The Tide Between Us Nov 28 2019 1821: After the landlord of Lugdale Estate in Kerry is assassinated, young Art O'Neill's innocent father is hanged and Art is deported to the cane fields of Jamaica as an indentured servant. On Mangrove Plantation he gradually acclimatizes to the exotic country and unfamiliar customs of the African slaves, and achieves a kind of contentment. When the new heirs to the plantation arrive from Ireland they resurrect the ghosts of brutal injustices against Art. He bides his time and hides his abhorrence from his owners. During those years he prospers, he sees his coloured children freed after emancipation, he owns land and his family thrive. Eventually he is promised seven gold coins when he finishes his service, but he doubts his master will part with the coins. One hundred years later in Ireland, a skeleton is discovered beneath a fallen tree on the grounds of Lugdale Estate. By its side is a gold coin minted in 1870. Ysult, the owner of the estate, watches as events unfold, fearful of the long-buried truths that may emerge about her family's past and its links to the slave trade. As the skeleton gives up its secrets, Ysult realises she too can no longer hide.

When We Lost Our Heads Dec 30 2019 The #1 national bestseller "Marvelous . . . viciously funny and acutely intelligent" (Maclean's), *When We Lost Our Heads* is the spellbinding story of two young women whose friendship is so intense it not only threatens to destroy them, it changes the course of history. Marie Antoinette is the charismatic, spoiled daughter of a sugar baron. At age twelve, with her pile of blond curls and unparalleled sense of whimsy, she's the leader of all the children in the Golden Mile, the affluent strip of nineteenth-century Montreal where powerful families live. Until one day in 1873, when Sadie Arnett, dark-haired, sly and brilliant, moves to the neighbourhood. Marie and Sadie are immediately inseparable. United by their passion and intensity, they attract and repel each other in ways that set them both on fire. Marie, with her bubbly charm, sees all the pleasure of the world, whereas Sadie's obsession with darkness is all-consuming. Soon, their childlike games take on the thrill of danger and then become deadly. Forced to separate, the girls spend their teenage years engaging in acts of alternating innocence and depravity, until a singular event unites them once more, with devastating effects. After Marie inherits her father's sugar empire and Sadie disappears into the city's gritty underworld, the working class begins to foment a revolution. Each woman will play an unexpected role in the events that upend their city—the only question is whether they will find each other once more. From the beloved Giller Prize-shortlisted author who writes "like a sort of demented angel with an uncanny knack for metaphor" (Toronto Star), *When We Lost Our Heads* is a page-turning novel that explores gender and power, sex and desire, class and status, and the terrifying strength of the human heart when it can't let someone go.

The mechanics of short selling are relatively simple, yet virtually no one, including most professionals, knows how to sell short correctly. In *How to Make Money Selling Stocks Short*, William J. O'Neil offers you the information needed to pursue an effective short selling strategy, and shows you--with detailed, annotated charts--how to make the moves that will ultimately take you in the right direction. Presents sub-strategies for buying pocket pivots and gap-ups Includes a market direction timing model, as well as updated tools for selling stocks short Provides an "inside view" of the authors' experiences as proprietary, internal portfolio managers at William O'Neil + Company, Inc. from 1997-2005 Detailing technical information and the trading psychology that has worked so well for them, *Trade Like an O'Neil Disciple* breaks down what every savvy money manager, trader and investor needs to know to profit enormously in today's stock market.

Short-Selling with the O'Neil Disciples Sep 30 2022 Leave the old paradigm behind and start safeguarding your portfolio *Short Selling with the O'Neil Disciples* is a guide to optimizing investment performance by employing the unique strategies put forth by William O'Neil. The authors traded these strategies with real money, then refined them to reflect changing markets and conditions to arrive at a globally-relevant short-selling strategy that helps investors realize maximum profit. Readers will learn how short selling recognizes the life-cycle paradigm arising from an economic system that thrives on 'creative destruction,' and has been mischaracterized as an evil enterprise when it is simply a single component in smart investing and money management. This informative guide describes the crucial methods that preserve gains and offset declines in other stocks that make up a portfolio with more of an intermediate- to long-term investment horizon, and how to profit outright when markets begin to decline. Short-selling is the act of identifying a change of trend in a stock from up to down, and seeking to profit from that change by riding the stock to the downside by selling the stock while not actually owning it, with the idea of buying the stock back later at a lower price. This book describes the methods that make short-selling work in today's markets, with expert advice for optimal practice. Learn the six basic rules of short-selling Find opportunities on both the long and short sides of stocks Practice refined methods that make short-selling smarter Examine case studies that profitably embody these practices

Investors able to climb out of the pessimistic, conspiratorial frame of mind that fixates on the negative will find that short selling can serve as a practical safeguard that will protect the rest of their portfolio. With clear guidance toward the techniques relevant in today's markets, *Short Selling with the O'Neil Disciples* is an essential read.

Walking Methods Jun 23 2019 This book introduces and critically explores walking as an innovative method for doing social research, showing how its sensate and kinaesthetic attributes facilitate connections with lived experiences, journeys and memories, communities and identities. The book situates walking methods historically, sociologically, and in relation to biographical and arts-based research, as well as new work on mobilities, the digital, spatial, and the sensory. The book is organised into three sections: theorising; experiencing; and imagining walking as a new method for doing biographical research. There is a key focus upon the Walking Interview as a Biographical Method (WIBM) on the move to usefully explore migration, memory, and urban landscapes, as part of participatory, visual, and ethnographic research with marginalised communities and artists and as re-formative and transgressive. The book concludes with autobiographical walks taken by the authors and a discussion about the future of the walking interview as biographical method. *Walking Methods* combines theory with a series of original ethnographic and participatory research examples. Practical exercises and a guide to using walking as a method help to make this a rich resource for social science researchers, students, walking artists, and biographical researchers.

Twenty years ago, reporting for a routine magazine piece about the infamous Manson murders, journalist Tom O'Neill didn't expect to find anything new. agents? Why did the police make these particular mistakes and why did Tom's greatest ally in this fight turn into his biggest foe? Chaos is an explosive read that will shock, grip and change our understanding of a case that has haunted the world for over fifty years. _____

The Operator May 15 2021 This instant New York Times bestseller—"a jaw-dropping, fast-paced account" (New York Post) recounts SEAL Team Operator Robert O'Neill's incredible four-hundred-mission career, including the attempts to rescue "Lone Survivor" Marcus Luttrell and abducted-by-Somali-pirates Captain Richard Phillips, and which culminated in the death of the world's most wanted terrorist—Osama bin Laden. In *The Operator*, Robert O'Neill describes his idyllic childhood in Butte, Montana; his impulsive decision to join the SEALs; the arduous evaluation and training process; and the even tougher gauntlet he had to run to join the SEALs' most elite unit. After officially becoming a SEAL, O'Neill would spend more than a decade in the most intense counterterror effort in US history. For extended periods, not a night passed without him and his small team recording multiple enemy kills—and though he was lucky enough to survive, several of the SEALs he'd trained with and fought beside never made it home. "Impossible to put down...The Operator is unique, surprising, a kind of counternarrative, and certainly the other half of the story of one of the world's most famous military operations...In the larger sense, this book is about...how to be human while in the very same moment dealing with death, destruction, combat" (Doug Stanton, New York Times bestselling author). O'Neill describes the nonstop action of his deployments in Iraq and Afghanistan, evokes the black humor of years-long combat, brings to vivid life the lethal efficiency of the military's most selective units, and reveals details of the most celebrated terrorist takedown in history. This is "a riveting, unvarnished, and wholly unforgettable portrait of America's most storied commandos at war" (Joby Warrick).

The Shame Machine Apr 25 2022 'With moral clarity and powerful storytelling, Cathy O'Neil reverse engineers the 'shame machine,' revealing its inner workings and inciting nothing short of a cultural reckoning that has the potential to blow this machine to bits' - Ruha Benjamin Shame is being weaponized by governments and corporations to attack the most vulnerable. It's time to fight back Shame is a powerful and sometimes useful tool. When we publicly shame corrupt politicians, abusive celebrities, or predatory corporations, we reinforce values of fairness and justice. But as best-selling author Cathy O'Neil argues in this revelatory book, shaming has taken a new and dangerous turn. It is increasingly being weaponized -- used as a way to shift responsibility for social problems from institutions to individuals. Shaming children for not being able to afford school lunches or adults for not being able to find work lets us off the hook as a society. After all, why pay higher taxes to fund programmes for people who are fundamentally unworthy? O'Neil explores the machinery behind all this shame,

showing how governments, corporations and the healthcare system capitalize on it. There are damning stories of rehab clinics, reentry programs, drug and diet companies, and social media platforms -- all of which profit from 'punching down' on the vulnerable. Woven throughout *The Shame Machine* is the story of O'Neil's own struggle with body image and her recent weight-loss surgery, which awakened her to the systematic shaming of fat people seeking medical care. With clarity and nuance, O'Neil dissects the relationship between shame and power. Whom does the system serve? How do current incentive structures perpetuate the shaming cycle? And, most important, how can we all fight back?

The Princess Revolt Mar 25 2022 Disney's Twisted Tales meets the *Half Upon a Time* trilogy in this "lively" (School Library Journal) first book of a new fantasy series following a young girl who discovers that fairy tale characters are real when she becomes the target of vindictive princesses who want their Happily Ever Afters. Cia Anderson hasn't slept in ten days, but she doesn't feel one bit tired. She knows that something is up, even if no one but her best friend believes her. Hundreds of pairs of shoes have appeared in her locker, small woodland animals are trailing her, and the only boy she's ever had a crush on has been quarantined with a mysterious illness. There's even talk of closing her middle school. Something strange is going on. Cia discovers that she has accidentally upset some fairy tale characters who are trying to find their happily ever afters in the modern world. Desperate to set things right, Cia enlists the help of Cinderella's stepsister, gets kidnapped by Snow White's dwarves, and makes a deal that she might regret with the Evil Queen—all while trying to stay one step ahead of the furious princesses who want her dead. Turns out there's nothing meaner than a fairy tale character who can't find her prince charming.

Weapons of Math Destruction May 27 2022 NEW YORK TIMES BESTSELLER • A former Wall Street quant sounds the alarm on Big Data and the mathematical models that threaten to rip apart our social fabric—with a new afterword "A manual for the twenty-first-century citizen . . . relevant and urgent."—Financial Times NATIONAL BOOK AWARD LONGLIST • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • The Boston Globe • Wired • Fortune • Kirkus Reviews • The Guardian • Nature • On Point We live in the age of the algorithm. Increasingly, the decisions that affect our lives—where we go to school, whether we can get a job or a loan, how much we pay for health insurance—are being made not by humans, but by machines. In theory, this should lead to greater fairness: Everyone is judged according to the same rules. But as mathematician and data scientist Cathy O'Neil reveals, the mathematical models being used today are unregulated and uncontestable, even when they're wrong. Most troubling, they reinforce discrimination—propping up the lucky, punishing the downtrodden, and undermining our democracy in the process. Welcome to the dark side of Big Data.

The Architecture of O'Neil Ford Aug 06 2020 O'Neil Ford (1905-1982) was the most influential Texas architect of the twentieth century. A technological innovator who bridged Texas' rural past and urban future, he taught three generations of architects how to adapt vernacular forms and materials to modern conditions. Widely known for his many projects in San Antonio and Dallas, Ford also designed buildings from Laredo, Texas, to Saratoga

Springs, New York, over the course of a sixty-year career. In this book, David Dillon undertakes the first critical study of Ford's architecture in both its regional and national contexts. In particular, Dillon explores Ford's links to the regional and eclectic movements of the 1920s and 1930s, his use of postwar technology and materials (lift-slab, pre-stressed concrete shells, new metals), and his influence on other architects in Texas and the Southwest. Quotes from the author's wide-ranging interviews with O'Neil Ford in the last years of his life, as well as with his partners, relatives, friends, and critics, give the text firsthand vividness.

Waste Jun 15 2021 Waste is one of the planet's last great resource frontiers. From furniture made from up-cycled wood to gold extracted from computer circuit boards, artisans and multinational corporations alike are finding ways to profit from waste while diverting materials from overcrowded landfills. Yet beyond these benefits, this "new" resource still poses serious risks to human health and the environment. In this unique book, Kate O'Neill traces the emergence of the global political economy of wastes over the past two decades. She explains how the emergence of waste governance initiatives and mechanisms can help us deal with both the risks and the opportunities associated with the hundreds of millions - possibly billions - of tons of waste we generate each year. Drawing on a range of fascinating case studies to develop her arguments, including China's role as the primary recipient of recyclable plastics and scrap paper from the Western world, "Zero-Waste" initiatives, the emergence of transnational waste-pickers' alliances, and alternatives for managing growing volumes of electronic and food wastes, O'Neill shows how waste can be a risk, a resource, and even a livelihood, with implications for governance at local, national, and global levels.

Environmental Values May 03 2020 We live in a world confronted by mounting environmental problems; increasing global deforestation and desertification, loss of species diversity, pollution and global warming. In everyday life people mourn the loss of valued landscapes and urban spaces. Underlying these problems are conflicting priorities and values. Yet dominant approaches to policy-making seem ill-equipped to capture the various ways in which the environment matters to us. Environmental Values introduces readers to these issues by presenting, and then challenging, two dominant approaches to environmental decision-making, one from environmental economics, the other from environmental philosophy. The authors present a sustained case for questioning the underlying ethical theories of both of these traditions. They defend a pluralistic alternative rooted in the rich everyday relations of humans to the environments they inhabit, providing a path for integrating human needs with environmental protection through an understanding of the narrative and history of particular places. The book examines the implications of this approach for policy issues such as biodiversity conservation and sustainability. Written in a clear and accessible style for an interdisciplinary audience, this volume will be ideal for student use in environmental courses in geography, economics, philosophy, politics and sociology.

By Women Possessed Nov 08 2020 Celebrated for their books on Eugene O'Neill and enjoying access to a trove of previously sealed archival material, the Gelbs deliver their final volume on the stormy life and brilliant oeuvre of this Nobel Prize-winning American playwright. This is a tour through both a magical moment in American theater and the troubled life of a genius. Not a peep show or a celebrity gossip fest, this book is a brilliant investigation of the emotional knots that ensnared one of our most important playwrights. Handsome, charming when he wanted to be: O'Neill was the flame women were drawn to—all, that is, except his mother, who never let him forget he was unwanted. *By Women Possessed* follows O'Neill through his great successes, the failures he was able to shrug off, and the long eclipse, a twelve-year period in which, despite the Nobel, nothing he wrote was produced. But ahead lay his greatest achievements: *The Iceman Cometh* and *Long Day's Journey into Night*. Both were ahead of their time and both received lukewarm receptions. It wasn't until after his death that his widow, the keeper of the flame, began a fierce and successful campaign to restore his reputation. The result is that today, just over 125 years after his birth, O'Neill is a towering presence in the theater, his work—always in performance here and abroad—still electrifying audiences. Perhaps of equal importance, he is the acknowledged father of modern American theater, the man who paved the way for the likes of Arthur Miller, Tennessee Williams, Edward Albee, and a host of others. But, as Williams has said, at a cost: "O'Neill gave birth to the American theater and died for it."

Terry O'Neill: Every Picture Tells a Story Mar 13 2021 * Features some of Terry O'Neill's most well-known and iconic images from more than 50 years behind the camera* O'Neill reveals the stories behind his most iconic images, from the morning he spent with Faye Dunaway at the pool in Beverly Hills, to walking around Vegas with Sean Connery dressed as James Bond, and a chance encounter with Bruce Springsteen on the Sunset Strip "I was walking up the Miami Beach boardwalk to the Fontainebleau Hotel where Sinatra was staying... I just reached out with the letter in my hand and he took it. He opened it, read it... turned to his security men and said, "this kid's with me." I never found out what Ava said to him in that letter. From that moment on, I was part of his inner circle." - Terry O'Neill

From The Beatles to the Rolling Stones, Terry O'Neill fast became the photographer of the 1960s. Having an eye - and ear - for music and musicians, he instinctively knew what bands to focus on. And they in turn trusted him. "I remember sitting in a pub with the Beatles and the Stones. We were just hanging-out and talking about what we'd do next, after all of this was over. By this, we meant the fame, being the 'new kids of the moment'. Usually, this sort of celebrity doesn't last. Little did we know that 60 years later, we'd still be at it." Music lead O'Neill to Hollywood and working with stars resulted not only in to memorable moments but long-lasting friendships. He traveled with Frank Sinatra. Took Raquel Welch to the beach. Went in the ring with Ali. Put The Who in a cage. O'Neill captured many of the most unforgettable faces from the frontline of fame, and his photographs exude his own brand of serene simplicity, intimate behind-the-scene moments and the rare quality of trust between photographer and subject. The list of people Terry O'Neill has worked with over the past 60 years is a Who's Who in celebrity; from film to music, sports to politics. *Terry O'Neill: Every Picture Tells a Story* is

like going through a walking tour of memory by a man who has seen, met and photographed them all.

Welcome to Hell World Jun 03 2020 When Luke O’Neil isn’t angry, he’s asleep. When he’s awake, he gives vent to some of the most heartfelt, political and anger-fueled prose to power its way to the public sphere since Hunter S. Thompson smashed a typewriter’s keys. Welcome to Hell World is an unexpurgated selection of Luke O’Neil’s finest rants, near-poetic rhapsodies, and investigatory journalism. Racism, sexism, immigration, unemployment, Marcus Aurelius, opioid addiction, Iraq: all are processed through the O’Neil grinder. He details failings in his own life and in those he observes around him: and the result is a book that is at once intensely confessional and an energetic, unforgettable condemnation of American mores. Welcome to Hell World is, in the author’s words, a “fever dream nightmare of reporting and personal essays from one of the lowest periods in our country in recent memory.” It is also a burning example of some of the best writing you’re likely to read anywhere.

Connecting Museums Feb 21 2022 Connecting Museums explores the boundaries of museums and how external relationships are affected by internal commitments, structures and traditions. Focusing on museums' relationship with health, inclusion, and community, the book provides a detailed assessment of the alliances between museums and other stakeholders in recent years. With contributions from practitioners and established and early-career academics, this volume explores the ideas and practices through which museums are seeking to move beyond what might be called one-off contributions to society, to reach places where the museum is dynamic and facilitates self-generation and renewal, where it can become not just a provider of a cultural service, but an active participant in the rehabilitation of social trust and democratic participation. The contributors to this volume provide conceptual critiques and clarification of a number of key ideas which form the basis of the ethics of museum legitimacy, as well as a number of reports from the front line about the experience of trying to renew museums as more valuable and more relevant institutions. Providing internal and external perspectives, Connecting Museums presents a mix of applied and theoretical understandings of the changing roles of museums today. As such, the book should be of interest to academics, researchers and students working in the broad fields of museum and heritage studies, material culture, and arts and museum management.

Swing and a Hit Jul 17 2021 INSTANT NEW YORK TIMES BESTSELLER! The fun and fiery memoir of All Star Yankee and five-time World Champion, Paul O'Neill. In SWING AND A HIT, O'Neill elaborates on his most important hitting principles, lessons, and memories—exploring those elements across ten chapters (to align with the nine innings of a baseball game and one extra inning). Here, O'Neill, with his intense temperament, describes what he did as a hitter, how he adjusted to pitchers, how he boosted his confidence, how he battled with umpires (and water coolers), and what advice he would give to current hitters. O'Neill has always been a tough out at the plate. Recalling how he started to swing at bat as a two-year-old and kept swinging it professionally until he was thirty-eight, O'Neill provides constant insights into the beauty and frustration of playing baseball. The legendary Ted Williams said using a round bat to hit a round ball is the most difficult thing to do in sports. Naturally, O'Neill, who once received a surprise call from Williams that was filled with hitting advice, agrees. SWING AND A HIT features O'Neill's most thoughtful revelations and offers clubhouse stories from some of the biggest names in Major League Baseball—hitters, managers, and teammates like Joe Torre, Derek Jeter, Don Mattingly, Pete Rose, and Bernie Williams. Remember, O'Neill, ever the perfectionist, was the type of hitter who believed that pitchers didn't ever get him out. For that incredible reason and so many others, SWING AND A HIT is essential reading for any baseball fan.
