Emotional Design Sep 22 2021 Why attractive things work better and other crucial insights into human-centered design Emotions are inseparable from how we humans think, choose, and act. In *Emotional Design*, cognitive scientist Don Norman shows how the principles of human psychology apply to the invention and design of new technologies and products. In *The Design of Everyday Things*, Norman made the definitive case for human-centered design, showing that good design demanded that the user's must take precedence over a designer's aesthetic if anything, from light switches to airplanes, was going to work as the user needed. In this book, he takes his thinking several steps farther, showing that successful design must incorporate not just what users need, but must address our minds by attending to our visceral reactions, to our behavioral choices, and to the stories we want the things in our lives to tell others about ourselves. Good human-centered design isn't just about making effective tools that are straightforward to use; it's about making affective tools that mesh well with our emotions and help us express our identities and support our social lives. From roller coasters to robots, sports cars to smart phones, attractive things work better. Whether designer or consumer, user or inventor, this book is the definitive guide to making Norman's insights work for you.

Breaking Emotional Barriers to Healing Jul 21 2021 Far too many Christians are waiting, hoping, and praying for healing, but either it doesn't last or it doesn't come at all. Doctors shrug and say there is nothing they can do. Pastors say it is your sin or attacks of the devil that blocks your healing. This only leaves people more helpless, hopeless, afraid, ashamed, and still sick or in pain. Craig Miller experienced his own miraculous physical healing, and he has dedicated his life to helping others receive the permanent emotional and physical restoration that is available through the healing power of God. Craig ministers to the spirit and soul to identify root causes that block your healing. He lends particular focus to cases in which no cause of an illness can be identified and what to do when healing does not occur. He provides easy-to-use, step-by-step practical methods that are viable, available, affordable, and effective at bringing real solutions to long-term pain and suffering. And he includes real-life examples of healing testimonies.

Draw on Your Emotions Nov 24 2021 Draw on Your Emotions is a bestselling resource to help people of all ages express, communicate and deal more effectively with their emotions through drawing. Built around five key themes, each section contains a simple picture exercise with clear objectives, instructions and suggestions for development. The picture activities have been carefully designed to help ease the process of both talking about feelings and exploring life choices, by trying out alternatives safely on paper. This will help to create clarity and new perspectives as a step towards positive action. Offering a broad range of exercises which can be adapted for any ability or age from middle childhood onwards, this unique book explores a range of emotions surrounding a person's important life experiences, key memories, relationships, best times, worst times and who they are as a person. This is an essential resource for therapists, educators, counsellors and anyone who engages other people in conversations that matter about their relationship to self, others and life in general. This revised and updated second edition also contains a new section on how to use the superbly emotive *The Emotion Cards* (9781138070981) to facilitate deeper therapeutic conversations.

Stress Induced Neural Changes in Emotional Disorders Jun 19 2021

Emotional Appeals in Advertising Banking Services Sep 10 2020 Taking into consideration the global financial crisis, the current challenges of competition and open banking, and the looming threat of Brexit, this book explores the implications of using emotional appeals in financial services advertising.

Measuring Country Image Aug 10 2020 Alexander Buhmann develops a new model for measuring the constitution and effects of country images by combining well-established concepts from national identity theory and attitude theory with a recent model from reputation management. The model is operationalized and tested in two surveys. Results show how different cognitive and affective dimensions of the country image affect each other and ultimately lead to the facilitation of behavioral intentions. The book introduces a theory-grounded approach to clarify the dimensionality of the country image. It is the first to operationalize and test the dimensions of the country image by combining formative and reflective measures in a mixed-specified model.

Emotional Memory Across the Adult Lifespan Mar 29 2022 Though many factors can influence the likelihood that we remember a past experience, one critical determinant is whether the experience caused us to have an emotional response. Emotional experiences are more likely to be remembered than nonemotional ones, and over the past couple of decades there has been an increased interest in understanding how emotion conveys this memory benefit. This book begins with a broad overview of emotion, memory, and the neural underpinnings of each, providing the reader with an appreciation of the complex interplay between emotion and memory. It then examines how emotion influences young adults' abilities to store information temporarily, or over the long term. It explains emotion's influence on the memory processes that young adults use consciously and on the processes that guide young adults' preferences and actions without their awareness. This book then moves on to describe how each of these influences of emotion are affected by the aging process, and by age-related disease, providing the reader with a lifespan perspective of emotional memory. Within each of the domains covered, the book integrates research from cognitive psychology, cognitive neuroscience, and neuropsychological perspectives, examining both the behavioral and thought processes that lead to emotion's effects on memory and also the underlying brain processes that guide those influences of emotion. This book will be of interest to researchers and graduate students in memory, emotion, and aging, working in the fields of cognitive psychology, cognitive or affective neuroscience, and developmental or lifespan psychology.

Toward the Image of Tammuz and Other Essays on Mesopotamian History and Culture Feb 13 2021 In this volume, William L. Moran has collected seventeen of Jacobsen's widely scattered essays. Dealing with religion, history, culture, government, economics, and grammar, these pieces are representative of all aspects of Jacobsen's work, but stress his studies in history and religion, the fields in which he made his most important contributions to our knowledge of Mesopotamian culture and the origins of Western civilization. Moran has also included a bibliography of and a lexical index to Jacobsen's writings.

Emotional Engineering, Vol.7 Jun 07 2020 This book demonstrates that emotion is a highly influential component in creating a new society and new engineering, revealing the importance of emotion in various aspects of the Connected World. It addresses a wide variety of topics, but with this one underlying aim throughout. Further, it stands out for the approach it takes to the Internet of Things and the Connected Society. The contributing authors illustrate that humans are essentially either playmakers or playing managers, with teamwork and play being crucial aspects of our lives. They argue that strategy is becoming increasingly important, and consider the most adaptable strategy, one that will allow us to respond to today's quickly and radically changing situations. The book is particularly focused on the Connected Society as the point of departure, and explores what motivates humans, what decisions they should make, and what actions they should take. With engineering quickly moving from product development to experience development, and the role of emotion in engineering becoming increasingly apparent, this book offers a timely and valuable resource for engineers and researchers alike.

Empathy: A Quantum Approach – The Psychological Influence of Emotion Dec 26 2021 This textbook, written by bestselling author and metaphysicist Dr. Theresa M. Kelly, offers you straightforward, honest explanations of psychological empathy through new research initiatives in parapsychology, psychology, neuroscience, quantum mechanics, and related subjects for a semi-technical audience. Whether you are an intelligent layperson or professional curious about empathy, or looking to discover how to utilize empathy, this textbook will provide a detailed framework, without complicated equations, onto which more advanced concepts can be applied. For students of Empathic Studies, this textbook will be a revelation of what actions and influences you are involved in and exactly how you can take your empathic ability to a completely new level step-by-step. (Includes: Models, Definitions, Descriptions, Techniques, and Therapeutic and Experimental Practical Applications.) A Textbook of the University of Alternative Studies.

A Cultural History of the Emotions in the Age of Romanticism, Revolution, and Empire Mar 05 2020 Between 1780 and 1920, modern conceptions of emotion-conceptions still very much present in the 21st century-first took shape. This book traces that history, charting the changing meaning and experience of feelings in an era shaped by political and market revolutions, romanticism, empiricism, the rise of psychology and psychoanalysis. During this period, the word emotion itself gained currency, gradually supplanting older vocabularies and visions of feeling. Terms to describe feelings changed; so too did conceptions of emotions' proper role in politics, economics, and culture. Political upheavals turned a spotlight on the role of feeling in public life; in domestic life, sentimental bonds gained new importance, as families were transformed from productive units to emotional ones. From the halls of parliaments to the familial hearth, from the art museum to the theatre, from the pulpit to the concert hall, lively debates over feelings raged across the 19th century.

Conjugate Gaze Somato-Emotional Release A Novel Approach to Physiotherapeutic Mind-Body Therapy Mar 17 2021 Conjugate Gaze Somato-Emotional Release is a novel approach in the release of repressed mind-body traumas. The Conjugate Gaze approach works toward facilitating central nervous system processing through the activation of the hypothalamic limbic axis, and the use of specific reflex contacts and verbal cues. Such diverse topics as "the psychic space" and "the alternate psyche" will open new avenues in the treatment of somato-emotional disorders.

Music and Soulmaking Nov 12 2020 Explores new avenues in music therapy. The author discusses connections between music therapy and theorizes that every little nuance found in nature is part of a dynamic system in motion.

Handbook of Research on Supporting Social and Emotional Development Through Literacy Education Dec 02 2019 The social and emotional welfare of students in both K-12 and higher education settings has become increasingly important during the third decade of the 21st century, as students face a variety of social-emotional learning (SEL) challenges related to a multitude of internal and external factors. As concepts around traditional literacy education evolve and become more culturally and linguistically relevant, the connections between SEL and academic literacy opportunities warrant considerable exploration. The Handbook of Research on Supporting Social and Emotional Development Through Literacy Education develops a conceptual framework around pedagogical connections to social and emotional teaching and learning within K-12 literacy practices. This text provides a variety of research and practice protocols supporting student success through the integration of SEL and literacy across grade levels. Covering topics such as culturally relevant literacy, digital literacy, and content-area literacy, this handbook is essential for curriculum directors, education faculty, instructional facilitators, literacy professionals, practicing teachers, pre-service teachers, professional development coordinators, school counselors, teacher preparation programs, academicians, researchers, and students.

Images of Human Nature Apr 05 2020 In this volume Donald Munro, author of important studies on early and contemporary China, provides a critical analysis of the doctrines of the Sung Neo-Confucian philosopher Chu Hsi (1130-1200). For nearly six centuries Confucian orthodoxy was based on Chu Hsi's commentaries on Confucian classics. These commentaries were the core of the curriculum studied by candidates for the civil service in China until 1905 and provided guidelines both for personal behavior and for official policy. Munro finds the key to the complexities of Chu Hsi's thought in his mode of discourse: the structural images of family, stream of

water, mirror, body, plant, and ruler. Furthermore, he discloses the basic framework of Chu Hsi's ethics and the theory of human nature that is provided by these illustrative images. As revealed by Munro, Chu Hsi's thought is polarized between family duty and a broader altruism and between obedience to external authority and self-discovery of moral truth. To understand these tensions moves us toward clarifying the meaning of each idea in the sets. The interplay of these ideas, selectively emphasized over time by later Confucians, is a background for explaining modern Chinese thought. In it, among other things, Confucianism and Marxism-Leninism co-exist. Originally published in 1988. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Ecology and Conservation of the Maned Wolf Sep 03 2022 Wolves are controversial figures worldwide and much effort has focused on how to conserve them while addressing public concerns. With its solitary habits and fruit-eating diet, the endangered maned wolf roams the South American grasslands and swamps, playing a vital part in maintaining biodiversity hotspots. Compared to the grey wolf, little is known about its relationship with local people and the environment and the reasons for its decline, making research about this unique species an urgent concern. *Ecology and Conservation of the Maned Wolf: Multidisciplinary Perspectives* gathers the work of leading researchers from diverse disciplines and countries, covering up-to-date research on the biology, ecology, and conservation of the maned wolf. It presents innovative insights that can benefit conservation strategies and offers perspectives for the future of the species. The book is divided into three parts. Part I explains the general issues concerning the maned wolf: population viability, the relationship between maned wolves and people, and the management of captive maned wolves. It also reviews current aspects of species biology, including conservation genetics, feeding ecology, social structure and reproduction, and conservation medicine. Part II contains case studies that present knowledge gathered from conservation programs and field research in all countries where the species is currently found—Brazil, Uruguay, Argentina, Bolivia, and Paraguay. Part III offers perspectives from diverse fields of research, exploring the challenges and opportunities connecting maned wolf conservation efforts with those of its habitat and of other endangered species. This includes education and communication tools, the application of human dimensions research to maned wolf conservation, ethnoconservation perspectives, and the ecological and socioeconomic challenges to the conservation of the cerrado habitat.

Emotional Blueprint: A Book of Transformation, Discover Your Inner Voice and Achieve Success in All Aspects of Life: Spiritual Growth, Awak Jul 29 2019 INTRODUCTION This book is about our emotions and expanding the spectrum of existence. This book will take you on a journey of spiritual awakening toward spiritual growth through emotional transformation. We will talk about love, energy, light, and joy, as well as magic, transformation, the shadow, black holes, consciousness, and alternate dimensions. We will also discuss God, nature, freedom, evolution, language, frequency, music, healing, and among other things; the mystery which unites everything within a dynamic existence. This is a spiritual book of spiritual awakening and spiritual growth. There are many wisdom books on self-care, energy healing, positive energy, healing vibration, and transcendence. What makes this transcendence book unique is the way in which it engages the reader toward emotional success through discovering his or her inner voice. This is a book of joy, a transformation book. Through this book you will learn how to cultivate your inner voice and transform your life to live with meaning and purpose. You will learn about the stages in the cycle of elevation and the complementary forces which guide us to discover our unique emotional blueprint. *PORTRAITS OF TIME* A picture shows you what was; a mirror shows you what is; a dream reveals what could be; while relationships expand all possibilities. Do not read the pages of this book the same way you would look at a picture. Do not mimic the messages within like you would gaze into a mirror. Do not get lost in the fantasy of a dream which could be. Apply the concepts you find useful in this book to discover your potential, your inner voice. Connect to the source of your energy—the motivation behind your inner voice—so you may discover your unique emotional blueprint. The source of your energy will reveal the purpose you were born to share with the world. Your purpose is the gift that will broaden the experience of this gift we call life. A picture, a mirror, and a dream are all images, perceptions and projections of the past, present, and future. The limitation these three aspects of time share is a visage of inaction. Action is what is required, what is necessary to transform vision into reality. Don't sit around and contemplate the words of this book or the philosophy of its teachings. On our journey toward spiritual growth, spiritual awakening, and emotional success, we must maintain a joyful vibration which aligns with transcendence. Our consciousness must dream, but above all—we must Act. A consciousness book, a book of joy would encourage nothing less than the courage to act. Experience what could be by manifesting your dreams into reality. True vision creates and produces purpose. Purpose is revealed by no other means than action. What you do, what you set into motion through decisive action is what reflects purpose in your life. Life can add up to cheap thrills or valuable experiences. Our actions will dictate a life of substance or of insignificance. We create our pictures, we look into the mirror every day and we dream of something which will resonate within us as meaning, yet we will never experience this connection or cultivate a relationship with our purpose if we do not act. We mustn't hide in the safety and security of neutrality or mediocrity; we must risk it all in the face of adversity and rejection with the will to overcome any and all obstacles so our purpose and greatness may be revealed. It's only when we merge with our meaning that we are able to accept the past, understand the present and integrate the future to form an elevated vision of purpose, a purpose which compels us into action toward a perpetual dream. A transcendent voyage: The cycle of elevation. Discover the four stages of the cycle of elevation and discover your inner voice. Accept, understand, integrate, and elevate.

679 Mental Triggers to Heal the Invisible Effects of Childhood Emotional Neglect Dec 14 2020 The Miracle! In this book Nicholas presents you a practical, very simple, detailed method of how to Heal the Invisible Effects of Childhood Emotional Neglect. You will feel the effects immediately and the results will appear very quickly! So it was in my case. The order of words is extremely important for every book written by Nicholas. These are arranged to be traversed in a certain way so as to eliminate certain blockages in the human being, blockages that are bringing disease or failure on various plans. You don't need a big chunk of your time or expensive programs. Everything is extremely simple! Health, money, prosperity, abundance, safety, stability, sociability, charisma, sexual vitality, erotic attraction, will, optimism, perseverance, self-confidence, tenacity, courage, love, loving relationships, self-control, self-esteem, enthusiasm, refinement, intuition, detachment, intelligence, mental calm, power of concentration, exceptional memory, aspiration, transcendence, wisdom, compassion. By reading this book, you will feel totally that life deserves to be lived and enjoyed every moment and that everything that you propose for yourself becomes easy for you to fulfill. Nicholas will guide you to touch your longed-for dream and will make you see life from a new perspective, full of freshness and success. This book helps you step by step, in a natural way, in just 3 minutes a day, to change your misguided way of thinking and to Heal the Invisible Effects of Childhood Emotional Neglect. (NOTE: For good, Nicholas keep the price of the book as lower as he can, even if it is a hard work behind this project. A significant portion of the earnings from the sale of the book are used for these purposes: for charity, volunteer projects, nature restoration, and other inspired ideas to do good where it is needed. If you can not afford to buy the book please contact Nicholas and he will give you a free copy.) You, also have a bonus in the pages of the book that makes you live your success by doing a seemingly trivial thing. You will feel the difference. Yes. The Miracle is possible! Get Your Copy Now!

Insights in Child and Adolescent Psychiatry: 2021 Oct 31 2019

Voices from Criminal Justice Sep 30 2019 *Voices from Criminal Justice*, Second Edition, gives students rich insight into the criminal justice system from the point of view of practitioners, as well as outsiders—citizens, clients, jurors, probationers, or inmates. These qualitative and teachable articles cover all three components of the criminal justice system, ensuring students will be better informed about the daily realities of criminal justice professionals in law enforcement, courts, and corrections. At the same time, the juxtaposition of insider and outsider views allows students to look beyond the actual content of the articles and develop their own views about the functions and flaws of the criminal justice system on a societal level. This innovative reader, now with seven new articles designed to stimulate discussions and promote critical thought, is perfect for undergraduate criminal justice courses in the United States, and has proven to be an effective companion or alternative to traditional introductory textbooks. *Voices from Criminal Justice*, Second Edition, also offers a framework for more advanced students in special issues or capstone courses to synthesize information from earlier courses and develop their own view of American justice.

Images in Social Media Jul 01 2022 This book focuses on the methodologies, organization, and communication of digital image collection research that utilizes social media content. ("Image" is here understood as a cultural, conventional, and commercial-stock photo-representation.) The lecture offers expert views that provide different interpretations of images and their potential implementations. Linguistic and semiotic methodologies as well as eye-tracking research are employed to both analyze images and comprehend how humans consider them, including which salient features generally attract viewers' attention. This literature review covers image-specifically photographic-research since 2005, when major social media platforms emerged. A citation analysis includes an overview of co-citation maps that demonstrate the nexus of image research literature and the journals in which they appear. Eye tracking tests whether scholarly templates focus on the proper features of an image, such as people, objects, time, etc., and if a prescribed theme affects the eye movements of the observer. The results may point to renewed requirements for building image search engines. As it stands, image management already requires new algorithms and a new understanding that involves text recognition and very large database processing. The aim of this book is to present different image research areas and demonstrate the challenges image research faces. The book's scope is, by necessity, far from comprehensive, since the field of digital image research does not cover fake news, image manipulation, mobile photos, etc.; these issues are very complex and need a publication of their own. This book should primarily be useful for students in library and information science, psychology, and computer science.

The Cornhill Magazine Jun 27 2019

Driving Customer Appeal Through the Use of Emotional Branding May 19 2021 The value of advertising has always been an effective way to increase consumerism among customers. Through the use of emotional branding, companies and organizations can now target new and old patrons while building a strong relationship with them at the same time, to ensure future sales. *Driving Customer Appeal Through the Use of Emotional Branding* is a critical scholarly resource that examines the responses consumers have to differing advertising strategies, and how these reactions impact sales. Featuring relevant topics such as multisensory experiences, customer experience management, brand hate, and product innovation, this publication is ideal for CEOs, business managers, academicians, students, and researchers that are interested in discovering more effective and efficient methods for driving business.

Handbook of Therapeutic Imagery Techniques Jul 09 2020 Consists of a description of a multitude of imagery techniques that have been grouped into four categories: hypo-behavioral, cognitive-behavioral, psychodynamic/humanistic and humanistic/transpersonal.

Psychological and Biological Approaches To Emotion May 31 2022 The outgrowth of a University of Chicago conference on the psychological and biological bases of behavior, this unique collection of papers integrates the biological consideration of emotion with current psychological approaches. As such, it includes studies of the coping process associated with emotion as well as those that focus on the appraisal process giving rise to emotion. The book approaches emotion from cognitive, developmental, and biological systems and psychopathological perspectives. Theories on the cognitive, biological, and developmental bases for interpreting, representing, and reacting to emotional situations are proposed. In addition, new studies on issues and questions regarding the roles of cognition, language, brain lateralization, socialization, psychopathology, and coping with affect are presented.

Wilfred Bion, Thinking, and Emotional Experience with Moving Images Nov 05 2022 Wilfred Bion's theories of dreaming, of the analytic situation, of reality and everyday life, and even of the contact between the body and the mind offer very different, and highly fruitful, perspectives on lived experience. Yet very little of his work has entered the field of visual culture, especially film and media studies. Kelli Fuery offers an engaging overview of Bion's most significant contribution to psychoanalysis—his theory of thinking—and demonstrates its relevance for why we watch moving images. Bion's theory of thinking is presented as an alternative model for the examination of how we experience moving images and how they work as tools which we use to help us 'think' emotional experience. 'Being Embedded' is a term used to identify and acknowledge the link between thinking and emotional experience within the lived reception of cinema. It is a concept that everyone can speak to as already knowing, already having felt it—being embedded is at the core of lived and thinking experience. This book offers a return to psychoanalytic theory within moving image studies, contributing to the recent works that have explored object relations psychoanalysis within visual culture (specifically the writings of Klein and Winnicott), but differs in its reference and examination of previously overlooked, but highly pivotal, thinkers such as Bion, Bollas and Ogden. A theorization of thinking as an affective structure within moving image experience provides a fresh avenue for psychoanalytic theory within visual culture. Wilfred Bion, Thinking, and Emotional Experience with Moving Images will appeal to psychoanalysts and psychoanalytic psychotherapists, as well as scholars and students of film and media studies, cultural studies and cultural sociology and anthropology, visual culture, media theory, philosophy, and psychosocial studies.

Mr. Sorkin Goes to Washington Feb 02 2020 Before the unprecedented televised presidential debates of 1960, most Americans were able to relate to their leaders in little more than an historical context. In the era of televised elections, however, the media have allowed Americans to witness the paternal, moral and intellectual qualities of their president up close. Television has been so critical to this process of political socialization that, for many Americans, the televised image of the president is the president. As the acclaimed television drama *The West Wing* demonstrates, fictional representations of the presidency can also be significant civic

forces. This book examines how film and television drama contribute to shaping the presidency and the way most Americans understand it, and particularly the processes of political education. The text discusses The West Wing's didactic potential, its representation of White House politics, and its depiction of race and gender, with commentary on how fictional representations of the presidency become important elements of American political consciousness.

Self Control in Society, Mind, and Brain Apr 17 2021 This book presents social, cognitive and neuroscientific approaches to the study of self-control, connecting recent work in cognitive and social psychology with recent advances in cognitive and social neuroscience. In bringing together multiple perspectives on self-control dilemmas from internationally renowned researchers in various allied disciplines, this is the first single-reference volume to illustrate the richness, depth, and breadth of the research in the new field of self control.

Perception of Self in Emotional Disorder and Psychotherapy Apr 29 2022 One's view of self has pervasive and significant effects socially, psychologically, and even biologically. Regardless of theoretical differences, most psychotherapists agree that perception of self in one way or another profoundly impacts emotional satisfaction, behavioral adaptation, and rational thinking. Self-acceptance has played a major role in almost every major theory of personality. Despite its recognized importance over the years, only recently has the perception of self received vigorous research attention as a central variable in the development and maintenance of psychological dysfunction and as a mediating mechanism in effecting psychological change. Several lines of evidence point to the importance of self-perception in emotional disorder and psychotherapy. Feelings of inadequacy and unworthiness are frequently cited complaints among persons seeking psychological help. People with low self-esteem see themselves as helpless and inferior. They feel incapable of improving their situation. They fail to evidence the requisite inner resources or coping abilities for tolerating the stress of their life situation. The ability to be involved in healthy intimate relationships, to engage in successful career performance, to experience satisfactory sexual functioning, or to maintain effective mood management are all subject to disruption as a result of inconsistent and impaired self-appraisal.

Dynamic Emotional Communication Feb 25 2022 This eBook aims to deepen our understanding of emotional communication by introducing "dynamic" perspectives. Facial and bodily expressions of emotion functions as indispensable communicative signals for human beings. People decode the emotional information conveyed by facial/bodily expressions and use this to coordinate cooperative or competitive social relationships. Experimental psychological research has long investigated these important means of emotional communication. However, this was typically done by using static stimuli of facial/bodily expressions to assess the detection and interpretation of emotions. This paradigm was also adopted in neuropsychological, neuropsychological, and neuroimaging studies. Although researchers accumulated valuable information regarding the psychological and neural mechanisms underlying these processes, the static nature of the stimuli may have resulted in important phenomena remaining unexamined. Recently, scientists have begun to explore dynamic emotional communication, in particular by using dynamic facial/bodily expressions of emotion, instead of static photographs, as stimuli. This is having important consequences for emotion research. As dynamic emotional expressions have increased ecological validity and as there are differences in the visual processing of dynamic and static information, a host of novel aspects of the psychological and neural processing of emotional expressions have been elucidated. For example, it has been shown that motor resonance and the recruitment of motor areas are fundamental to dynamic emotional communication. Researchers have also started to investigate the encoding of dynamic emotional interactions and have clarified the messages embedded in the temporal aspects and the patterns of reciprocal inter-individual coordination. Moreover, investigations of dynamic emotional communication have identified heretofore unrecognized impairments in the social functioning of individuals with psychiatric disorders, such as autism spectrum disorder and schizophrenia.

The Oxford Handbook of Emotion, Social Cognition, and Problem Solving in Adulthood Jan 15 2021 Over the last decade, the field of socio-emotional development and aging has rapidly expanded, with many new theories and empirical findings emerging. This trend is consistent with the broader movement in psychology to consider social, motivational, and emotional influences on cognition and behavior. The Oxford Handbook of Emotion, Social Cognition, and Problem Solving in Adulthood provides the first overview of a new field of adult development that has emerged out of conceptualizations and research at the intersections between socioemotional development, social cognition, emotion, coping, and everyday problem solving. This field roundly rejects a universal deficit model of aging, highlighting instead the dynamic nature of socio-emotional development and the differentiation of individual trajectories of development as a function of variation in contextual and experiential influences. It emphasizes the need for a cross-level examination (from biology and neuroscience to cognitive and social psychology) of the determinants of emotional and socio-emotional behavior. This volume also serves as a tribute to the late Freda Blanchard-Fields, whose thinking and empirical research contributed extensively to a life-span developmental view of emotion, problem solving, and social cognition. Its chapters cover multiple aspects of adulthood and aging, presenting developmental perspectives on emotion; antecedents and consequences of emotion in context; everyday problem solving; social cognition; goals and goal-related behaviors; and wisdom. The landmark volume in this new field, The Oxford Handbook of Emotion, Social Cognition, and Problem Solving in Adulthood is an important resource for cognitive, developmental, and social psychologists, as well as researchers and graduate students in the field of aging, emotion studies, and social psychology.

Emotional Intelligence 101 Oct 24 2021 Key Features --

Liberation Practices Oct 04 2022 Liberation psychology is an approach that aims to understand wellbeing within the context of relationships of power and oppression, and the sociopolitical structure in which these relationships exist. Liberation Practices: Towards Emotional Wellbeing Through Dialogue explores how wellbeing can be enhanced through dialogue which challenges oppressive social, relational and cultural conditions and which can lead to individual and collective liberation. Taiwo Afuape and Gillian Hughes have brought together a variety of contributors, from a range of mental health professions and related disciplines, working in different settings, with diverse client groups. Liberation Practices is a product of multiple dialogues about liberation practices, and how this connects to personal and professional life experience. Contributors offer an overview of liberation theories and approaches, and through dialogue they examine liberatory practices to enhance emotional wellbeing, drawing on examples from a range of creative and innovative projects in the UK and USA. This book clearly outlines what liberation practices might look like, in the context of the historical development of liberation theory, and the current political and cultural context of working in the mental health and psychology field. Liberation Practices will have a broad readership, spanning clinical psychology, psychotherapy and social work.

The Zones of Regulation Oct 12 2020 "... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

Semiotic Rotations Aug 22 2021 The title of our volume on interdisciplinary semiotics is situated in a geographical metaphor and points to the possibility of uncovering meanings through shifting perspectives as well as to the possibility of understanding how these various modes of meaning are articulated and framed in particular cultural instances. Regardless of medium, semiotic rotations permit play between the surface and underlying levels of a communication, reveal the relationship between open and closed systems of signification, and modulate shades of meaning caught between the visible and invisible. Readerly play in these sets of apparent oppositions reveals that the less each pairing is held to be a coupling of oppositions and the more they are observed through perspectives gained by semiotic rotations, then the more complex and rich the modes of meaning may become.

Exploring the Emotional Life of the Mind May 07 2020 This highly innovative new book reconsiders the structure of basic emotions, the self and the mind. It clinically covers mental disorders, therapeutic interventions, defense mechanisms, consciousness and personality and results in a comprehensive discussion of human responses to the environmental crisis. For openers, a novel psychodynamic model of happiness, sadness, fear and anger is presented that captures their object relational features. It offers a look through the eyes of these specific emotions and delineates how they influence the interaction with other persons. As regulation of the emotional state is the core task of the self, dysregulation can lead to mental disorders. Clinical cases of post-traumatic stress disorder, obsessive compulsive disorder and depression are discussed, using the model to outline the emotional turbulence underneath. Finally, the elaborated theory is used to analyse personal responses to the environmental crisis and political strategies that capitalise on them. This book will appeal to scholars, psychotherapists and psychiatrists with an interest in emotions and who wish to challenge their own implicit theory of emotion with an explicit new model. It will also be of interest for academic researchers and professionals in fields where emotional processes play a pivotal role.

Social and Emotional Development in Infancy and Early Childhood Jan 03 2020 Research is increasingly showing the effects of family, school, and culture on the social, emotional and personality development of children. Much of this research concentrates on grade school and above, but the most profound effects may occur much earlier, in the 0-3 age range. This volume consists of focused articles from the authoritative Encyclopedia of Infant and Early Childhood Development that specifically address this topic and collates research in this area in a way that isn't readily available in the existent literature, covering such areas as adoption, attachment, birth order, effects of day care, discipline and compliance, divorce, emotion regulation, family influences, preschool, routines, separation anxiety, shyness, socialization, effects of television, etc. This one volume reference provides an essential, affordable reference for researchers, graduate students and clinicians interested in social psychology and personality, as well as those involved with cultural psychology and developmental psychology. Presents literature on influences of families, school, and culture in one source saving users time searching for relevant related topics in multiple places and literatures in order to fully understand any one area Focused content on age 0-3 save time searching for and wading through lit on full age range for developmentally relevant info Concise, understandable, and authoritative for immediate applicability in research

Grammatology of Images Jan 27 2022 Grammatology of Images radically alters how we approach images. Instead of asking for the history, power, or essence of images, Sigrid Weigel addresses imaging as such. The book considers how something a-visible gets transformed into an image. Weigel scrutinizes the moment of mis-en-apparition, of making an appearance, and the process of concealment that accompanies any imaging. Weigel reinterprets Derrida's and Freud's concept of the trace as that which must be thought before something exists. In doing so, she illuminates the threshold between traces and iconic images, between something immaterial and its pictorial representation. Chapters alternate between general accounts of the line, the index, the effigy, and the cult-image, and case studies from the history of science, art, politics, and religion, involving faces as indicators of emotion, caricatures as effigies of defamation, and angels as embodiments of transcendental ideas. Weigel's approach to images illuminates fascinating, unexpected correspondences between premodern and contemporary image-practices, between the history of religion and the modern sciences, and between things that are and are not understood as art.

Handbook of Sleep Research Aug 02 2022 Handbook of Sleep Research, Volume 30, provides a comprehensive review of the current status of the neuroscience of sleep research. It begins with an overview of the neural, hormonal and genetic mechanisms of sleep and wake regulation before outlining the various proposed functions of sleep and the role it plays in plasticity, and in learning and memory. Finally, the book discusses disorders of sleep and waking, covering both lifestyle factors that cause disrupted sleep and psychiatric and neurological conditions that contribute to disorders. Emphasizes a comparative and multidisciplinary approach to the topic of sleep Covers the neurobiology and physiology of sleep stages, mechanisms of waking, and dreaming Discusses in detail the proposed functions of sleep, from health and rest, to memory consolidation and synaptic plasticity Examines the current state of research in mammalian and non-mammalian species, ranging from primates to invertebrates
