The Imagined Immigrant Jan 27 2022 Using original sources--such as newspaper articles, silent movies, letters, autobiographies, and interviews--Ilaria Serra depicts a large tapestry of images that accompanied mass Italian migration to the U.S. at the turn of the twentieth century. She chooses to translate the Italian concept of immaginario with the Latin imago that felicitously blends the double English translation of the word as "imagery" and "imaginary." Imago is a complex knot of collective representations of the immigrant subject, a mental production that finds concrete expression; impalpable, yet real. The "imagined immigrant" walks alongside the real one in flesh and rags.

Making Italy Anglican Jan 03 2020 For almost three hundred years there were those in England who believed that an Italian translation of the Book of Common Prayer could trigger radical

change in the political and religious landscape of Italy. The aim was to present the text to the Italian religious and political elite, in keeping with the belief that the English liturgy embodied the essence of the Church of England. The beauty, harmony, and simplicity of the English liturgical text, rendered into Italian, was expected to demonstrate that the English Church came closest to the apostolic model. Beginning in the Venetian Republic and ending with the Italian Risorgimento, the leitmotif running through the various incarnations of this project was the promotion of top-down reform according to the model of the Church of England itself. These ventures mostly had little real impact on Italian history: as Roy Foster once wrote, "the most illuminating history is often written to show how people acted in the expectation of a future that never happened." This book presents one of those histories. *Making Italy Anglican* tells the story of a fruitless encounter that helps us better to understand both the self-perception of the Church of England's international role and the cross-cultural and religious relations between Britain and Italy. Stefano Villani shows how Italy, as the heart of Roman Catholicism, was--over a long period of time--the very center of the global ambitions of the Church of England.

An Introduction to the Italian Language Jan 15 2021

Commentary and Tradition Feb 13 2021 The volume collects the most important papers Pierluigi Donini wrote in the last three decades with the aim of promoting a better assessment of post-hellenistic philosophy. By focusing on the mutual confrontation with Plato's and Aristotle's texts for the development of both Aristotelianism and Platonism, Donini's papers provide the readers with an overall account of the philosophy of the commentators and argue for its importance for the history of the European thought.

Governance and Constitutionalism Jun 27 2019 This collection studies the rise of neutral bodies as a challenge to the constitutional paradigm of the nation state. Administrative entities such as commissions, agencies, councils, authorities or 'independent agencies' as they are sometimes known, are relatively autonomous from majoritarian democratic control and by their institutional design fall outside the classical triad of powers or branches of government. They may even fall outside the confines of the nation state itself as with the EU Commission. The book is divided into

theoretical-historical and empirical parts. Part I approaches the phenomenon through the rigorous normative conceptual lens of constitutionalism and constitutional law, questioning the implications of political neutrality on inherited normative categories, both at national and supranational level. Part II comprises case-studies reflecting the full spectrum of theoretical frameworks and concerns developed and explored by the theory-oriented chapters in the first part. The work explores a wide range of issues including the balance between autonomy, legitimacy and accountability, the taxonomy of agencies, the role and limits of expertise as a paramount justification for independence, 'agentification' as a result of internationalisation, and 'agentification' as a reflex and consequence of transnational polity-building within the EU.

Le Rime di Messer Francesco Petrarca, con note, etc. [With a dedication signed, N. N.] Jul 29 2019

*Vesuvius Sep 10 2020 VESUVIUS 2000 is an interdisciplinary project aimed at producing a safe and prosperous habitat for the people living around Vesuvius. To produce this environment requires an effective collaboration between the experts and the public, whereby the danger from the volcano is used to reorganize the territory and thus produce new opportunities for the people surrounding the volcano. As an all inclusive physico-mathematical-computer model of the volcano, the Global Volcanic Simulator is a key tool for determining the effects of different eruption scenarios and thus for urban planning of the territory. Unlike the evacuation plans which tend to manage emergencies, VESUVIUS 2000 aims at preparing the Vesuvius area to confront future eruptions with minimal socio-economic and cultural consequences. * Addresses volcanic risk mitigation in densely populated area surrounding Vesuvius * Provides education about volcanos * Displays physical modeling of eruption processes and integration of models*
