Concepts of Biology Nov 07 2020 Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Giving Up the Ghost Jun 14 2021 New York Times bestselling author Hilary Mantel, two-time winner of the Man Booker Prize, is one of the world's most accomplished and acclaimed fiction writers. Giving Up the Ghost, is her dazzling memoir of a career blighted by physical pain in which her singular imagination supplied compensation for the life her body was denied. Selected by the New York Times as one of the 50 Best Memoirs of the Past 50 Years "The story of my own childhood is a complicated sentence that I am always trying to finish, to finish and put behind me." In postwar rural England, Hilary Mantel grew up convinced that the most extraordinary feats were within her grasp. But at nineteen, she became ill. Through years of misdiagnosis, she suffered patronizing psychiatric treatment and destructive surgery that left her without hope of children. Beset by pain and sadness, she decided to "write herself into being"—one novel after another. This wry and

visceral memoir will certainly bring new converts to Mantel's dark genius. "Mesmerizing."—The New York Times
