Imagining Modern Democracy Jul 09 2020 Examines democracy in the Philippines using the political thought of Jürgen Habermas. Winner of the 2016 Outstanding Scholarly Work Award for the School of Humanities presented by Ateneo de Manila University This book is a pioneering study of Philippine democracy, one of the oldest in the Asian region, vis-à-vis Habermasian critical theory. Proceeding from a concise examination of the theory of law and democracy found in Habermas's *Between Facts and Norms*, Ranilo Balaguer Hermida explains how the law occupies the central role in both the legitimation of political power and the attainment of social integration. He then discusses how Habermas proposes to resolve the tension that exists in modern society between democratic norms and social facts, through the adoption of a lawmaking procedure whereby the informal sources of issues and opinions from the public sphere are allowed to develop and interact with the formal deliberations and decision processes inside the political system. He also explores certain provisions of the present Philippine Constitution that were expressly intended to restore democratic institutions and processes destroyed by decades of martial law, as well as the problems and hindrances that stand in the way of their full implementation. Ranilo Balaguer Hermida is Associate Professor of Philosophy at the Ateneo de Manila University in the Philippines. He received his PhD in philosophy from Monash University in Australia.

The Oxford Handbook of International Law in Asia and the Pacific Mar 17 2021 The growing economic and political significance of Asia has exposed a tension in the modern international order.

Despite expanding power and influence, Asian states have played a minimal role in creating the norms and institutions of international law; today they are the least likely to be parties to international agreements or to be represented in international organizations. That is changing. There is widespread scholarly and practitioner interest in international law at present in the Asia-Pacific region, as well as developments in the practice of states. The change has been driven by threats as well as opportunities. Transnational issues such as climate change and occasional flashpoints like the territorial disputes of the South China and the East China Seas pose challenges while economic integration and the proliferation of specialized branches of law and dispute settlement mechanisms have also encouraged greater domestic implementation of international norms across Asia. These evolutions join the long-standing interest in parts of Asia (notably South Asia) in post-colonial theory and the history of international law. The Oxford Handbook of International Law in Asia and the Pacific brings together pre-eminent and emerging specialists to analyse the approach to and influence of key states of the region, as well as whether truly 'Asian' trends can be identified and what this might mean for international order.

Asian Yearbook of International Law, Volume 23 (2017) Dec 14

2020 The Yearbook aims to promote research, studies and writings in the field of international law in Asia, as well as to provide an intellectual platform for the discussion and dissemination of Asian views and practices on contemporary international legal issues.
