case studies to depict the relevant issues with the goal of providing insights to global executives on collaborating and competing with Chinese companies. Covers the Chinese government's expansionist policies and Chinese firms' new role as a global acquirer of companies Examines common characteristics of Chinese companies and their efforts to make China an innovation hub Illustrates its analysis with case studies and interviews with corporate executives and experts in multilateral institutions

Neurotherapeutics in the Era of Translational Medicine Apr 04 2020 For the first time in history, there is now hope for treating neurological disorders that had previously been considered untreatable. The remarkable confluence of events that has heralded this is the focus of Neurotherapeutics in the Era of Translational Medicine. This anthology, written by many of the prominent scientists and researchers in the field of biotechnology, recounts the breathtaking advances that are revolutionizing treatment for disorders such as amyotrophic lateral sclerosis, spinal muscular atrophy, multiple sclerosis, Parkinson's disease, myasthenia gravis, migraine, and glioblastoma. The "story behind the story" of these translational efforts is told, with authors depicting the ups and downs encountered on the path of their drug discovery and development effort. In parallel with this path, advances in identifying novel biomarkers and disease models are summarized, as are contemporary issues focusing on clinical trial design, bioethics, innovative funding strategies, and collaborations between government and academia in an effort to facilitate breakthrough treatments. The book is written by members of the biotech and pharmaceutical ecosystem for those who belong to it and aspire to become part of it. Comprehensive review on the progress of translational research in neurotherapeutics for neurologic disorders Discusses important issues in clinical trials such as design and ethical issues Written for neuroscientists, neurologists and pharmacologists

Audio-Visual Industries and Diversity Jul 08 2020 This book reflects critically on issues of diversity, access, and the expansion of digital technologies in audio-visual industries, particularly in terms of economics and policies. It brings together specialists in cultural diversity and media industries, presenting an international and interdisciplinary collection of essays that draw from different fields of studies - notably Communication, Economics, Political Science and Law. Among the topics discussed are: the principle of diversity as a goal of cultural and communication policies, the assessment of the UNESCO Convention on Cultural Diversity, free trade agreements and the conception of cultural goods and services they advance, the challenges faced by the production, circulation and consumption of cultural content through the Internet, the role algorithms play in the organization and functioning of

online platforms, Netflix and the hegemony of global media. The approach is a critical understanding of audio-visual diversity, that aims to transcend specific issues like media ownership, ideas portrayed or modes of consumption as such, to focus on a more balanced distribution of communicative power. This volume is an essential read for scholars and researchers in Communication Studies, Economy of Culture, International Relations and International Law, as well as policy makers, journalists specialized in media and culture, and managers of public and private institutions involved in the development of cultural and communication policies. Postgraduate students will find it a key reference point.

Design and Operation of Production Networks for Mass Personalization in the Era of Cloud Technology May 06 2020 Design and Operation of Production Networks for Mass Personalization in the Era of Cloud Technology draws on the latest industry advances to provide everything needed for the effective implementation of this powerful tool. Shorter product lifecycles have increased pressure on manufacturers through the increasing variety and complexity of production, challenging their workforce to remain competitive and profitable. This has led to innovation in production network methodologies, which together with opportunities provided by new digital technologies has fed a rapid evolution of production engineering that has opened new solutions to the challenges of mass personalization and market uncertainty. In addition to the latest developments in cloud technology, reference is made to key enabling technologies, including artificial intelligence, the digital twin, big data analytics, and the internet of things (IoT) to help users integrate the cloud approach with a fully digitalized production system. Presents diverse cases that show how cloud-based technologies can be used in different ways as part of the standard operation of global production networks Provides detailed reviews of new technologies like the digital twin, big data analytics, and blockchain to provide context on the role of cloud technologies in a fully digitalized system Explores future trends for cloud technology and production engineering

Higher Education in the Era of the Fourth Industrial Revolution Dec 25 2021 This open access collection examines how higher education responds to the demands of the automation economy and the fourth industrial revolution. Considering significant trends in how people are learning, coupled with the ways in which different higher education institutions and education stakeholders are implementing adaptations, it looks at new programs and technological advances that are changing how and why we teach and learn. The book addresses trends in liberal arts integration of STEM innovations, the changing role of libraries in the digital age, global trends in youth mobility, and the development of lifelong learning programs. This is coupled with case study assessments of the various ways China, Singapore, South Africa and Costa Rica are preparing their populations for significant shifts in labour market demands – shifts that are already underway. Offering examples of new frameworks in which collaboration between government, industry, and higher education institutions can prevent lagging behind in this fast changing environment, this book is a key read for anyone wanting to understand how the world should respond to the radical technological shifts underway on the frontline of higher education.

Business Transformations in the Era of Digitalization Aug 21 2021 In order to establish and maintain a successful company in the digital age, managers are digitally transforming their organizations to include such tools as disruptive technologies and digital data to improve performance and efficiencies. As these companies continue to adopt digital technologies to improve their businesses and create new revenues and value-producing opportunities, they must also be aware of the challenges digitalization can present. Business Transformations in the Era of Digitalization is a collection of innovative research on the latest trends, business opportunities, and challenges in the digitalization of businesses. Highlighting a range of topics including business-IT alignment, cloud computing, Internet of Things (IoT), business sustainability, small and medium-sized enterprises, and digital entrepreneurship, this book is ideally designed for managers, professionals, consultants, entrepreneurs, and researchers.

Governance in the Information Era Jun 26 2019 Policy informatics is addressing governance challenges and their consequences, which span the seeming inability of governments to solve complex problems and the disaffection of people from their governments. Policy informatics seeks approaches that enable our governance systems to address increasingly complex challenges and to meet the rising expectations of people to be full participants in their communities. This book approaches these challenges by applying a combination of the latest American and European approaches in applying complex systems modeling, crowdsourcing, participatory platforms and citizen science to explore complex governance challenges in domains that include education, environment, and health.

Why We Lost the ERA Jan 26 2022 In this work, Jane Mansbridge's fresh insights uncover a significant democratic irony - the development of self-defeating, contradictory forces within a democratic movement in the course of its struggle to promote its version of the common good. Mansbridge's book is absolutely essential reading for anyone interested in democratic theory and practice.

Security and Safety in the Era of Global Risks Mar 28 2022 The concept of risk in global life has not been fully understood and explored and this book attempts to examine what it entails in the fast changing, interconnected and complex world. As a foundational component of safety systems, risk has been considered relatively simple, predictable, and therefore, assessable and manageable phenomenon. Social and political sciences prefer the terminology of security to capture the dimension of risk which is more complex and more consequential to survival. Risk has become more human-made and intentional today, and this book explores innovative approaches and engages in theoretical and policy debates to capture its political and security dimensions.

China and Eurasia Mar 16 2021 This book facilitates exchanges between scholars and researchers from around the world on China-Eurasia relations. Comparing perspectives and methodologies, it promotes interdisciplinary dialogue on China's pivot towards Eurasia, the Belt and Road initiative, the Shanghai Cooperation Organization, Beijing's cooperation and arguments with India, the EU, Western Balkans and South Caucasus states and the Sino-Russian struggle for multipolarity and multilateralism in Eurasia. It also researches digitalization processes in Eurasia, notably it focuses on China's Silk Road and Digital Agenda of Eurasian Economic Union. Multipolarity without multilateralism is a dangerous mix. Great power competitions will remain. In the Asian regional system more multilateral cushions have to be developed. Scholars from different nations including China, India, Russia, Austria, Armenia, Georgia, United Arab Emirates and Montenegro introduce their own, independent research, making recommendations on the developments in China-Eurasia relations, and demonstrating that through joint discussions it is possible to find ways for cooperation and for ensuring peaceful coexistence. The book will appeal to policymakers and scholars and students in Chinese, Eurasian, International and Oriental Studies.

Defending Human Rights and Democracy in the Era of Globalization May 30 2022 The era of technology in which we reside has ushered in a more globalized and connected world. While many benefits are gained from this connectivity, possible disadvantages to issues of human rights are developed as well. Defending Human Rights and Democracy in the Era of Globalization is a pivotal resource for the latest research on the effects of a globalized society regarding issues relating to social ethics and civil rights. Highlighting relevant concepts on political autonomy, migration, and asylum, this book is ideally designed for academicians, professionals, practitioners, and upper-level students interested in the ongoing concerns of human rights.

Rethinking Corporate Sustainability in the Era of Climate Crisis Nov 11 2020 This book provides a clear, critical, and

timely analysis of the state of corporate sustainability within the context of the climate crisis. It offers not only a substantive critique of the current efforts but also clarity about the changes needed and how to implement them. The book goes beyond the more common debate on shareholder capitalism vs. stakeholder capitalism to explain the shortcomings of the current approach to sustainability in business, which the author describes as sustainability-as-usual. Using strategic design lenses, the author proposes a new model of awakened sustainability, which offers a transformational shift in corporate sustainability to ensure companies fairly and effectively address the climate crisis. The book presents the numerous changes needed in the environment in which companies operate to enable awakened sustainability and how these changes can be realized. Grounded in the scientific community's calls for urgent action on climate change, this groundbreaking text provides scholars with an evaluation of current and future trends in corporate sustainability. It connects the dots between the progress made in the last five decades and the opportunities entailed in the work on a regenerative and just vision for companies in this decade and beyond.

Media Accountability in the Era of Post-Truth Politics Oct 30 2019 Bringing together both leading international scholars and emerging academic talent, *Media Accountability in the Era of Post-Truth Politics* maps the current state of media accountability in Europe and provides fresh perspectives for future developments in media and communication fields. As the integrity of the international media landscape is challenged by far-reaching transformations and the rise of "fake news," the need for a functional system of media regulation is greater than ever. This book addresses the pressing need to re-evaluate and redefine the notion of accountability in the fast-changing field of journalism and "information provision." Using comparative research and empirical data, the book's case studies address the notion of media accountability from various perspectives, considering political and societal change, economic, organisational and technological factors, and the changing role of media audiences. By collecting and juxtaposing these studies, the book provides a new discussion for the old question of how we can safeguard free and responsible media in Europe – a question that seems more urgent than ever. *Media Accountability in the Era of Post-Truth Politics* is an essential read for students and researchers in journalism, media and communication studies.

The Arden Research Handbook of Shakespeare and Social Justice Sep 09 2020 The Arden Research Handbook of Shakespeare and Social Justice is a wide-ranging, authoritative guide to research on Shakespeare and issues of social justice and arts activism by an international team of leading scholars, directors, arts activists, and educators. Across four sections it explores the relevance and responsibility of art to the real world? to the significant teaching and learning, performance and practice, theory and economics that not only expand the discussion of literature and theatre, but also open the gates of engagement between the life of the mind and lived experience. The collection draws from noted scholars, writers and practitioners from around the globe to assert the power of art to question, disrupt and re-invigorate both the ties that bind and the barriers that divide us. A series of interviews with theatre practitioners and scholars opens the volume, establishing an initial portfolio of areas for research, exploration, and change. In Section 2 'The Practice of Shakespeare and Social Justice' contributors examine Shakespeare's place and possibilities in intervening on issues of race, class, gender and sexuality. Section 3 'The Performance of Shakespeare and Social Justice' traces Shakespeare and social justice in multiple global contexts; engaging productions grounded in the politics of Mexico, India, South Africa, China and aspects of Asian politics broadly, this section illuminates the burgeoning field of global production while keeping as a priority the political structures that make advocacy and resistance possible. The last section on 'Economies of Shakespeare' describes socio-economic and community issues that come to light in Shakespeare, and their potential to catalyse ongoing discussion and change in respect to wealth, distribution, equity, and humanity. An annotated bibliography provides further guidance to those researching the subject.

WeChat and the Chinese Diaspora Mar 04 2020 "WeChat, launched in 2011, has rapidly become the most favoured Chinese social media. Globally available, equally popular both inside and outside China and widely adopted by Chinese migrants, WeChat has fundamentally changed the ways in which Mandarin-speaking migrants conduct personal messaging, engage in group communication and community business activities, produce and distribute news, and access and share information. This book explores a wide range of issues connected to the ways in which WeChat works and is used, across the world among the newest members of the Chinese diaspora. Arguing that digital/social media afford a great degree of individual agency, as well as a collective capacity for sustaining an 'imagined community', the book shows how WeChat's assemblage of infrastructure and regulatory frameworks, technical capabilities, content and sense of community has led to the construction of a particular kind of diasporic Chinese world, at a time marked both by China's rise, and anxiety about Chinese influence in the West"--

Water Conservation in the Era of Global Climate Change Feb 24 2022 *Water Conservation in the Era of Global Climate Change* reviews key issues surrounding climate change and water resources. The book brings together experts from a variety of fields and perspectives, providing a comprehensive view on how climate change impacts water resources, how water pollution impacts climate change, and how to assess potential hazards and success stories on managing and addressing current issues in the field. Topics also include assessing policy impacts, innovative water reuse strategies, and information on impacts on fisheries and agriculture including food scarcity. This book is an excellent tool for researchers and professionals in Climate Change, Climate Services and Water Resources, and those trying to combat the impacts and issues related to Global and Planetary Change. Covers a wide range of theoretical and practical issues related to how climate change impacts water resources and adaptation, with extended influence on agriculture, food and water security, policymaking, etc. Reviews mathematical tools and simulations models on predicting potential hazards from climate change in such a way they can be useful to readers from a variety of levels of mathematical expertise Examines the potential impacts on agriculture and drinking water quality Includes case studies of successful management of water and pollutants that contribute to climate change

Knowledge Management, Trust and Communication in the Era of Social Media Jul 20 2021 The article entitled "Selected Aspects of Evaluating Knowledge Management Quality in Contemporary Enterprises" broadens the understanding of knowledge management and estimates select aspects of knowledge management quality evaluations in modern enterprises from theoretical and practical perspectives. The seventh article aims to present the results of pilot studies on the four largest Information Communication Technology (ICT) companies' involvement in promoting the Sustainable Development Goals (SDGs) through social media. Studies examine which communication strategy is used by companies in social media. The primary purpose of the eighth article is to present the relationship between trust and knowledge sharing, taking into account the importance of this issue in the efficiency of doing business. The results showed that trust is vital in sharing knowledge and essential in achieving a high-performance efficiency level. The ninth article presents the impact of social media on consumer choices in tourism and tourist products' specificity. The study's main purpose was to indicate the most commonly used social media in selecting a tourist destination and implementing Generation Y's journey. The 10th article aims to identify the most critical purposes of using social media by responding to women's attitudes according to age and their respective countries' economic development. The research was done through an online survey in 2017–2018, followed by an analysis of eight countries' results. The article entitled "Integrated Question-Answering System for Natural Disaster Domains Based on Social Media Messages Posted at the Time of Disaster"

presents the framework of a question-answering system that was developed using a Twitter dataset containing more than 9 million tweets compiled during the Osaka North Earthquake that occurred on 18 June 2018. The authors also study the structure of the questions posed and develop methods for classifying them into particular categories to find answers from the dataset using an ontology, word similarity, keyword frequency, and natural language processing. The book provides a theoretical and practical background related to trust, knowledge management, and communication in the era of social media. The editor believes that the collection of articles can be relevant to professionals, researchers, and students' needs. The authors try to diagnose the situation and show the new challenges and future directions in this area.

Chinese Politics in the Era of Xi Jinping Feb 12 2021 Renowned for his coverage of China's elite politics and leadership transitions, veteran Sinologist Willy Lam has produced the first book-length study in English of the rise of Xi Jinping--General Secretary of the Chinese Communist Party (CCP) since November 2012. With rare insight, Lam describes Xi's personal history and his fascination with quasi-Maoist values, the factional politics through which he ascended, the configuration of power of the Fifth-Generation leadership, and the country's likely future directions under the charismatic "princeling." Despite an undistinguished career as a provincial administrator, Xi has rapidly amassed more power than his predecessors. He has overawed his rivals and shaken up the party-state hierarchy by launching large-scale anti-corruption and rectification campaigns. With a strong power base in the People's Liberation Army and a vision of China as an "awakening lion," Xi has been flexing China's military muscle in sovereignty rows with countries including Japan, Vietnam, and the Philippines while trying to undermine the influence of the United States in the Asia-Pacific region. While Xi is still fine-tuning his art of governance, his zero tolerance for dissent and his preoccupation with upholding the privileges of the "red aristocracy" and the CCP's status as "perennial ruling party" do not bode well for economic, political, or cultural reforms. Lam takes a close look at Xi's ideological and political profile and considers how his conservative outlook might shape what the new strongman calls "the Great Renaissance of the Chinese race."

Data Analytics in the Era of the Industrial Internet of Things Jun 18 2021 This book presents the characteristics and benefits industrial organizations can reap from the Industrial Internet of Things (IIoT). These characteristics and benefits include enhanced competitiveness, increased proactive decision-making, improved creativity and innovation, augmented job creation, heightened agility to respond to continuously changing challenges, and intensified data-driven decision making. In a straightforward fashion, the book also helps readers understand complex concepts that are core to IIoT enterprises, such as Big Data, analytic architecture platforms, machine learning (ML) and data science algorithms, and the power of visualization to enrich the domains experts' decision making. The book also guides the reader on how to think about ways to define new business paradigms that the IIoT facilitates, as well how to increase the probability of success in managing analytic projects that are the core engine of decision-making in the IIoT enterprise. The book starts by defining an IIoT enterprise and the framework used to efficiently operate. A description of the concepts of industrial analytics, which is a major engine for decision making in the IIoT enterprise, is provided. It then discusses how data and machine learning (ML) play an important role in increasing the competitiveness of industrial enterprises that operate using the IIoT technology and business concepts. Real world examples of data driven IIoT enterprises and various business models are presented and a discussion on how the use of ML and data science help address complex decision-making problems and generate new job opportunities. The book presents in an easy-to-understand manner how ML algorithms work and operate on data generated in the IIoT enterprise. Useful for any industry professional interested in advanced industrial software applications, including business managers and professionals interested in how data analytics can help industries and to develop innovative business solutions, as well as data and computer scientists who wish to bridge the analytics and computer science fields with the industrial world, and project managers interested in managing advanced analytic projects.

Strategy Execution and Complexity Dec 13 2020 Almost all organisations today face unprecedented levels of change, complexity and volatility. Navigating the resultant disruption dynamics is one of the most important stewardship challenges facing strategic leaders. Getting it right can pay enormous dividends, but getting it wrong can lead to spectacular failure and the ultimate demise of once admired organisations. To address this threat, strategic leaders need to better understand how to navigate complexity and volatility and how to execute strategy in this rapidly changing environment. This book identifies 12 different strategy execution processes used to realise deliberate and emergent strategies – each illustrated with case studies and essential lessons for strategic leaders. The authors then discuss the effectiveness of these processes in different types of complex environments, showing how, used in isolation, each process can, at times, impede performance, sometimes creating survival risks that materialise today or in the future. The authors show the importance of "ambidexterity" and the need for organisations to balance the pursuit of internal efficiency and external market flexibility, both of which are essential to thriving in complex environments. This book provides essential tools for leaders to rethink and reconfigure their strategy execution practices in light of the significant change surrounding their organisations. The book is based on a 5-year, multistage study comprehensively reviewing cutting-edge research on strategy execution, reviewing seminal texts on strategy execution and, through in-depth case study interviews and cross-sectional surveys, identifying contemporary strategy execution practices of a range of different organisations across industries and sectors.

Acta Antiqua Academiae Scientiarum Hungaricae Jun 06 2020

Capitalism and the Commons Sep 29 2019 Capitalism and the Commons focuses on the political and social perspectives that commons offer, how they are appropriated or suppressed by capital and state, and how social initiatives and movements contest these dynamics or build their struggles on commoning. The volume comprises theoretical and empirical approaches that engage with three main themes: conceptualizing the commons, analyzing practices of commoning, and exploring commons politics. In their contributions, the authors focus on the development of anti-capitalist commons and explore the issue of practice and politics through case studies from Colombia, the Democratic Republic of Congo, South Africa, and Africa more broadly, Austria, Germany and South Korea, ranging from peri-urban and rural agriculture to urban commons and how they manifest in the Global South as well as in the Global North. The book engages with different discourses on the commons in regard to their relevance for social change and thereby reinvigorates the political meaning of the commons. It provides an original and important approach to the topic in terms of conceptualization, detailing diverse empirical realities, and analyzing potential perspectives. In so doing, the book transcends narrow disciplinary boundaries and expands the focus to the global. Providing a fresh perspective on the commons as a decisive component of alternatives, this title will be relevant to scholars and students of resource management, social movements, and sustainable development more broadly.

Macroeconomic Forecasting in the Era of Big Data Aug 01 2022 This book surveys big data tools used in macroeconomic forecasting and addresses related econometric issues, including how to capture dynamic relationships among variables; how to select parsimonious models; how to deal with model uncertainty, instability, non-stationarity, and mixed frequency data; and how to evaluate forecasts, among others. Each chapter is self-contained with references, and provides solid background information, while also reviewing the latest advances in the field. Accordingly, the book

offers a valuable resource for researchers, professional forecasters, and students of quantitative economics.

Geopolitics in the Era of Globalisation Jul 28 2019 This book presents an alternative roadmap for a world characterised by geopolitical uncertainty. The surging expectations about a future world of democratic values and high economic growth, born out of superpower bonhomie at the end of the Cold War, did not lead to the promised outcomes. Instead we are faced with deeply destabilising challenges, like climate change, widespread state fragility, terrorism, arms race, disruptive newer technologies, global economic volatility, and ineffectiveness of multilateral institutions, old and new. The volume: surveys the intellectual discourse, the attempts to redesign the global institutions, and the geopolitical trends since the end of the Cold War for an understanding of the contemporary geopolitics, analyses the characteristics of the contemporary geopolitics, the seeming intractability of the global challenges, and the ongoing discourse about preventing their further deterioration, foregrounds the Gandhian praxis and IR theory for managing power transitions anchored in non-violent mobilisation of empowered masses, ensuring institutional resilience, and illustrates them through ongoing conflicts in Iraq and Afghanistan, outlines an approach, based on the Gandhian experience of managing political change, towards conflict, geopolitical uncertainties, and institutional ineffectiveness for securing a better future globally, including South Asia. Accessibly written, this volume will be indispensable for foreign policy experts, government think tanks, and career bureaucrats. It will also be essential for scholars and researchers of international relations, foreign policy, politics, and governance and public policy.

Into the Information Age Jan 14 2021

The Era of the Antichrist Nov 23 2021 The Era of the Antichrist is not just a book. It is a prophecy that is being fulfilled everyday, corroborated in our daily news, magazines, newspapers, etc. This is not a strange coincidence, because we live now in the Era of the Antichrist. This is why The Era of the Antichrist is not a regular book, it is a living book that is happening around us visually and invisibly, it becomes alive in your life, it reveals to you the mysteries of the self and its link to the Antichrist, secrets and mysteries that have been hidden for thousands of years and whose understanding is paramount for our souls survival. In short, it makes you aware of the forces within and without yourself that influence your life. Saint John used in his book of the Apocalypse precise symbols and arithmetic ciphers that were Understood only by early Christian Gnostics, both numbers and symbols have been approached superficially for lack of the experiential Knowledge of God. It is only this rare gift what makes of a man a Gnostic and gives him what Saint John called - Understanding. This is why he makes sure to specify: Let those who have Understanding, compute the number of the beast, for it is the name of a man. And his number is 666. Those who have only the logic, intellectual knowledge to decipher them, have believed Saint Johns numbers to be without more meaning than the symbolic. This is a capital error - no one is able to understand correctly anything written in the Sealed book of Saint John, one of the most mysterious manuscripts ever written without the secret numerological code, especially when we deal with the Antichrist. Without the code used to unveil the mysteries, its literally impossible to discover his true identity or to know why does he have so much power over human beings. Many have made superficial conclusions about the identity of the Antichrist, some of the most popular were based on the misinterpretation of a prophecy of Nostradamus, others have been overtly based on social preferences or fears, i.e. Hitler, Gorbachev, Saddam Hussein, any of the Popes, etc. Meanwhile, the true identity of the Antichrist remained unknown and well protected behind the wall built around him by all these wild theories about his identity. As I said before, the early Christian Gnostics used specific systems of numbers and symbols to protect from malice or distortion of truth the High Mysteries of Christianity and to communicate them to each other without endangering their purity, as only those possessing the secret code could disclose them. They were forced to do this, not only to protect the purity of the Christ Mystery, but also the knowledge they had of other mysteries who concerned the adversary forces, the ones whose role is to oppose the Christ on earth. One of these mysteries, maybe the most feared of all, is the mystery of the number 666, the number of the adversary of the Christ, the satanic beast who is supposed to reign on the earth as the false Messiah; his identity, is also the most misinterpreted identity of history. Well, that is not the case anymore, The Era of the Antichrist reveals his true identity. Oddly enough - because we must be very near to the time when he is going to reveal himself - his followers are willingly corroborating the information given in this book, by acknowledging that they have been working for this end for hundreds and thousands of years and by talking openly, for the first time in history about their preparation for his coming and the great benefits that the world is going to receive by having someone like him change things on earth, etc. Our Savior in the course of His instructions to the apostles about the coming of His adversary, gave them special signs to watch for that would signal the end of times, but no date. To that I adhere myself, because if He Who Is the Beginning and the End gave only the signs, and no specific time, is because of a perfect understanding of things. So, I follow His direction, observe the signs and put the action to communicate them to others. Like it or not, most of the signs have already been fulfilled this may be pleasant or unpleasant to hear, but in these times Truth, more than ever, is a life saver being handed to you, which may help you to survive. So I exhort those who have ears to hear and who want to be part of His Kingdom to inform themselves correctly about the true identity of the adversary of the Christ; because he will deceive many, even the elect if that were possible as Our Lord Jesus Himself said. The Era of the Antichrist uses the secret numerological code used by Valentinus a disciple of Saint John to unveil the identity of the dreaded beast of the Apocalypse. The only correct computation and conclusions that I have knowledge of, were made by Rudolph Steiner, and G.R. Mead, and both had a different aspect than the one presented in The Era of the Antichrist because the time of the Antichrist was not due yet. But now, the time is ripe and the breaking of the seals of mystery of the Apocalypse is possible. It is now also possible to offer a book like this to the general public because there are technological mediums that allow us to communicate in ways that before were not possible. Book distribution, for instance, was before controlled by big publishing houses, which would probably have stopped most books containing a subject such as this if it was accurate and true - from reaching the public. The big difference between The Era of the Antichrist and other books in which there are diverse intellectual theories given about the mystery of the Antichrist is that The Era of the Antichrist does not theorize, or uses a modern system of numerology; it computes as Saint John directed us to do. It unveils the identity of the Antichrist, not by intellectual conclusions, but by disclosing its mystery with, if not the same numerical code that Saint John used, a code one of his disciples used, and which was in use in 96 AD, the time when Saint John wrote his document. The Era of the Antichrist is a book for our era, a book of spiritual survival. The correct Understanding of this matter is vital for the souls of every living being. As vital as to know what to do when a killer hurricane is coming. If you have a hurricane preparedness pamphlet and you follow its instructions chances are that you will be able to survive the hurricane. Please use it well.

Religion in the Era of Postsecularism Aug 09 2020 Exploring the viability of new perspectives on secularisation and the idea of postsecularism, this book reflects on their relevance when considered in the context of different societies within and outside the West. The topic of secularisation has been recently reconsidered by prominent theorists, such as Jürgen Habermas, Tala' Asad, Charles Taylor, and José Casanova. Offering a comparative critique of postsecularism, the contributors extend the discourse on postsecularism to include non-Western experiences, providing comprehensive perspectives on the role of religion in the public sphere and considering the validity of the concept of

postsecularism. Drawn from a variety of disciplines, the contributors articulate a coherent analysis of the role of religion in the public sphere from a perspective that engages in the envisaged dialogue. This insightful book will be important for those researching secularism and postsecularism, especially from a non-Western perspective, and it will also be of interest to scholars working on politics and religion in general, political philosophy, and African studies.

Sexual Bargaining in the Digital Era May 18 2021 Sexual Bargaining in the Digital Era follows the evolution of genders/sexualities and so on away from their Old Normal (ON) pattern, which prevailed during the Agricultural Age and the Industrial Age, and into the New Normal (NN) pattern which is currently surfacing in concert with an emerging Digital Era. ON was based on the ancient traditional script governing how women, men, children ought to behave within the spheres of genders/marriages/families/relationships/sexualities. Over the centuries, ON eventually modified into the familiar 1950s' style (nuclear) patriarchal, cisgender, husband/wife/with children and family. And now that style itself is fading away into NN. NN is based not on script but on improvisation—it is essentially a continual work-in-progress. To make it function the partners engage in ongoing negotiation governed by the principle that “everything is negotiable except the principle that everything is negotiable.” NN has thus far been pursued most frequently by persons (New Lights) who are educated and relatively advantaged. ON has been pursued mostly by persons (Old Lights) who are less educated and relatively less advantaged. ON is also strongly embraced by persons of a traditional religious bent—persons who tend to be rigid and unbending in their religious views. Currently, they tend to be extremely right-wing evangelicals and extremely right-wing Catholics. Importantly, their political clout far exceeds their relatively modest numbers within the larger population. In brief, the shift from ON to NN is a move away from the sanctity of a particular structure to the primacy of persons engaged in ongoing processes of inventing (and reinventing) certain arrangements of genders/marriages/families/relationships/sexualities, enabling them to fulfil their needs for primary (intrinsic/emotional) satisfactions such as liking, loving, empathy, companionship, sexual and so forth. Among other things, this shift replaces the preeminence of the historic binary or cisgender approach—heterosexual, legal, children and so on—in favor of the diversity/variety/multiplicity approach which incorporates under one conceptual umbrella all persons of whatever genders, sexualities and so on. All persons are thus engaged in a common struggle to achieve personal satisfactions as well as contribute to the Greater Good.

The Indonesian Economy in Transition Apr 16 2021 By any indicator, Indonesia, the fourth most populous nation on earth, is a development success story. Yet 20 years after a deep economic and political crisis, it is still in some respects an economy in transition. The country recovered from the 1997–98 crisis and navigated the path from authoritarian to democratic rule surprisingly quickly and smoothly. It survived the 2008–09 global financial crisis and the end of the China-driven commodity super boom in 2014 with little difficulty. It is now embarking on its fifth round of credible national elections in the democratic era. It is in the process of graduating to the upper middle-income ranks. But, as the 25 contributors to this comprehensive and compelling volume document, Indonesia also faces many daunting challenges – how to achieve faster economic growth along with more attention to environment sustainability, how to achieve more equitable development outcomes, how to develop and nurture stronger institutional foundations, and much else. “This is a timely and much-needed book. There are very few recent books on Indonesia with such a comprehensive analysis of not just mainstream economic policies, but also most importantly the key issues of human capital, inequality, social welfare, labour, food security and natural resource management. This book will not only be crucial for policy discourse but for all stakeholders who care about Indonesia making the transition not only to a high-income economy, but an inclusive one.” – Mari Pangestu, Faculty of Economics and Business, University of Indonesia “The Indonesian Economy in Transition: Policy Challenges in the Jokowi Era and Beyond is one of the most important books that discusses the Indonesian economy post-Asian Financial Crisis. A must-read for anyone who wants to understand contemporary Indonesian economy.” – M. Chatib Basri, former Minister of Finance of Indonesia

Theatre Pedagogy in the Era of Climate Crisis Dec 01 2019 This volume explores whether theatre pedagogy can and should be transformed in response to the global climate crisis. Conrad Alexandrowicz and David Fancy present an innovative re-imagining of the ways in which the art of theatre, and the pedagogical apparatus that feeds and supports it, might contribute to global efforts in climate protest and action. Comprised of contributions from a broad range of scholars and practitioners, the volume explores whether an adherence to aesthetic values can be preserved when art is instrumentalized as protest and considers theatre as a tool to be employed by the School Strike for Climate movement. Considering perspectives from areas including performance, directing, production, design, theory and history, this book will prompt vital discussions which could transform curricular design and implementation in the light of the climate crisis. Theatre Pedagogy in the Era of Climate Crisis will be of great interest to students, scholars and practitioners of climate change and theatre and performance studies.

Information Visualization in the Era of Innovative Journalism Nov 04 2022 Information Visualization in the Era of Innovative Journalism brings together over 30 authors from countries around the world to synthesize how recent technological innovations have impacted the development, practice and consumption of contemporary journalism. As technology rapidly progresses, shifts, and innovates, there have been immense changes in the way we communicate. This book collects research from around the world that takes an in-depth look at the primary transformations related to journalistic innovation in recent times. High-profile contributors provide cutting-edge scholarship on innovation in journalism as it relates to emergent topics such as virtual reality, podcasting, multimedia infographics, social media, mobile storytelling and others. The book pays special attention to the development of information visualization and the ability of recent innovations to meet audience needs and desires. Students and scholars studying contemporary journalism history and practice will find this a vital and up-to-date resource, as well as those studying communication technology as it relates to marketing, PR or mass media broadly.

People Analytics in the Era of Big Data Sep 02 2022 Apply predictive analytics throughout all stages of workforce management People Analytics in the Era of Big Data provides a blueprint for leveraging your talent pool through the use of data analytics. Written by the Global Vice President of Business Intelligence and Predictive Analytics at Monster Worldwide, this book is packed full of actionable insights to help you source, recruit, acquire, engage, retain, promote, and manage the exceptional talent your organization needs. With a unique approach that applies analytics to every stage of the hiring process and the entire workforce planning and management cycle, this informative guide provides the key perspective that brings analytics into HR in a truly useful way. You're already inundated with disparate employee data, so why not mine that data for insights that add value to your organization and strengthen your workforce? This book presents a practical framework for real-world talent analytics, backed by groundbreaking examples of workforce analytics in action across the U.S., Canada, Europe, Asia, and Australia. Leverage predictive analytics throughout the hiring process Utilize analytics techniques for more effective workforce management Learn how people analytics benefits organizations of all sizes in various industries Integrate analytics into HR practices seamlessly and thoroughly Corporate executives need fact-based insights into what will happen with their talent. Who should you hire? Who should you promote? Who are the top or bottom performers, and why? Who is at risk to quit, and why? Analytics can provide these answers, and give you insights based on quantifiable data instead of gut feeling and subjective assessment. People Analytics in the Era of Big Data is the essential guide to optimizing your workforce with the tools

already at your disposal.

The Era of Choice Oct 03 2022 How today's cornucopia of choices has transformed our lives and our culture, from the foundations of scientific theory to the anxiety of everyday decisions. Today most of us are awash with choices. The cornucopia of material goods available to those of us in the developed world can turn each of us into a kid in a candy store; but our delight at picking the prize is undercut by our regret at lost opportunities. And what's the criterion for choosing anything—material, spiritual, the path taken or not taken—when we have lost our faith in everything? In *The Era of Choice* Edward Rosenthal argues that choice, and having to make choices, has become the most important influence in both our personal lives and our cultural expression. Choice, he claims, has transformed how we live, how we think, and who we are. This transformation began in the nineteenth century, catalyzed by the growing prosperity of the Industrial Age and a diminishing faith in moral and scientific absolutes. The multiplicity of choices forces us to form oppositions; this, says Rosenthal, has spawned a keen interest in dualism, dilemmas, contradictions, and paradoxes. In response, we have developed mechanisms to hedge, compromise, and to synthesize. Rosenthal looks at the scientific and philosophical theories and cultural movements that choice has influenced—from physics (for example, Niels Bohr's theory that light is both particle and wave) to postmodernism, from Disney trailers to multiculturalism. He also reveals the effect of choice on the personal level, where we grapple with decisions that range from which wine to have with dinner to whether to marry or divorce, as we hurtle through lives of instant gratification, accelerated consumption, trend, change, and speed. But we have discovered, writes Rosenthal, that sometimes, we can have our cake and eat it, too.

Investing in the Era of Climate Change Jun 30 2022 A climate catastrophe can be avoided, but only with a rapid and sustained investment in companies and projects that reduce greenhouse gas emissions. To the surprise of many, this has already begun. Investors are abandoning fossil-fuel companies and other polluting industries and financing businesses offering climate solutions. Rising risks, evolving social norms, government policies, and technological innovation are all accelerating this movement of capital. Bruce Usher offers an indispensable guide to the risks and opportunities for investors as the world faces climate change. He explores the role that investment plays in reducing emissions to net zero by 2050, detailing how to finance the winners and avoid the losers in a transforming global economy. Usher argues that careful examination of climate solutions will offer investors a new and necessary lens on the future for their own financial benefit and for the greater good. Companies that reduce greenhouse gas emissions will create great wealth, and, more importantly, they will provide a lifeline for humanity. Grounded in academic and industry research, Usher's insights bring clarity to a complex and controversial topic while illuminating the people behind the numbers. This book sets out a practical and actionable plan for investors that will alter the course of climate change.

Equal Means Equal Feb 01 2020 When the Equal Rights Amendment was first passed by Congress in 1972, Richard Nixon was president and All in the Family's Archie Bunker was telling his feisty wife Edith to stifle it. Over the course of the next ten years, an initial wave of enthusiasm led to ratification of the ERA by thirty-five states, just three short of the thirty-eight states needed by the 1982 deadline. Many of the arguments against the ERA that historically stood in the way of ratification have gone the way of bouffant hairdos and Bobby Riggs, and a new Coalition for the ERA was recently set up to bring the experience and wisdom of old-guard activists together with the energy and social media skills of a new-guard generation of women. In a series of short, accessible chapters looking at several key areas of sex discrimination recognized by the Supreme Court, *Equal Means Equal* tells the story of the legal cases that inform the need for an ERA, along with contemporary cases in which women's rights are compromised without the protection of an ERA. Covering topics ranging from pay equity and pregnancy discrimination to violence against women, *Equal Means Equal* makes abundantly clear that an ERA will improve the lives of real women living in America.

The United States and Germany in the Era of the Cold War, 1945-1990 Apr 28 2022 Publisher Description

The Era of Private Peacemakers Sep 21 2021 The field of peacemaking is in turbulent change. There are more peacemaking actors than before but fewer success stories, and an increasing number of violent conflicts tend to resist negotiated agreements. Tools and practices created for traditional inter- and intra-state conflicts have become ineffective and revision of old mediation practices is called for. This book examines how the private peacemaking organisations have faced this challenge. In the 21st century, private peacemakers have become a central part of peace diplomacy and have appeared as flexible actors whose innovative thinking paves the way for reconsidering and reinventing old practices of mediation. Instead of emphasizing the act of resolution, a new emphasis is given to the transformation of violence into a peace system, the complexity of conflict and the inadequateness of rational management. Furthermore, this shift has brought civic society actors from the field of reconciliation to the field of peace mediation. This new pragmatic approach under development can be called dialogic mediation.
