The Ancient Languages of Syria-Palestine and Arabia Jan 28 2020 This book, derived from the acclaimed Cambridge Encyclopedia of the World's Ancient Languages, describes the ancient languages of Syria-Palestine and Arabia, for the convenience of students and specialists working in that area. Each chapter of the work focuses on an individual language or, in some instances, a set of closely related varieties of a language. Providing a full descriptive presentation, each of these chapters examines the writing system(s), phonology, morphology, syntax and lexicon of that language, and places the language within its proper linguistic and historical context. The volume brings together an international array of scholars, each a leading specialist in ancient language study. While designed primarily for scholars and students of linguistics, this work will prove invaluable to all whose studies take them into the realm of ancient language.

Embodiments May 02 2020 How does the body politic reflect the nature of human embodiment? To pursue this question in a new and productive way, James Mensch employs a methodology consistent with the fact of our embodiment; he uses Merleau-Ponty's concept of "intertwining"—the presence of one's self in the world and of the world in one's self—to understand the ideas that define political life. Mensch begins his inquiry by developing a philosophical anthropology based on this concept. He then applies the results of his investigation to the relations of power, authority, freedom, and sovereignty in public life. This involves confronting a line of interpretation, stretching from Hobbes to Agamben, which sees violence as both initiating and preserving the social contract. To contest this interpretation, Mensch argues against its presupposition, which is to equate freedom with sovereignty over others. He does so by understanding political freedom in terms of embodiment—in particular, in terms of the finitude and interdependence that our embodiment entails. Freedom, conceived in these terms, is understood as the gift of others. As a function of our dependence on others, it cannot exist apart from them. To show how public space and civil society presuppose this interdependence is the singular accomplishment of *Embodiments*. It accomplishes a phenomenological grounding for a new type of political philosophy.

Medical Anthropology Mar 24 2022 Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

The Enigma of Good and Evil: The Moral Sentiment in Literature May 26 2022 Striking toward peace and harmony the human being is ceaselessly torn apart in personal, social, national life by wars, feuds, inequities and intimate personal conflicts for which there seems to be no respite. Does the human condition in interaction with others imply a constant adversity? Or, is this conflict owing to an interior or external factor of evil governing our attitudes and conduct toward the other person? To what criteria should I refer for appreciation, judgment, direction concerning my attitudes and my actions as they bear on the well-being of others? At the roots of these questions lies human experience which ought to be appropriately clarified before entering into speculative abstractions of the ethical theories and precepts. Literature, which in its very gist, dwells upon disentangling in multiple perspective the peripeteia of our life-experience offers us a unique field of source-material for moral and ethical investigations. Literature brings preeminently to light the Moral Sentiment which pervades our life with others -- our existence tout court. Being modulated through the course of our experiences the Moral Sentiment sustains the very sense

of literature and of personal human life (Tymieniecka).
