"Every student deserves a great teacher, not by chance, but by design" — Douglas Fisher, Nancy Frey, & John Hattie What if someone slipped you a piece of paper listing the literacy practices that ensure students demonstrate more than a year's worth of learning for a year spent in school? Would you keep the paper or throw it away? We think you'd keep it. And that's precisely why acclaimed educators Douglas Fisher, Nancy Frey, and John Hattie wrote *Visible Learning for Literacy*. They know teachers will want to apply Hattie's head-turning synthesis of more than 15 years of research involving millions of students, which he used to identify the instructional routines that have the biggest impact on student learning. These practices are "visible" for teachers and students to see, because their purpose has been made clear, they are implemented at the right moment in a student's learning, and their effect is tangible. Yes, the "aha" moments made visible by design. With their trademark clarity and command of the research, and dozens of classroom scenarios to make it all replicable, these authors apply Hattie's research, and show you: How to use the right approach at the right time, so that you can more intentionally design classroom experiences that hit the surface, deep, and transfer phases of learning, and more expertly see when a student is ready to dive from surface to deep. Which routines are most effective at specific phases of learning, including word sorts, concept mapping, close reading, annotating, discussion, formative assessment, feedback, collaborative learning, reciprocal teaching, and many more. Why the 8 mind frames for teachers apply so well to curriculum planning and can inspire you to be a change agent in students' lives—and part of a faculty that embraces the idea that visible teaching is a continual evaluation of one's impact on student's learning. "Teachers, it's time we embrace the evidence, update our classrooms, and impact student learning in wildly positive ways," say Doug, Nancy, and John. So let's see *Visible Learning for Literacy* for what it is: the book that renews our teaching and reminds us of

our influence, just in time.

Cultural Practices of Literacy Jul 21 2019 This volume presents case studies of literacy practices as shaped by culture, language, community, and power. Covering a range of contexts and exploring a number of relevant dimensions in the evolving picture of literacy as situated, multiple, and social, the studies are grouped around four overarching themes: *Language, Literacy, and Hegemony; *The Immigrant Experience: Language, Literacies, and Identities; *Literacies In-/Out-of-School and On the Borders; and *New Pedagogies for New Literacies. It is now generally recognized that literacy is multiple and woven within the sociocultural lives of communities, but what is not yet fully understood is how it is multiple--how this multiplicity plays out across and within differing sociocultural contexts. Such understanding is critical for crafting school literacy practices in response to the different literacy sets brought to school by different learners. Toward this end it is necessary to know what those sets are composed of. Each of the case studies contributes to building this knowledge in new and interesting ways. As a whole the book provides a rich and complex portrait of literacy-in-use. Cultural Practices of Literacy: Case Studies of Language, Literacy, Social Practice, and Power advances sociocultural research and theory pertaining to literacy development as it occurs across school and community boundaries and cultural contexts and in and out of school. It is intended for researchers,

students, professionals across the field of literacy studies and schooling, including specialists in family literacy, community literacy, adult literacy, critical language studies, multiliteracies, youth literacy, international education, English as a second language, language and social policy, and global literacy.

The School and Society Jul 25 2022 Originally published in 1899, *The School and Society* began as a series of lectures given to parents, professionals, and others at the University Elementary School. In this short volume, Dewey discusses the way in which education is fundamentally tied to a thriving democracy. The problem, according to the author, with the old education model was that elementary schools did not encourage exploration and curiosity in their students. In a country that requires the thoughtful pursuit of ideas by the populace in order to arrive at reasonable governance, this repressive form of education encouraged rote following and closed minds. Anyone interested in philosophy, education, and the general betterment of society will find Dewey's thoughts and early childhood learning progressive and intriguing. American educator and philosopher JOHN DEWEY (1859-1952) helped found the American Association of University Professors. He served as professor of philosophy at Columbia University from 1904 to 1930 and authored numerous books, including *Experience and Nature* (1925), *Experience and Education* (1938), and *Freedom and Culture* (1939).

Participatory Literacy Practices for P-12 Classrooms in the Digital Age

Aug 14 2021 The ability to effectively communicate in a globalized world shapes the economic, social, and democratic implications for the future of P-12 students. Digitally mediated communication in an inclusive classroom increases a student's familiarity and comfortability with multiple types of media used in a wider technological culture. However, there is a need for research that explores the larger context and methodologies of participatory literacy in a digital educational space. Participatory Literacy Practices for P-12 Classrooms in the Digital Age is an essential collection of innovative research on the methods and applications of integrating digital content into a learning environment to support inclusive classroom designs. While highlighting topics such as game-based learning, coding education, and multimodal narratives, this book is ideally designed for practicing instructors, pre-service teachers, professional development coordinators, instructional facilitators, curriculum designers, academicians, and researchers seeking interdisciplinary coverage on how participatory literacies enhance a student's ability to both contribute to the class and engage in opportunities beyond the classroom.

Feb 26 2020 This book examines emergent literacy as the foundations for language instruction and seeks to relate the work of those doing research on literacy acquisition and those designing programs to facilitate children's literacy development. It bridges theory and practice, looking at both cognitive processes and settings in which children first experience literacy. With contributions by leading researchers in the field, the book examines emergent literacy in nonliterate homes; oral language supports; parent-child reading; literacy and working class families; literacy from a developmental perspective; parental involvement; and collaborative efforts of teachers and parents. An essential collection for all research and education in the language arts methods area. Will also appeal to educators involved in reading instruction and parent-education.
