*The Trouble with Passion* Jun 19 2019 Probing the ominous side of career advice to "follow your passion," this data-driven study explains how the passion principle fails us and perpetuates inequality by class, gender, and race; and it suggests how we can reconfigure our relationships to paid work. "Follow your passion" is a popular mantra for career decision-making in the United States. Passion-seeking seems like a promising path for avoiding the potential drudgery of a life of paid work, but this "passion principle"—seductive as it is—does not universally translate. The Trouble with Passion reveals the significant downside of the passion principle: the concept helps culturally legitimize and reproduce an exploited, overworked white-collar labor force and broadly serves to reinforce class, race, and gender segregation and inequality. Grounding her investigation in the paradoxical tensions between capitalism's demand for ideal workers and our cultural expectations for self-expression, sociologist Erin A. Cech draws on interviews that follow students from college into the workforce, surveys of US workers, and experimental data to explain why the

passion principle is such an attractive, if deceptive, career decision-making mantra, particularly for the college educated. Passion-seeking presumes middle-class safety nets and springboards and penalizes first-generation and working-class young adults who seek passion without them. The ripple effects of this mantra undermine the promise of college as a tool for social and economic mobility. The passion principle also feeds into a culture of overwork, encouraging white-collar workers to tolerate precarious employment and gladly sacrifice time, money, and leisure for work they are passionate about. And potential employers covet, but won't compensate, passion among job applicants. This book asks, What does it take to center passion in career decisions? Who gets ahead and who gets left behind by passion-seeking? The Trouble with Passion calls for citizens, educators, college administrators, and industry leaders to reconsider how we think about good jobs and, by extension, good lives.

Ten-Minute Transformation Nov 05 2020 The average American spends about ten minutes per day in religious or spiritual activities. Do you believe you can experience a personal transformation if all you have is ten minutes a day? Or could these ten minutes be part of a more comprehensive plan for personal and global revolution? Could ten minutes be a mustard seed that God grows into something amazing? Pastor and author Chris Altrock believes it can! Rather than complain about ten minutes being too insignificant for spiritual growth, Altrock teaches practices to maximize that time for personal transformation and real social change. In only ten minutes a day over forty days, you'll learn a dozen spiritual disciplines to deepen your relationship with God. You'll also learn and see how God can use even the smallest amounts of time to change you and the world through your actions. Are you ready for ten minutes to actually make a difference?

with her fiancé, Demarco. She never imagined that her love for him would quickly be questioned once she came face to face with Triston. Triston began to show Jazara a new way of living and now her life was turned upside down. Let's just say that she was intrigued by what was being offered and she was seeing herself differently, while enjoying the way she felt. She was actually enjoying it a little too much because the lifestyle was starting to pull her in different directions that could lead to new problems. Just how will Jazara play her new relationship cards? Can she handle this new lifestyle or will other feelings cause her to question her choices. Can Triston show her enough to win her over or does Demarco win in the end? Just how INTRIGUED is she with this new lifestyle?

*Breakout Blueprint* Dec 18 2021 Many of us live in a prison of our own making. We spend our lives dreading Mondays, looking forward to paychecks, and working longer hours, only to shoulder even more responsibility. It's a never-ending chase. Life doesn't have to be that way. It's time to stop going through the motions and start living. It's time to build a business that offers you freedom. After interviewing more than 150 entrepreneurs, Doug Foley realized they all had one thing in common-and it wasn't a fancy job title, car, or house. Instead of building their lives around their businesses, they built their businesses around the lives they wanted to live. This book is your blueprint for following their lead. Using the four pillars of every successful business-passion, expertise, need, and value-Foley explains how you can break free from the typical 9-to-5 and create a deeply fulfilling career on your own terms.

way or another, it's impossible for your everything else to be totally healthy. You have tried everything your friends, your doctors, and even the advertisement industry recommended for improving your health. But nothing has worked, except to make you a frustrated person. Close your eyes right now and allow your conscious mind to contemplate your health situation. Be honest. You are not the healthiest that you can or should be. In fact, you are in dire straits according to how you feel and what your medical team says about your health. I know all of this about you because I was you so many years ago. Like you, for years I followed the same type of diet herd that you have been following. And like you, after trying everything, I had no clue about what to try next. However, I found a clue. Over forty years, I lived the importance of and learned to replicate nature's wisdom on nutrition and movement in my unhealthy lifestyle. Her focus was on naturally changing lifestyles, not on temporary quick fixes. And in the process, she provided me with all types of support to do so. I carefully recorded her step-by-step wisdom and provided the details inside. Ditch your next quick-fix cosmetic diet, and put your trust in nature's simple but trustworthy lifestyle-change wisdom.

**Passion for Work** May 11 2021 Passion is a pervasive concept in the work domain. Workers aspire to be passionate in the hope of finding meaning and satisfaction from their professional life, while employers dream of passionate employees who will ensure organizational performance. Does passion for work matter ? Does passion invariably bring about the anticipated positive outcomes or is there a darker side to passion for work that can also lead to negative outcomes for individuals and organizations? The goal of this book is to address these issues. This volume reviews major theories

of work passion, focusing specifically on the dominant theory: the Dualistic Model of Passion. This theory distinguishes between two types of passion-harmonious and obsessive- and their associated determinants and consequences. This volume provides a comprehensive understanding of passion for work by addressing the origin of the concept and its theoretical issues: how can passion for work be developed, what are the consequences to be expected at the individual and organizational levels, and how can passion for work shed new light on contemporary issues in the workplace. *Passion for Work: Theory, Research, and Applications* synthesizes a vast body of existing research in the area, provides insights into new and exciting research avenues, and explores how passion for work can be cultivated in work settings in order to fulfill both workers' and employers' hopes for a productive and satisfying work life.

*The Psychology of Passion* Apr 29 2020 Winner of the 2017 APA William James Book Award The concept of passion is one we regularly use to describe our interests, and yet there is no broad theory that can explain the development and consequences of passion for activities across people's lives. In *The Psychology of Passion*, Robert J. Vallerand presents the first such theory, providing a complete presentation of the Dualistic Model of Passion and the empirical evidence that supports it. Vallerand conceives of two types of passion: harmonious passion, which remains under the person's control, and obsessive passion, which controls the person. While the first typically leads to adaptive behaviors, the obsessive form of passion leads to less adaptive and, at times, maladaptive behaviors. Vallerand highlights the effects of these two types of passion on a number of psychological phenomena, such as cognition, emotions, performance, relationships, aggression, and violence. He also discusses the development of passion and reviews a range of literature on passion for activities.

It steps off the treadmill of consumerism and dares to seek happiness elsewhere. It values relationships, experiences, and soul-care. And in doing so, it finds life. Our world lives at a feverish pace. We are too hurried, too rushed, and too stressed. We work long, passionate hours to pay the bills, but fall deeper into debt. We rush from one activity to another—even multitasking along the way—but never seem to get everything done. It's a never-ending chase. Life doesn't have to be that way. It's time to stop going through the motions and start living. It's time to build a business that offers you freedom. After interviewing more than 150 entrepreneurs, Doug Foley realized they all had one thing in common-and it wasn't a fancy job title, car, or house. Instead of building their lives around their businesses, they built their businesses around the lives they wanted to live. This book is your blueprint for following their lead.
