Strategy That Works Feb 06 2021 How to close the gap between strategy and execution Two-thirds of executives say their organizations don't have the capabilities to support their strategy. In *Strategy That Works*, Paul Leinwand and Cesare Mainardi explain why. They identify conventional business practices that unintentionally create a gap between strategy and execution. And they show how some of the best companies in the world consistently leap ahead of their competitors. Based on new research, the authors reveal five practices for connecting strategy and execution used by highly successful enterprises such as IKEA, Natura, Danaher, Haier, and Lego. These companies: • Commit to what they do best instead of chasing multiple opportunities • Build their own unique winning capabilities instead of copying others • Put their culture to work instead of struggling to change it • Invest where it matters instead of going lean across the board • Shape the future instead of reacting to it Packed with tools you can use for building these five practices into your organization and supported by in-depth profiles of companies that are known for making their strategy work, this is your guide for reconnecting strategy to execution.

The Future of Strategy: A Transformative Approach to Strategy for a World That Won't Stand Still Oct 26 2022 Own the Future of Your Industry with a Transformational Strategy Designed for Today's Business World Leaders today are inundated with strategic opportunities, besieged by business disruptions, and pressured to innovate--to do things better, faster, or differently. The CEO of a Fortune 500 firm explains it best: "I am looking at 23 different strategic initiatives. Trying to develop and implement so many strategies is like trying to change the driver, tires, the oil, and the bumpers; paint the body; and tune the engine. And doing all of this on a car that's running at full speed." The answer used to be found in strategy. But in the past decade, the commonly deployed large-scale strategic exercises were largely discredited. They were slow and elaborate and did not deliver the expected returns, let alone help make sense of a glut of initiatives or cope with an increasingly unpredictable future. The *Future of Strategy* brings strategy back from those big top-down plans. It answers the questions of executives facing tumultuous business conditions and rapidly shifting markets: Is strategy still possible? Yes. Aren't strategies outdated before they can be implemented? Not if they are done right. Rather than developing strategy, aren't we better off being agile and able to capitalize on emerging trends faster than our peers? Agility complements strategy; it cannot replace it. This book is about reversing course and repositioning strategy in its rightful place as the overarching management system. The authors introduce their core methodology, designed to future proof companies against the friction and "fog of war" that inexorably accompany changing times. They synthesize three fundamental principles that, when combined, provide the means to reclaim strategy: Take direct cues from fundamental trends affecting the company going forward Engage people across the company to translate these cues into strategy and effectively eliminate the handover hurdle between formulation and execution, a major reason for strategy failure Capture the output as competitive opportunities and manage their life cycles--when some have run their course, others are ready to take over Strategy today requires stepping over the shadows of one's own ingrained beliefs to capture new opportunities. This book reveals the inner workings of transformational strategies developed by leaders who gradually become more successful by advancing winning combinations of attitudes, values, habits, and practices.

The Geometry of Strategy Mar 19 2022 To excel in today's exacting world, organizations need to combine strategic planning and strategic thinking. Strategic planning is a formal activity carried out periodically by top managers, but it is vulnerable to change. Strategic thinking is an informal activity that occurs intermittently throughout an organization, but it tends to be non-cumulative. Keidel offers a framework for integrating strategic planning and strategic thinking that leverages the strengths of both. The key to his work is the application of simple geometric forms—especially, 2x2 grids and triangles—that help organizational leaders and strategists structure their thinking and planning. Keidel introduces four strategic categories—persona (organizational identity), performance (what is measured), puzzle (dilemmas that are faced), and pattern (how to compete, grow, & organize). Each category matches a specific geometry of thinking—point, linear, angular, and triangular. The payoff? A novel way to develop strategy, as well as a set of conceptual lenses for "reading" any other organization's strategy—or any strategic argument. Keidel's work is illustrated with case studies from his own consulting practice and grounded in the theoretical literature underlying the various geometries of thinking. This book will be a valuable resource for managerial and executive education in strategy, as well as a provocative reading for organizational strategy consultants and thoughtful practitioners.

It is unique for its combination of analysis of international case studies and reflection on critical nodes and features in strategic planning. Strategy and Organization Jun 29 2020 Examining some of the new and emerging issues in strategic management, Loizos Heracleous offers a fresh approach to the established ideas of strategy. Beginning with the historical development of the strategy field, including the influence of industrial organisation and the resource-based view, he develops a new perspective labelled an 'organisational action' view of strategy. This approach is theoretically underlain by organisation theory and takes seriously such issues as the role of agency, the need for a longitudinal focus on process, the complexities of strategy implementation, and organisational facets such as strategic choice, organisational culture, organisational discourses and learning. Combining theoretical subtlety with an applied orientation, Heracleous examines topical areas such as corporate governance, inter-organisational networks, and organising for the future. With original research and extensive surveys of the strategy literature, combined with a strong practical orientation, this book is ideal for MBA students, strategy researchers and the more thoughtful practitioner.

Scenario-based Strategic Planning Mar 27 2020 In a world characterized by increasing complexity and volatility, managers must be able to flexibly adapt their strategies to changing environmental conditions. Traditional strategic management frameworks often fail in this context. Therefore, we present "scenario-based strategic planning" as a framework for strategic management in an uncertain world. Previous approaches to scenario planning were complex and focused on the long term, but the approach developed by Roland Berger and the Center for Strategy and Scenario Planning at HHL Leipzig Graduate School of Management is different. By designing appropriate tools and integrating scenario planning into strategic planning, we have made our approach less complex and easier for firms to apply. We illustrate the approach with examples from different industries.

Strategic Review Sep 13 2021 Following careers in the military and in industry, Robert Grattan has devoted himself to the subject of strategy and its related theory through his research into the strategy implementation employed by business, governments and the military. Strategy process is widely studied and taught but, argues Robert Grattan, comprehensive prescriptive theories have yet to be developed. This book is based on analysis of the strategic defence review (SDR) conducted by the UK Ministry of Defence, the methodology for which has been employed in other countries. The study focuses on how the review was managed through the twin lenses of strategic business management theory and the 'Essence of Decision' theory of governmental decision-making closely associated with the John F. Kennedy School of Government in the USA. The author has been fortunate in being granted interviews with the leading figures in Government, the Civil Service and the Military who participated in the SDR process and in having gained access to information in Ministry of Defence files under Freedom of Information legislation. The result is *Strategic Review*, a book that provides vivid insights into what happened in a large complex organisation during a major strategic review and highlights the problems likely to be encountered during the process of formulating strategy in business, in government, in sport and any other human endeavour. It will appeal to many in business intrigued by the similarities between the issues facing business and military strategists; to those involved in public policy-making; to the defence community; and to academics and higher level students with an interest in this rich field of study.
