**Elephant** Apr 27 2020 Do you know that the brains of an Elephant are fully developed at birth? And do you know that Elephants hear with both their ears and feet? It is sometimes difficult to make our children understand the beauty of nature, to make them appreciate the small things, the beauty of a flower, the freshness of the air, the scent of grass. Often, we are not fortunate to be in contact with nature, far from a meadow, closed in the cities. Still, so often, while looking out from our balcony in a beautiful country house, we know how to observe but do not appreciate creation's

beauty. Know the details and habits of zoo animals as common as it is surprising, through a simple path, which fuels your child's interest and curiosity. That's the purpose of this book. But beware, prepare for the challenge! You will have to be able to answer the questions that your child will ask you by showing off their deep knowledge in the microworld of the Elephant: - Mom, do you know how much the trunk on an Elephant can weigh? I do! - Hey dad, do you know what the three different types of Elephants are? I do! - Grandpa, do you know at what age Elephants develop tusks? I do! - Grandma, do

Introduction The world of elephants is a fascinating place! There is so much we can learn about them, and yet there are still mysteries about them waiting to be revealed. There may be stories you have heard about elephants. Now the question is, "Are those stores fact or fiction? Are they true or false?" One bit of information you may have heard is that elephants have a good memory. That is very true! It is so true, that it is believed that elephants have a better memory than humans do. Elephants can remember other elephants that they

may not have seen in years. They can also remember being treated unkindly by someone even though many years may have passed. Another story that is often thought about with elephants is, "Are they afraid of mice?" You might have heard that elephants fear mice because they can run up the elephant's trunk. But the answer here is that this story is not true, and there is no proof of any kind to support this. It may not surprise you know that the elephants of today are related to the Ice Age Mammoth. At one time there were over 350 different species of elephants, yet today

we have only two species left! Can you name the two species? What you may be surprised to learn is that elephants were not always the large creatures you see today. In fact, in prehistoric times, the elephant was as small as the size of a cow or pig. Would it surprise you to learn that the elephants of today are related to the sea cow known as the Manatee? Did you know that when the elephants flap their ears they do it for a reason? Or do you know what jobs the elephants use their tusks for? An elephant's tusk can be smaller on one side than the other. Do you know the reason why? Did you know that a female elephant will

spend her whole life in one herd, while the male elephant usually live their lives alone sometime after the age of 14? As you can see, there are many interesting things that can be learned about this tremendous sized animal with the ivory tusks.
