*LOL with God* Oct 31 2019 Feeling tired, stressed or disconnected with God? In this devotional, authors Pam Farrel and Dawn Wilson provide real-life stories mixed with a splash of humor and an encouraging word from God to help women get through hectic days. Joy from God, unlike the fleeting happiness of the world, transforms the soul and helps to heal frazzled, broken women. A cheerful heart is still good medicine (Proverbs 17:22), and women need it in megadoses! There will always be a need for humor to cheer our hearts, and when that humor is paired with powerful truth principles from Scripture, women will be revived and refreshed. To make it fun, the authors have taken Scripture verses and made them into text messages similar to those you might see on your cell phone, but these are from God's Word.

*Cyanotype Toning* Mar 17 2021 Cyanotype is the most accessible and frequently used of all the alternative photographic processes. When utilized properly, it has the potential to rival other processes when it comes to detail and tonal range, but its Prussian blue color isn't always suitable for the final photograph. Throughout history, cyanotype prints have been toned not only with various—and at times hazardous—chemicals but also with more natural ingredients like tea and coffee. Since the cyanotype itself is non-toxic, Cyanotype Toning will champion an innovative process, developed by the author, of toning cyanotypes with natural material. This process, which is easy and reliable, offers a much broader range of possible colors and even beautiful black and whites. Even duotone or tricolor prints can be attained. The book consists of two parts. Part One is a step-by-step how-to section including all the information that a student at any level needs to achieve a successfully toned print. Easy-to-understand background information is provided on how and why the process works so that readers can venture on their own into the world of natural colors. The first part also has a detailed section on all the factors that can influence the outcome, like paper choice, water quality, properties of the plants, temperature of the bath and the duration of the toning. Part Two is devoted to contemporary artists who have explored toning with botanicals and integrated the process into their creative practice. The book includes: A list of equipment and supplies needed. In depth information about useful plants and the specific properties that make them suitable for toning cyanotypes. Concise step-by-step instructions for printing cyanotypes successfully. A chart of more than 60 tested papers with recommendations on paper choice. Step-by-step generic instructions on toning with botanicals. Troubleshooting toning with botanicals. More detailed recipes for specific colors with information about the plants. Step-by-step instructions on how to print duotone and tricolor prints. A range of creative ideas on how to use the process in classrooms and with different age groups. A comprehensive list of more than 380 tested parts of plants and possible color outcomes. Using botanicals to tone cyanotypes broadens the color spectrum, enlarges creative possibilities and makes the cyanotype process even more versatile. The process is not cut and dried science but a limitless field for discovery and surprises. Cyanotype Toning provides accessible information and instructions for readers at all levels. It is comprehensive and explanatory, so that readers can expand on the subject on their own, as did the contemporary artists who share their experiences and the works they have created using this innovative toning process.

has a long drink of the experience of feeling that Callahan writes about, it will be difficult to quench one's thirst for it with less." -Timothy S. Bennett, writer, artist and filmmaker "An owner's manual for Sane Human Being! Pretty soon you'll reclaim who you have always been, who you came here to be: deep and authentic feeling, conscious life, and a chance to play a part in the healing of our collective nightmare." -Malidoma Patrice Somé, PhD, author, healer, African Shaman "For modern seekers, responding to the call for initiation into relationship, here is an open invitation. As with all true rites of passage, there is no promise of safety along the way, and, the potential for transformation is boundless." -Sally Erickson, artist, psychotherapist, community organizer, and film producer. This book is about feelings, and the ways that we, as individuals and as a culture, have numbed ourselves against them. It is about unleashing the possibility of using your conscious feelings to re-shape your life around what really matters to you. Conscious Feelings introduces readers to the concept of the "personal numbness bar" -- a measure set high by modern culture as a way of keeping everything "cool," under control, and consequently out of touch. This book provides the insight and the means for lowering that numbness bar. "You can feel more wisely and effectively," the author asserts. You can regain the intelligence and energy of your feelings, so long denied and dressed up to appear acceptable. "Being cool," Callahan states, "allows you to look the other way about schooling, prescription drugs, corporate wrongdoing, corruption, pollution, injustice, your life purpose, your love life, and your job," and to accept the generic malaise that characterizes so many ordinary relationships. The central framework of the book is built with the Ten Distinctions for Consciously Feeling, including: Learning the potent difference between thoughts and feelings. Sorting out feelings (based in the present) from emotions (based in the past, on cultural or religious beliefs). Experiencing how feelings are absolutely-neutral energy and information, neither good nor bad, neither positive nor negative, yet extremely useful in your adult life. Each chapter is enriched with THOUGHTMAPS—clear diagrams of ways you presently think and ways you could possibly think—supported by an abundance of practical experiments

The entries for over 2,200 individual titles are arranged chronologically by their province or territory of publication, revealing cooking and dining customs in each part of the country over 125 years. Full bibliographical descriptions of first and subsequent editions are augmented by author biographies and corporate histories of the food producers and kitchen-equipment manufacturers, who often published the books. Driver's excellent general introduction sets out the evolution of the cookbook genre in Canada, while brief introductions for each province identify regional differences in developments and trends. Four indexes and a 'Chronology of Canadian Cookbook History' provide other points of access to the wealth of material
