**Digital Control Systems** Feb 08 2021 This well-known book is an introduction to the field of digital, sampled-data control. It treats the field in depth and can be used for courses and for self study. The second edition has been completely revised and expanded with new results. The work now appears in two volumes, with Volume 2 to be published in 1989. The volumes form a unit and take the reader systematically from fundamentals to problems of real applications. The work is directed towards students of electrical and mechanical engineering, computer science (especially with a specialization on automation and control engineering), and other fields like biology, economics, space mathematics and physics. It is also directed to engineers and scientists concerned with solving concrete problems.

*Leading Schools Successfully* Apr 12 2021 *Leading Schools Successfully: Stories from the field* considers international research focussing on leadership in schools. Based on the ISSPP (International Successful School Principalship Project) which has conducted over one hundred multiple perspective case studies of successful school principals from more than a dozen countries, the book captures the exhilaration of being a principal who grows and sustains success from those practitioners who are acknowledged as exhibiting outstanding leadership. Whilst much is known about successful school leaders, the book reinforces the argument that it is neither possible, nor appropriate, to generalise specific strategies that should be adopted to ensure success for all schools at all times in all settings. Instead, success calls for a high level of judgement, wisdom, artistry and sheer hard work on the part of principals, adapting for their particular context the knowledge about leading schools successfully. Reflection sections in each chapter ask the reader to consider further issues which each chapter raises. Topics considered include: - the importance of school principals to school success - turning around under-performing schools - values-led leadership -sustaining successful leadership - leading in multi-cultural settings - issues and implications for the future. With international contributions from experts in the field, the book offers a new perspective on leadership in schools and will be of interest to school principals and researchers.

*Blossoms of the Savannah* Nov 27 2019 *Blossoms of the Savannah* is the story of two sisters, Taiyo and Resian, who are on the verge of womanhood and torn between their personal ambitions and the humiliating duty to the Nasila tradition. Relocation to their rural home heralds a cultural alienation born of their refusal to succumb to female

genital mutilation and early marriages. In pursuit of the delicate and elusive socio-economic cultural balance in Nasila, Ole. Kaelo, the girls' father is ensnared by a corrupt extortionist. To extricate himself he sends his daughters into a flat-spin labyrinth from which they have to struggle to escape.

**Fusion Research May 02 2020** Fusion Research, Volume I: Principles provides a general description of the methods and problems of fusion research. The book contains three main parts: Principles, Experiments, and Technology. The Principles part describes the conditions necessary for a fusion reaction, as well as the fundamentals of plasma confinement, heating, and diagnostics. The Experiments part details about forty plasma confinement schemes and experiments. The last part explores various engineering problems associated with reactor design, vacuum and magnet systems, materials, plasma purity, fueling, blankets, neutronics, environment, and fusion-fission hybrids. The book will be of value to those entering the field and to those already engaged in fusion research.

*School, Family, and Community Partnerships Mar 12 2021* School, Family, and Community Partnerships: Preparing Educators and Improving Schools addresses a fundamental question in education today: How will colleges and universities prepare future teachers, administrators, counselors, and other education professionals to conduct effective programs of family and community involvement that contribute to students' success in school? The work of Joyce L. Epstein has advanced theories, research, policies, and practices of family and community involvement in elementary, middle, and high schools, districts, and states nationwide. In this second edition, she shows that there are new and better ways to organize programs of family and community involvement as essential components of district leadership and school improvement. THE SECOND EDITION OFFERS EDUCATORS AND RESEARCHERS: A

framework for helping rising educators to develop comprehensive, goal-linked programs of school, family, and community partnerships. A clear discussion of the theory of overlapping spheres of influence, which asserts that schools, families, and communities share responsibility for student success in school. A historic overview and exploration of research on the nature and effects of parent involvement. Methods for applying the theory, framework, and research on partnerships in college course assignments, class discussions, projects and activities, and field experiences. Examples that show how research-based approaches improve policies on partnerships, district leadership, and school programs of family and community involvement. Definitive and engaging, *School, Family, and Community Partnerships* can be used as a main or supplementary text in courses on foundations of education methods of teaching, educational administration, family and community relations, contemporary issues in education, sociology of education, sociology of the family, school psychology, social work, education policy, and other courses that prepare professionals to work in schools and with families and students.

Management Studies – Exploring New Opportunities Sep 29 2022 The capacity and willingness to develop, organize and manage a business venture along with any of its risks in order to make a profit. The most obvious example of entrepreneurship is the starting of new businesses. In economics, entrepreneurship combined with land, labor, natural resources and capital can produce profit. Entrepreneurial spirit is characterized by innovation and risk-taking, and is an essential part of a nation's ability to succeed in an ever changing and increasingly competitive global marketplace. Not sure whether you are cut out for starting your own business? Don't worry, you have company. Most people have dreamed about launching their own venture at some stage of their lives but the majority do not even take the first step. They are held back by a number of reasons. Some fear that if their business does not succeed, they could lose the investment they make. In many cases, that's their entire life's savings. Others think they are too old. In fact, even if they overcome one argument that is keeping them back, they think of another one to stop themselves from taking the plunge. Age is definitely not a factor to consider before getting into business for yourself. An article titled, "Entrepreneurs Get Better with Age" in *Harvard Business Review* says, "The average age of a successful entrepreneur in high-growth industries such as computers, health care, and aerospace is 40" and "Twice as many successful entrepreneurs are over 50 as under 25." Colonel Sanders started the Kentucky Fried

Chicken chain of restaurants when he was 65 and Takichiro Mori, who built a real estate empire worth \$13 billion, made his first investment in property at the age of 55. Many of those who throw up their jobs and make it on their own, certainly do have some combination of these abilities. But everyone who has these attributes does not become an entrepreneur. Seth Godin, the author and entrepreneur, says, "Studying entrepreneurship without doing it ...is like studying the appreciation of music without listening to it." The only way to really find out whether you have what it takes is to start your own business and get a first-hand feel of entrepreneurship. Of course, this is not to suggest that you launch on a big scale right away. Devote a little time each day, make some small investments in the field of your choice and see if you like the experience. If you have an eye for color and furnishings and are contemplating a venture in interior decoration, start by meeting someone who is in the same profession. While you may have the ability to furnish a room beautifully, do you know how to attract customers? Where will you source accessories from? Can you make an estimate for doing a job? Do you have a list of sub-contractors whom you can engage? The process of finding answers to all these questions will give you an idea about your capabilities. You will realize that becoming an interior decorator requires you to have many skills in addition to the ability to make a room look pleasing to the eye. If you are able to actually take up an interior decoration project for a customer, it will give you a genuine basis on which you can decide whether you are cut out for entrepreneurship. Entrepreneurs also need to dedicate long hours to mundane tasks like accounting, filing tax returns, complying with local, state and federal laws and doing different types of administrative work. Keep in mind that none of these tasks are related to your core business and they don't get you any new customers. But you have to make the effort to complete them anyway. Still not sure whether to make a start? Maybe this piece of advice from articles of other authors in this book will help.

*The Arts and Indigenous Knowledge Systems in a Modernized Africa* Aug 29 2022 This collection derives from a conference held in Pretoria, South Africa, and discusses issues of indigenous knowledge systems (IKS) and the arts. It presents ideas about how to promote a deeper understanding of IKS within the arts, the development of IKS-arts research methodologies, and the protection and promotion of IKS in the arts. Knowledge, embedded in song, dance, folklore, design, architecture, theatre, and attire, and the visual arts can promote innovation and entrepreneurship, and it can improve communication. IKS, however, exists in a post-millennium, modernizing Africa. It is then the concept of post-Africanism that would induce one to think along the lines of a globalized, cosmopolitan and essentially modernized Africa. The book captures leading trends and ideas that could help to protect, promote, develop and affirm indigenous knowledge and systems, whilst also making room for ideas that do not necessarily oppose IKS, but encourage the modernization (not Westernization) of Africa.

Handbook of Employee Selection Jul 16 2021 The Handbook of Employee Selection provides a comprehensive review of a) contemporary personnel selection instruments, including the technical methodology for their development and evaluation of their effectiveness, b) the organizational systems necessary for the effective and efficient use of personnel selection methods as part of organizations human resource management approach, and c) the societal and organizational factors that provide the context within which personnel selection is nested. The Handbook will include descriptions of specific examples of personnel selection procedures that have had major impact on the development of personnel selection function within organizations, as well as discussions of current and future trends in employee selection around the world.

**Debating Single-Sex Education** Jul 28 2022 Debating Single Sex Education: Separate and Equal, 2nd edition, provides a balanced summary of the context, concerns, and findings about single sex education in 21st Century United States. Few school reforms have engendered as much controversy as single sex public education. This book examines the history of single-sex classes and legislation that has over time evolved to render the reform legal, even though it continues to be subject to public scrutiny and litigation. The book also provides insights into the social, religious, and cultural contexts that set the stage for the growing popularity of single-sex education over the last decade. It explains controversial brain-based research and addresses the problem of bullying in single-sex classes. Finally, the book includes findings based on research in single-sex schools across the nation. Do single-sex classes work? This book provides information that will allow the reader to make an informed decision about that question. Debating Single Sex Education: Separate and Equal, 2nd edition, strives to inform the debate and add to the discourse on this popular school reform.

**Betrayal in the City** Jan 28 2020 Betrayal in the City, first published in 1976 and 1977, was Kenya's national entry to the Second World Black and African Festival of Arts and Culture in Lagos, Nigeria. The play is an incisive, thought-provoking examination of the problems of independence and freedom in post-colonial African states, where a sizeable number of people feel that their future is either blank or bleak. In the words of Mosese, one of the characters: "It was better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future."--Page 4 of cover

**Pastoralism and Development in Africa** Jun 14 2021 Once again, the Horn of Africa has been in the headlines. And once again the news has been bad: drought, famine, conflict, hunger, suffering and death. The finger of blame has been pointed in numerous directions: to the changing climate, to environmental degradation, to overpopulation, to geopolitics and conflict, to aid agency failures, and more. But it is not all disaster and catastrophe. Many successful development efforts at 'the margins' often remain hidden, informal, sometimes illegal; and rarely in line with standard development prescriptions. If we shift our gaze from the capital cities to the regional centres and their hinterlands, then a very different perspective emerges. These are the places where pastoralists live. They have for centuries struggled with drought, conflict and famine. They are resourceful, entrepreneurial and innovative peoples.

Yet they have been ignored and marginalised by the states that control their territory and the development agencies who are supposed to help them. This book argues that, while we should not ignore the profound difficulties of creating secure livelihoods in the Greater Horn of Africa, there is much to be learned from development successes, large and small. This book will be of great interest to students and scholars with an interest in development studies and human geography, with a particular emphasis on Africa. It will also appeal to development policy-makers and practitioners.

*Helping Students Motivate Themselves* Jan 10 2021 Give your students the tools they need to motivate themselves with tips from award-winning educator Larry Ferlazzo. A comprehensive outline of common classroom challenges, this book presents immediately applicable steps and lesson plans for all teachers looking to help students motivate themselves. With coverage of brain-based learning, classroom management, and using technology, these strategies can be easily incorporated into any curriculum. Learn to implement solutions to the following challenges: How do you motivate students? How do you help students see the importance of personal responsibility? How do you deal with a student who is being disruptive in class? How do you regain control of an out-of-control class? And more! Blogger and educator Larry Ferlazzo has worked to combine literacy development with short and rigorous classroom lessons on topics such as self-control, personal responsibility, brain growth, and perseverance. He uses many "on-the-spot" interventions designed to engage students and connect with their personal interests. Use these practical, research-based ideas to ensure all of your students are intrinsically motivated to learn!

Public Examinations Examined Dec 09 2020 High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise

student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog." Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings." Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning "I am sure that *Public Examinations Examined*, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations." Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

**From Strategy to Change** Jun 02 2020 In *From Strategy to Change*-the last in a series-Daniel James Rowley comes

full circle in defining his unique vision of the strategic planning process. Written with Herbert Sherman, *From Strategy to Change* shows how to take the next step after a strategic plan has been formulated. The authors clearly show how to implement a strategic plan that will meet the myriad challenges of today's complex higher education environment and spell success for the academy. "It is amazing that while sports teams of colleges and universities meticulously plan their contests against their opponents, their institutions' administrators don't spend nearly enough time or effort in creating and implementing a strategy. Institutions of higher education seem to be missing the requisite tools to develop and activate their 'play book.' With this new age of globally available real-time information, it becomes increasingly more essential to have a map to help go over and around obstacles, avoid the ever-present pitfalls, and effectively aid in selecting the best route. Rowley and Sherman provide such tools in this exciting and comprehensive new book. I wish that when I was a department chair, president of a faculty senate, and dean that this superb work was available. My function in planning would have been so much easier and more rewarding."--Barry R. Armandi, Distinguished Teaching Professor, SUNY - Old Westbury

**Incentives to Learn** Oct 26 2019 "We report results from a randomized evaluation of a merit scholarship program for adolescent girls in Kenya. Girls who scored well on academic exams had their school fees paid and received a cash grant for school supplies. Girls eligible for the scholarship showed significant gains in academic exam scores (average gain 0.12-0.19 standard deviations) and these gains persisted following the competition. There is also evidence of positive program externalities on learning: boys, who were ineligible for the awards, also showed sizeable average test gains, as did girls with low pretest scores, who were unlikely to win. Both student and teacher school attendance increased in the program schools. We discuss implications both for understanding the nature of educational production functions and for the policy debate surrounding merit scholarships"--National Bureau of Economic Research web site.

**Handbook of Research on Equity in Computer Science in P-16 Education** Jul 24 2019 The growing trend for high-quality computer science in school curricula has drawn recent attention in classrooms. With an increasingly information-based and global society, computer science education coupled with computational thinking has become

an integral part of an experience for all students, given that these foundational concepts and skills intersect cross-disciplinarily with a set of mental competencies that are relevant in their daily lives and work. While many agree that these concepts should be taught in schools, there are systematic inequities that exist to prevent students from accessing related computer science skills. The Handbook of Research on Equity in Computer Science in P-16 Education is a comprehensive reference book that highlights relevant issues, perspectives, and challenges in P-16 environments that relate to the inequities that students face in accessing computer science or computational thinking and examines methods for challenging these inequities in hopes of allowing all students equal opportunities for learning these skills. Additionally, it explores the challenges and policies that are created to limit access and thus reinforce systems of power and privilege. The chapters highlight issues, perspectives, and challenges faced in P-16 environments that include gender and racial imbalances, population of growing computer science teachers who are predominantly white and male, teacher preparation or lack of faculty expertise, professional development programs, and more. It is intended for teacher educators, K-12 teachers, high school counselors, college faculty in the computer science department, school administrators, curriculum and instructional designers, directors of teaching and learning centers, policymakers, researchers, and students.

*Gender Inequalities* May 26 2022 Gender inequality is entrenched in the cultural, political, and market systems that operate at household, community, and national levels. Overarching global changes in access to markets, climatic conditions, and the availability of natural resources intensify disparities in income, assets, and power among genders. This book explains these gender dynamics at macro and micro levels through GIS and spatial analysis. Chapter 1 provides an overview of the current role of GIS in the context of gender inequalities, how it still exists globally despite substantial national and international measures that have been taken toward gender equality. It illustrates global and country-level maps of measures of gender inequalities, such as gender equality index, access to basic education, health and life expectancy, equality of economic opportunity, and political empowerment. The global case studies provided in the consequent chapters explore the world of gender inequalities and get directly involved with some of the GIS and mapping applications. Chapter 2 investigates how GIS can be adapted for the criminal justice response to domestic violence (DV) and to eliminate gender-based violence. Chapter 3 discusses

applying GIS and spatial analysis to the prevalence and incidence mapping of intimate partner violence (IPV) and geospatial factors that influence help-seeking and resource availability. Chapter 4 discusses the spatial disparity of gender-representation across industry types in the United States. Chapter 5 explores the social and environmental injustice experienced by female migrant workers at Guiyu town, China, in the context of both environmental pollution and governance. Chapter 6 presents a social vulnerability index to identify spatial patterns of social vulnerability and gender inequalities among Mexican households. Chapter 7 presents the United States' opioid crisis over the past two decades and analysis of mortality by gender, race, age, and urbanicity. Chapter 8 discusses the commitment to "leave no one behind" as the heart of the 2030 Agenda for Sustainable Development and identifies inequalities among women and girls by mapping multiple deprivations in Pakistan. Chapter 9 discusses the long-standing challenges in establishing gender parity in the transportation workforce in the United States. Chapter 10 presents a study that utilizes geospatial statistical tools and state-level admission data to examine gender inequalities in higher-education enrollment in Nigeria and investigates the key factors on enrollment. This book fosters engagement with the newest mapping and GIS application in contemporary issues regarding gender inequalities and nurtures recognition of how institutional global, everyday, and intimate spaces are inherently gendered, classed, raced, and sexualized. It demonstrates the spatiality of the politics of gender difference, and the contributions of GIS and spatial analysis to the struggles for equality and social justice. A unique work that Lays out a step-by-step approach to identify relevant GIS applications, spatial methods, data collection, and mapping techniques for gender inequalities research Has a strong international and global perspective. The author is well-informed in global perspectives Investigates the patterns/processes and indicators driving gender inequality at various temporal scales and at comparably detailed resolutions Illustrates finer-scale case studies, appropriate for local programs and interventions, as well as global scale studies contributing to international and national-level policy discussions on gender inequality Since gender inequality is a research area that is very wide and with strands into many academic traditions, this book is aimed at different and diverse academics/research. It is written for geographers, public health practitioners, sociologists, epidemiologists, criminologists, politicians, economists, environmentalists, GIScientists, and health and research professionals interested in applying GIS and spatial analysis to the study of gender

inequalities.

**Vygotsky in the Classroom** Sep 25 2019 An edited collection of original essays by teacher educators, Vygotsky in the Classroom shows teachers how to apply Vygotsky's ideas to literacy instruction and assessment. New Pedagogical Challenges in the 21st Century Nov 19 2021 The societies of the twenty-first century are subject to social, cultural, political, and economic changes. In this context, the school is asked to educate the future citizens in the present. To respond to this kaleidoscopic reality, the school is immersed in a pedagogical revolution. In this book, the reader will find a selection of avant-garde research works from different disciplines and contexts, which have their epicenter in the school and in the faculties of education. New issues in pedagogy and education, and new roles of teachers and students, are discussed in a global and diverse context. And new methodological and formative proposals are also proposed to build the ideal school and the ideal teacher, from the initial and continuous teacher training.

**Science Education in Countries Along the Belt & Road** Oct 07 2020 This book aims to highlight science education in countries along the Belt and Road. It consists of 30 chapters divided into three main parts, namely Arab and African countries, Asian countries and European countries,. We invited science education experts from 29 “Belt and Road” countries to introduce the current status of science education in their countries and the new requirements with the rapid evolution of Information Technology. The major contributions of this book include: 1) Provide the current status of science education in countries along the Belt and Road as well as the requirement for developing and improving science education in these countries; 2) Discuss new insights of science education in future years; 3) Inspire stakeholders to take effective initiatives to develop science education in countries along the Belt and Road.

**Higher Education Leadership and Governance in the Development of the Creative and Cultural Industries in Kenya** Feb 20 2022 The role of higher education in establishing structures and procedures in society and industry is clearly articulated in scholarly discussions. The narrative has recently taken a new momentum in Kenya with acknowledgement of the creative industry involves many youth, as an area that impacts on the economy. In

unravelling the link between higher education and industry, the authors focus on leadership and governance in higher education and its expected and perceived contribution to the shaping of the creative industry. Through analysis of cases, the authors interrogate the processes and structures that govern the teaching and practice of the creative subjects, noting how these affect the creative industry in Kenya. This book approaches the creative disciplines from the perspectives of the students, lecturers and university administrators. The three voices provide a balanced view of what higher creative arts education in Kenya is. The multiple authorship of the book further provides a balanced account of the development of these disciplines in higher education, and their growth in industry. The key concepts here are the development of the creative industry and how higher education should contribute to the same.

*Implementation of the Millennium Development Goals* Jun 26 2022 This book brings together results of studies on progresses and challenges in the implementation of the Millennium Development Goals (MDGs) in Lesotho, Kenya, Botswana, Madagascar, Tanzania, Ghana, Uganda and Nigeria. The authors focus on selected goals as cases; and the book presents resulting lessons that can inform the post-2015 development agenda. The studies are against the background that in September 2000, world leaders from 189 countries, including 147 Heads of State, gathered at the United Nations General Assembly to consider the challenges of the new millennium. They adopted the Millennium Declaration, which set out a vision for inclusive and sustainable globalization: UN 2000 (A/RES/55/2). The leaders pledged to work towards ensuring that conditions of extreme poverty are eradicated wherever they existed. To realise this declaration, the UN established eight MDGs to be achieved by 2015. The goals were broken down into 18 concrete targets and 48 indicators to track progresses in implementation. For the years lost 2000, countries in sub-Saharan Africa have been striving to achieve the goals. So far, some have achieved some of the goals, and the results toward the rest of the goals are also by and large positive, though off-target.

Refugees, Immigrants, and Education in the Global South May 14 2021 The unprecedented human mobility the world is now experiencing poses new and unparalleled challenges regarding the provision of social and educational services throughout the global South. This volume examines the role played by schooling in immigrant incorporation or exclusion, using case studies of Thailand, India, Nepal, Hong Kong/PRC, the Philippines, the United Arab Emirates, Jordan, Kenya, Egypt, South Africa, Senegal, Sudan, Mexico, and the Dominican Republic. Drawing on key concepts in anthropology, the authors offer timely sociocultural analyses of how governments manage increasing diversity and how immigrants strategize to maximize their educational investments. The findings have significant implications for global efforts to expand educational inclusion and equity.
