**The Global Reach of EU Law** May 26 2022 The EU strives to be a leading rule-making organisation with global reach in both economic and non-economic fields. But how should we understand the science behind this? This book focuses upon unpacking the

uncertainty, the form and directions of the global reach of EU law, as a distinctive form of post-national rule-making. The work examines two central themes: the conceptual development of the global reach and effects of EU law; and the methodology of EU rule-making processes. It considers what specific impact and effects the EU's rules are having, and its approach to global reach. The book studies the EU's Area of Freedom, Security and Justice (AFSJ) as a case of a non-economic field offering examples of ways and means in which the global reach of EU law can manifest itself in an evolving and sensitive field. Using this casestudy, the book develops a sharper focus upon the 'internal' and 'external' elements of EU law which make up our understanding of the global reach of EU law and develops further

why global reach is important as a scientific phenomenon. The book will be a valuable resource for researchers and students in the areas of EU law, global governance and the study of law beyond the nation state.

The very limited power to issue sanctions has often been deemed a gap in the EC legal order. Over the years, the situation has progressively changed. The Union's institutional setting is growing in complexity and a variety of agencies has been or is expected to be endowed with law enforcement responsibilities. In addition, the so-called competence creep has led the EU to play an increasingly prominent role in several areas of EU law enforcement, including the issuing of sanctions. This book examines these developments, focusing on both the general features of the EU legal order and the analysis of key-substantive areas, such as banking and monetary union, environmental law, and data protection. The work thus presents a general framework for understanding EU sanctioning based on structural features and general legal principles. Part I develops an analytical framework, tracking the most significant evolutive patterns of EU sanctioning powers. Part II adopts a more practical approach focusing on specific issues and policy areas. The book bridges a gap in existing literature and sheds new light on the relationship between the exercise of jus puniendi and the evolution of EU integration.

### **The Democratisation of EU International Relations Through EU Law** Jun 22 2019

Since the entry into force of the Treaty of Lisbon, key improvements have occurred in the democratisation of EU international relations through the increased powers of the European Parliament. Nevertheless, a comprehensive legal analysis of the new developments in democratic control of EU external action has not yet been performed. This book aims to improve the understanding of the set of mechanisms through which democratic control is exerted over EU external action, in times of

profound transformations of the legal and political architecture of the European integration process. It analyses the role of the Court of Justice in the democratisation of international relations through EU law, and further provides a legal overview of the role of the European Parliament in the conduct of the EU's international relations. In those areas where the powers of the Parliament have greatly increased the book aims to raise questions as to whether this enhanced position has contributed to a more consistent external action. At the same time, the book aims to contribute to the debate on judicial activism in connection with the democratisation of EU external action. It offers the reader a detailed and topical analysis of the recent developments in democratic control of external action which are of relevance in the daily practice of EU external relations lawyers, including the topic of mixed agreements. This text will be of key interest to scholars and students working on EU external relations law, EU institutional law, European Union studies/politics, international relations, and more broadly to policy-makers and practitioners, particularly to those with an interest on the European Parliament and the Court of Justice of the European Union.

**The Treaty on European Union (TEU)** Aug 05 2020 The major Commentary on the Treaty on European Union (TEU) is a European project that aims to contribute to the development of ever closer conceptual and dogmatic standpoints with regard to the creation of a

“Europeanised research on Union law”. This publication in English contains detailed explanations, article by article, on all the provisions of the TEU as well as on several Protocols and Declarations, including the Protocols No 1, 2 and 30 and Declaration No 17, having steady regard to the application of Union law in the national legal orders and its interpretation by the Court of Justice of the EU. The authors of the Commentary are academics from ten European states and different legal fields, some from a constitutional law background, others experts in the field of international law and EU law professionals. This should lead to more unity in European law notwithstanding all the legitimate diversity. The different traditions of constitutional law are reflected and mentioned by name thus striving for a common framework for European constitutional law.

[The Principle of Equality in EU Law](#) Nov 07 2020 This book provides a comprehensive and updated legal analysis of the equality principle in EU law. To this end, it argues for a broad definition of the principle, which includes not only its inter-individual dimension, but also the equality of the Member States before the EU Treaties. The book presents a collection of high-quality academic and expert contributions, which, in light of the most recent developments in implementing the post-Lisbon legal framework, reflect the current interpretation of the equality principle, examining its performance in practice with a view to

suggesting possible solutions in order to overcome recurring problems. To this end the volume is divided into three Parts, the first of which addresses a peculiar aspect of the EU equality that is mostly overlooked in the investigations devoted to this topic, namely, equality among States. Part II shifts to the inter-individual dimension of equality and explores some major developments contributing to (re)shaping the global framework of EU anti-discrimination law, while Part III undertakes a more practical investigation devoted to the substantive strands of that area of EU law.

**The Greening of European Business under EU Law** Oct 07 2020 The relationship between environmentally sustainable development and company and business law has emerged in recent years as a matter of major concern for many scholars, policy-makers, businesses and nongovernmental organisations. This book offers a conceptual analysis of the principles of sustainable development and environmental integration in the EU legal system. It particularly focuses on Article 11 of the Treaty on the Functioning of the European Union (TFEU), which states that EU activities must integrate environmental protection requirements and emphasise the promotion of sustainable development. The book gives an overview of the role played by the environmental integration principle in EU law, both at the level of European legislation and at the level of Member State practice. Contributors to the volume identify and analyse

the main legal issues related to the importance of Article 11 TFEU in various policy areas of EU law affecting European businesses, such as company law, insurance and state aid. In drawing together these strands the book sets out the requirements of environmental integration and examines its impact on the regulation of business in the EU. The book will be of great use and interest to students and researchers of business law, environment law, and EU law.

**International Arbitration and EU Law** Nov 19 2021 This book examines the intersection of EU law and international arbitration based on the experience of leading practitioners in both commercial and investment treaty arbitration law. It expertly illustrates the depth and breadth of EU law's impact on party autonomy and on the margin of appreciation available to arbitral tribunals. Coverage includes: - an analysis of the relevance of EU law on the validity of international agreements to arbitrate - consideration of the impact of EU law on challenges, recognition and enforcement of international commercial awards, and the relationship between anti-suit relief, EU law and the New York Convention - a discussion of selected areas of intersection between EU law and international commercial arbitration, including the ECtHR, consumer protection, damages, competition damages, GDPR, commercial agency and others - an introduction to the complex areas in which the EU regime and international investment arbitration laws

intertwine, through a review of the development of the EU's investment policy - an examination of the impact of EU law on specific issues in international investment arbitration including the Energy Charter Treaty, procedural issues (both ICSID and non-ICSID), damages, taxation, and the proposed Multilateral Investment Court - an appraisal of the potential of International Commercial Mediation and its interrelations with EU law. *International Arbitration and EU Law* is a specialist guide for arbitrators, lawyers, judges, and expert witnesses. It will also greatly benefit academics and advanced students working, researching or teaching international arbitration law.

[Asylum Law in the European Union](#) Nov 27 2019 This book examines the rules governing the right to asylum in the European Union. Drawing on the 1951 United Nations Convention relating to the Status of Refugees, and the 1967 Protocol, Francesco Cherubini asks how asylum obligations under international refugee law have been incorporated into the European Union. The book draws from international law, EU law and the case law of the European Court of Human Rights, and focuses on the prohibition of refoulement; the main obligation the EU law must confront. Cherubini explores the dual nature of this principle, examining both the obligation to provide a fair procedure that determines the conditions of risk in the country of origin or destination, and the obligation to

respond to a possible expulsion. Through this study the book sheds light on EU competence in asylum when regarding the different positions of Member States. The book will be of great use and interest to researchers and students of asylum and immigration law, EU law, and public international law.

*The Images of the Consumer in EU Law* Dec 29 2019 This book consists of contributions exploring from different perspectives the 'images' of the consumer in EU law. The images of the consumer form the foundation for various EU policies, more or less directly oriented towards the goal of consumer protection. The purpose of the volume is to establish what visions of the consumer there are in different contexts of EU law, whether they are consistent, and whether EU law's engagement with consumer-related considerations is sincere or merely instrumental to the achievement of other goals. The chapters discuss how consumers should be protected in EU contract, competition, free movement and trade mark law. They reflect on the limits of the consumer empowerment rationale as the basis for EU consumer policy. The chapters look also at the variety of concerns consumers might have, including the cost of goods and services, access to credit, ethical questions of consumption, the challenges of excessive choice and the possibility to influence the content of regulatory measures, and explore the significance of these issues for the EU's legislative and judicial process.

[Legislative Approximation and Application of EU Law in the Eastern Neighbourhood of the European Union](#) Jul 04 2020 This book explores the exportation and application of European Union legislation beyond EU borders. It clarifies the means and instruments of the voluntary application of the EU's norms by third countries and analyses in detail the process of legislative approximation between the EU and its East European neighbours. It also assesses the extent to which the EU is successful in promoting its legal standards abroad. The first part of the book addresses the EU's mechanisms and instruments promoting the export of its own laws and practices to other countries. Key issues include the post-Lisbon constitutional basis for the EU's engagement with its Eastern neighbours (Art. 8 TEU); the different methods of acquis export and the impact of a new generation of Association Agreements providing for the establishment of Deep and Comprehensive Free Trade Areas (DCFTAs) and, ultimately, a Neighbourhood Economic Community (NEC) between the EU and its Eastern partners. The second part of the book includes substantive country reports that analyse the process of legislative approximation and application of EU law in the Eastern Partnership countries and Russia, authored by leading academics from the countries concerned. While currently these countries are not working towards full EU membership, the EU encourages them to approximate and converge their legislation with

the EU acquis. The book also offers a unique picture of current practice of the application of EU law by judiciaries in the countries of the Eastern Partnership and Russia. The book concludes with reflections on the multi-faceted character of legislative approximation and the challenges surrounding the application of EU law in the EU's Eastern neighbourhood. The conclusions reached are highly informative as to the effectiveness of present and future EU external regional policies aimed at the promotion of EU common values and EU legislation into the legal orders of third countries.

*International Arbitration and EU Law* Dec 21 2021 This book examines the intersection of EU law and international arbitration based on the experience of leading practitioners in both commercial and investment treaty arbitration law. It expertly illustrates the depth and breadth of EU law's impact on party autonomy and on the margin of appreciation available to arbitral tribunals.

General Principles of EU Law and the EU Digital Order Oct 26 2019 Digitalization of societies has important ramifications for citizens and businesses. The digital landscape is rapidly changing, whereas at the same time there are growing concerns about how market access in the EU's digital market as well as fundamental rights can be sufficiently safeguarded in the shadow of 'big data' and algorithms. This timely and important book presents expert analyses of how digitalization

raises questions of the future role for general principles of European Union (EU) law, including the foundational principles of the EU's fundamental economic freedoms and EU competition rules. Examining a number of issues revolving around the internal market, the digital single market, competition law, intellectual property, data protection, democracy and the rule of law, the contributors provide deeply informed insights of the challenges as to: effects of the technological disruption on the doctrine of general principles; the resilience of general principles in the digital society; the need to rely on new general principles in the digital society; the realization of the digital single market; the safeguarding of fundamental rights and the rule of law. The contributors are highly esteemed scholars from major European universities. A common theme is the need for judicial evolution of EU fundamental rights law in the digital era, alongside penetrating analyses of recent Court of Justice of the European Union case law on the impact of digitalization. Dealing as it does with an area of European law of particular complexity and rapidly growing importance, the anthology provides insights and knowledge about the ways in which digitalization is rapidly changing EU law. Are general principles of EU law as developed in an 'analogue world' sufficiently resilient to withstand the rapid and often disruptive developments taking place in the digital marketplace? The fresh look at the concept of 'general principles' taken by the

various contributors helps to clarify the actual application in EU law in areas related to the ongoing digitalization of our society. It will be greatly appreciated by practitioners, policymakers and academics active in any of the many fields of law affected by the digital revolution.

**The Ethical Spirit of EU Law** Jun 14 2021 This open access book seeks to identify the ethical spirit of European Union (EU) law, a context in which we can observe a trend towards increasing references to the terms 'ethics' and 'morality'. This aspect is all the more important because EU law is now affecting more and more areas of national law, including such sensitive ones as the patentability of human life. Especially when unethical behaviour produces legal consequences, the frequent lack of clearly defined concepts remains a challenge, particularly against the background of the principle of legal certainty. This raises the question to which extent the content of these references is determined and whether it is possible to identify an ethical spirit of EU law. Answering that question, in turn, entails addressing the following questions: In references to ethics concerning EU law, can we identify references to a particular theory of practical philosophy at all; and, if so, to one or more normative ethical theories (deontology, consequentialism, or virtue ethics)? Further, should these non-legal concepts be imported in an unaltered way ("absolute approach"), or be

adapted to the legal context (“relative approach”)? This book explores the different layers of EU law (primary law, agreements, secondary law, and tertiary law), including the role of ethics in EU lawmaking and in EU case law, as well as the implementation of relevant EU directives in selected Member States. In addition to the above-mentioned normative philosophical lens, the book also analyzes the findings from the legal lens of EU integration, i.e., especially EU values, human rights and the cornerstone of human dignity.

The Accountability Gap in EU law Jan 22 2022 Almost two decades ago, the fall of the Santer Commission against a background of allegations of maladministration and nepotism had the effect of placing accountability on the political agenda of the EU institutions. More recently, the non-ratification of the Constitutional Treaty, the difficulties of the ratification of the Lisbon Treaty and the current financial crisis have increased the calls for accountability in the EU. This book investigates whether any progress towards more accountability and transparency has been made in the post-Lisbon era by taking a holistic approach to the subject. Marios Costa argues that currently the EU institutions and the Member States are not in a position to hold the so-called independent agencies as well as the various committees and expert groups accountable. Despite recent progress, the EU still needs to put forward an acceptable constitutional framework which will truly

secure accountability at the EU level of governance.

The Evolution of EU Law Jun 02 2020 Previous edition, 1st, published in 1999.

**The Evolution of EU Law** Feb 08 2021 This last decade has been particularly turbulent for the EU. Beset by crises - the financial crisis, the rule of law crisis, the migration crisis, Brexit, and the pandemic - European Law has had to adapt and change in a way not previously seen. First published in 1999, the goal then was to reflect on the important developments that had been made since the creation of the EEC. That goal has not changed. From EU Administrative Law through to the Regulation of Network Industries, each chapter in this seminal work assess the legal and political forces that have shaped the evolution of EU law. With new chapters covering the Rule of Law, Judicial

Reform, Brexit, Constitutional and Legal Theory, Refugee and Asylum law, and Data Governance, this third edition of The Evolution of EU Law is a must read for any student or academic of EU law.

**EU Private Law and the CISG** Aug 17 2021 EU Private Law and the CISG examines selected EU directives in the field of private law and their effects on the national private law systems of several EU Member States and discusses certain specific concepts of the United Nations Convention on Contracts for the International Sale of Goods (CISG) in light of the CISG’s recent fortieth anniversary. The most prominent influence of EU law on national private law systems is in the area of the law of obligations, thus the book focuses on several EU private law directives that cover the issues belonging to contract and tort law, as interpreted in the case law of the Court of Justice of the EU. EU private law concepts need to be interpreted autonomously and uniformly rather than through the lens of national private law systems. The same is true for the CISG which has not only been one of the most successful instruments of the international trade law unification but had also influenced both the EU private law and domestic laws. In Part I, focused on the EU private law and its effects for national laws, chapters examine the recent Digital Content and Services Directive and its likely impact on the contract law of the UK and Ireland, the role aggressive commercial practices play in EU banking and credit

legislation, the applicability of the EU private international law rules to collective redress, the unfair contract terms regime of the Late Payment Directive and its transposition into Croatian law, the implementation of the Commercial Agency Directive in Denmark, Estonia and Germany, and disgorgement of profits as remedy provided in the Trade Secrets Directive. In Part II, dealing with selected CISG issues, chapters discuss the autonomous interpretation of CISG's concept of sale by auction and its notion of intellectual property, as well as the CISG's principle of freedom of form and the possibility for reservations with the effect of its exclusion. The book will be of interest to legal scholars in the field of EU private law and international trade law, as well as to the students, practitioners, members of law reform bodies, and civil servants in Europe, and beyond.

It also discusses free movement rights and links to the growing "Area of Freedom, Security and Justice". Finally the textbook offers fresh insights on the external dimension of EU law

The Involvement of EU Law in Private Law Relationships Jun 26 2022 The involvement of the EU in regulating private conduct and relationships between individuals is increasing. As a result, EU law affects the scope of private autonomy in ever wider contexts, sparking tensions with fundamental concepts of national private law systems. This volume offers a descriptive and normative account of the involvement of EU law in private law relationships. The recurring theme in the collected papers is the scope of policy objectives which are apt to legitimise the European Union's as yet unsystematic tendency to serve as a source of restrictions of private autonomy. The nature and purpose of the involvement of European Union law in private law relationships is investigated by the authors from both the substantive and the constitutional perspective. The papers look at such sectors regulating private law relationships as consumer law, labour law, competition law, equal treatment law and the law of remedies. While focusing on private law

relationships the authors investigate more general concepts of EU law, such as the Internal Market freedoms and general principles of law, and the different modes of ensuring the effective application of EU secondary law.

**EU Law Beyond EU Borders** Jan 28 2020 This book addresses the impact of EU law beyond its own borders, the use of law as a powerful instrument of EU external action, and some of the normative challenges this poses. The phenomenon of EU law operating beyond its borders, which may be termed its 'global reach', includes the extraterritorial application of EU law, territorial extension, and the so-called 'Brussels Effect' resulting from unilateral legislative and regulatory action, but also includes the impact of the EU's bilateral relationships, and its engagement with multilateral fora and the negotiation of

international legal instruments. The book maps this phenomenon across a range of policy fields, including the environment, the internet and data protection, banking and financial markets, competition policy, and migration. It argues that in looking beyond the undoubtedly important instrumental function of law we can start to identify the ways in which law shapes the EU's external identity and its relations with other legal regimes, both enabling and constraining the EU's external action.

**EU Law of the Overseas** Feb 29 2020 Millions of British, Dutch, French, Danish, Spanish, and Portuguese nationals permanently reside in the overseas parts of their Member States. These people, like the companies registered in such territories, often find it virtually impossible to determine what law applies when legal decisions are required. Although Article 52(1) of the EU Treaty clearly states that EU law applies in the territory of all the Member States, most Member State territories lying outside of Europe provide examples of legal arrangements deviating from this rule. This book, for the first time in English, gathers these deviations into a complex system of rules that the editor calls the 'EU law of the Overseas'. Member States' territories lying far away from the European continent either do not fall within the scope of EU law entirely, or are subject to EU law with serious derogations. A huge gap thus exists between the application of EU law in Europe and in the overseas parts of the Member States, which has not been explored in

the English language literature until now. This collection of essays sets out to correct this by examining the principles of Union law applicable to such territories, placing them in the general context of the development of European integration. Among the key legal issues discussed are the following: internal market outside of Europe; the protection of minority cultures; EU citizenship in the overseas countries and territories of the EU; Article 349 TFEU as a source of derogations; The implications of Part IV TFEU for the overseas acquis; participatory methods of

reappraisal of the relationship between the EU and the overseas; implications for the formation of strategic alliances; voting in European elections; what matters may be referred by courts and tribunals in overseas countries and territories; application of the *acquis* to the parts of the Member States not controlled by the government or excluded from *ratione loci* of EU law; interplay of the Treaty provisions and secondary legislation in the overseas; customs union; wholly internal situations; free movement of capital and direct investments in companies; the euro area outside of Europe;

duty of loyal cooperation in the domain of EU external action; territorial application of EU criminal law; and territorial application of human rights treaties. Twenty-two leading experts bring their well-informed perspectives to this under-researched but important subject in which, although rules abound and every opportunity to introduce clarity into the picture seems to be present, the situation is far from clear. The book will be welcomed by serious scholars of European Union law and by public international lawyers, as well as by policy-makers and legal practitioners.
