The Old Man and the Sea Sep 22 2019 "The Old Man and the Sea" by Ernest Hemingway. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

World Without Fish Oct 28 2022 "Can you imagine a world without fish? It's not as crazy as it sounds. But if we keep doing things the way we've been doing things, fish could become extinct within fifty years. So let's change the way we do things!" Announcing the paperback edition of *World Without Fish*, the uniquely illustrated narrative nonfiction account—for kids—of what is happening to the world's oceans and what they can do about it. Written by Mark Kurlansky, the bestselling author of *Cod*, *Salt*, *The Big Oyster*, and many other books, *World Without Fish* has been praised as "urgent" (*Publishers Weekly*) and "a wonderfully fast-paced and engaging primer on the key questions surrounding fish and the sea" (Paul Greenberg, author of *Four Fish*). It has also been included in the New York State Expeditionary Learning English Language Arts Curriculum. Written by a master storyteller, *World Without Fish* connects all the dots—biology, economics, evolution, politics, climate, history, culture, food, and nutrition—in a way that kids can really understand. It describes how the fish we most commonly eat, including tuna, salmon, cod, swordfish—even anchovies— could disappear within fifty years, and the domino effect it would have: the oceans teeming with jellyfish and turning pinkish orange from algal blooms, the seabirds disappearing, then reptiles, then mammals. It describes the back-and-forth dynamic of fishermen, who are the original environmentalists, and scientists, who not that long ago considered fish an endless resource. It explains why fish farming is not the answer—and why sustainable fishing is, and how to help return the oceans to their natural ecological balance. Interwoven with the book is a twelve-page full-color graphic novel. Each beautifully illustrated chapter opener links to the next to form a larger fictional story that perfectly complements the text.

Fish, Fishing and the Meaning of Life Apr 29 2020 Jeremy Paxman has created the perfect literary catch for fellow angling enthusiasts in this rich and varied anthology. Ten thoroughly entertaining themed chapters include 'Ones That Got Away', 'Ones That Didn't Get Away' and 'Fish That Bit Back'. Each is introduced by Paxman's own sharp, humorous observations and features both contemporary and historical writing about fishing in

prose and verse, covering everything from tench tickling to piranha attacks. Some pieces are well known favourites, others are obscure, every one is a delight. 'A superb compilation because it roams from carp to cod, trout to tarpon and does not regurgitate the same old clippings. Paxman has clearly read widely and wisely in putting this together ... probably the definitive anthology of angling writing.' Keith Elliott, Independent on Sunday.

My Life in the Fish Tank Dec 06 2020 From the acclaimed author of *Maybe He Just Likes You* and *Halfway Normal* comes a "compassionate...touching" (Donna Gephart, award-winning author of *The Paris Project*) and powerful story of learning how to grow, change, and survive. When twelve-year-old Zinnia Manning's older brother Gabriel is diagnosed with a mental illness, the family's world is turned upside down. Mom and Dad want Zinny, her sixteen-year-old sister, Scarlett, and her eight-year-old brother, Aiden, to keep Gabriel's condition "private"—and to Zinny that sounds the same as "secret." Which means she can't talk about it with her two best friends, who don't understand why Zinny keeps pushing them away, turning everything into a joke. It also means she can't talk about it during Lunch Club, a group run by the school guidance counselor. How did Zinny get stuck in this weird club, anyway? She certainly doesn't have anything in common with these kids—and even if she did, she'd never betray her family's secret. The only good thing about school is science class, where cool teacher Ms. Molina has them doing experiments on crayfish. And when Zinny has the chance to attend a dream marine biology camp for the summer, she doesn't know what to do. How can Zinny move forward when Gabriel—and, really, her whole family—still needs her help?

And Then the World Blew Up Sep 03 2020 This collection is an intellectual punch in the face to the new political order. What do you get when you cross a fistful of pens and an enormous stack of blank paper with somebody who resents the sweet-smelling muzzle of good manners and polite conversation, who delights in always saying the wrong thing at the right time in contempt of every expectation that the naked truth is at all obscene? This is a collection of cartoons, illustrations, personal essays, culture-war correspondence and interviews with famous intellectual and artistic outlaws, who, like the author, are just trying to defuse the apocalyptic bomb that is the miracle of our Creation. Drawn, painted, and collaged in Mr. Fish's many virtuosic styles, this is an eloquent take-no-prisoners response to American political life.

Sharks and People May 11 2021 At once feared and revered, sharks have captivated people since our earliest human encounters. Children and adults alike stand awed before aquarium shark tanks, fascinated by the giant teeth and unnerving eyes. And no swim in the ocean is undertaken without a slight shiver of anxiety about the very real—and very cinematic—dangers of shark bites. But our interactions with sharks are not entirely one-sided: the threats we pose to sharks through fisheries, organized hunts, and gill nets on coastlines are more deadly and far-reaching than any bite. In *Sharks and People* acclaimed wildlife photographer Thomas Peschak presents stunning photographs that capture the relationship between people and sharks around the globe. A contributing photographer to *National Geographic*, Peschak is best known for his unusual photographs of sharks—his iconic image of a great white shark following a researcher in a small yellow kayak is one of the most recognizable shark photographs in the world. The other images gathered here are no less riveting, bringing us as close as possible to sharks in the wild. Alongside the photographs, *Sharks and People* tells the compelling story of the natural history of sharks. Sharks have roamed the oceans for more than four hundred million years, and in this time they have never stopped adapting to the ever-changing world—their unique cartilage skeletons and array of super-senses mark them as one of the most evolved groups of animals. Scientists have recently discovered that sharks play an important role in balancing the ocean, including maintaining the health of coral reefs. Yet, tens of millions of sharks are killed every year just to fill the demand for shark fin soup alone. Today more than sixty species of sharks, including hammerhead, mako, and oceanic white-tip sharks, are listed as vulnerable or in danger of extinction. The need to understand the significant part sharks play in the oceanic ecosystem has never been so urgent, and Peschak's photographs bear witness to the thrilling strength and unique attraction of sharks. They are certain to enthrall and inspire.

World Without Fish Jun 24 2022 Mark Kurlansky, beloved award-winning and bestselling author, offers a riveting, uniquely illustrated, narrative nonfiction account for kids about what's happening to fish, the oceans, and our environment, and what kids can do about it. World Without Fish has been praised as "urgent" (Publishers Weekly) and "a wonderfully fast-paced and engaging primer on the key questions surrounding fish and the sea" (Paul Greenberg, author of *Four Fish*). It has also been included in the New York State Expeditionary Learning English Language Arts Curriculum. Written by a master storyteller, World Without Fish connects all the dots—biology, economics, evolution, politics, climate, history, culture, food, and nutrition—in a way that kids can really understand. It describes how the fish we most commonly eat, including tuna, salmon, cod, and swordfish, could disappear within 50 years, and the domino effect it would have—oceans teeming with jellyfish and turning pinkish orange from algal blooms; seabirds disappearing, then reptiles, then mammals. It describes the back-and-forth dynamic of fishermen and scientists. It covers the effects of industrialized fishing, and how bottom-dragging nets are turning the ocean floor into a desert. The answer? Support sustainable fishing. World Without Fish tells kids exactly what they can do: Find out where those fish sticks come from. Tell your parents what's good to buy, and what's not. Ask the waiter if the fish on the menu is line-caught And follow simple rules: Use less plastic, and never eat endangered fish like bluefin tuna. Interwoven with the book is a graphic novel. Each beautifully illustrated chapter opener links to form a larger fictional story that complements the text. Hand in hand, they create a Silent Spring for a new generation.

Bullshit Jobs Aug 02 2020 From bestselling writer David Graeber—"a master of opening up thought and stimulating debate" (Slate)—a powerful argument against the rise of meaningless, unfulfilling jobs...and their consequences. Does your job make a meaningful contribution to the world? In the spring of 2013, David Graeber asked this question in a playful, provocative essay titled "On the Phenomenon of Bullshit Jobs." It went viral. After one million online views in seventeen different languages, people all over the world are still debating the answer. There are hordes of people—HR consultants, communication coordinators, telemarketing researchers, corporate lawyers—whose jobs are useless, and, tragically, they know it. These people are caught in bullshit jobs. Graeber explores one of society's most vexing and deeply felt concerns, indicting among other villains a particular strain of finance capitalism that betrays ideals shared by thinkers ranging from Keynes to Lincoln. "Clever and charismatic" (The New Yorker), Bullshit Jobs gives individuals, corporations, and societies permission to undergo a shift in values, placing creative and caring work at the center of our culture. This book is for everyone who wants to turn their vocation back into an avocation and "a thought-provoking examination of our working lives" (Financial Times).

The Fourth Industrial Revolution Jul 01 2020 The founder and executive chairman of the World Economic Forum on how the impending technological revolution will change our lives We are on the brink of the Fourth Industrial Revolution. And this one will be unlike any other in human history. Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In *The Fourth Industrial Revolution*, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas for what can be done to shape a better future for all.

Mei Mei--a Beautiful Fish Nov 24 2019

World Without Fish Sep 27 2022 A KID'S GUIDE TO THE OCEAN "Can you imagine a world without fish? It's not as crazy as it sounds. But if we keep doing things the way we've been doing things, fish could become extinct within fifty years. So let's change the way we do things!" World Without Fish

is the uniquely illustrated narrative nonfiction account—for kids—of what is happening to the world’s oceans and what they can do about it. Written by Mark Kurlansky, author of *Cod*, *Salt*, *The Big Oyster*, and many other books, *World Without Fish* has been praised as “urgent” (Publishers Weekly) and “a wonderfully fast-paced and engaging primer on the key questions surrounding fish and the sea” (Paul Greenberg, author of *Four Fish*). It has also been included in the New York State Expeditionary Learning English Language Arts Curriculum. Written by a master storyteller, *World Without Fish* connects all the dots—biology, economics, evolution, politics, climate, history, culture, food, and nutrition—in a way that kids can really understand. It describes how the fish we most commonly eat, including tuna, salmon, cod, swordfish—even anchovies— could disappear within fifty years, and the domino effect it would have: the oceans teeming with jellyfish and turning pinkish orange from algal blooms, the seabirds disappearing, then reptiles, then mammals. It describes the back-and-forth dynamic of fishermen, who are the original environmentalists, and scientists, who not that long ago considered fish an endless resource. It explains why fish farming is not the answer—and why sustainable fishing is, and how to help return the oceans to their natural ecological balance. Interwoven with the book is a twelve-page graphic novel. Each beautifully illustrated chapter opener links to the next to form a larger fictional story that perfectly complements the text.

[The World's Biggest Fish](#) Jan 27 2020 In *The World's Biggest Fish*, early fluent readers learn about fish as they explore the lives of two of its largest members, the ocean sunfish and the whale shark. Vibrant, full-color photos and carefully leveled text will engage early readers as they learn

Demon Fish Sep 15 2021 A group of traders huddles around a pile of dried shark fins on a gleaming white floor in Hong Kong. A Papua New Guinean elder shoves off in his hand-carved canoe, ready to summon a shark with ancient magic. A scientist finds a rare shark in Indonesia and forges a deal with villagers so it and other species can survive. In this eye-opening adventure that spans the globe, Juliet Eilperin investigates the fascinating ways different individuals and cultures relate to the ocean’s top predator. Along the way, she reminds us why, after millions of years, sharks remain among nature’s most awe-inspiring creatures. From Belize to South Africa, from Shanghai to Bimini, we see that sharks are still the object of an obsession that may eventually lead to their extinction. This is why movie stars and professional athletes go shark hunting in Miami and why shark’s fin soup remains a coveted status symbol in China. Yet we also see glimpses of how people and sharks can exist alongside one another: surfers tolerating their presence off Cape Town and ecotourists swimming with sharks that locals in the Yucatán no longer have to hunt. With a reporter’s instinct for a good story and a scientist’s curiosity, Eilperin offers us an up-close understanding of these extraordinary, mysterious creatures in the most entertaining and illuminating shark encounter you’re likely to find outside a steel cage.

[Cod](#) Jul 25 2022 'Who would ever think that a book on cod would make a compulsive read? And yet this is precisely what Kurlansky has done' Express on Sunday *The Cod*. Wars have been fought over it, revolutions have been triggered by it, national diets have been based on it, economies and livelihoods have depended on it. To the millions it has sustained, it has been a treasure more precious than gold. This book spans 1,000 years and four continents. From the Vikings to Clarence Birdseye, Mark Kurlansky introduces the explorers, merchants, writers, chefs and fisherman, whose lives have been interwoven with this prolific fish. He chronicles the cod wars of the 16th and 20th centuries. He blends in recipes and lore from the Middle Ages to the present. In a story that brings world history and human passions into captivating focus, he shows how the most profitable fish in history is today faced with extinction.

[The Perfect Protein](#) Oct 24 2019 The planet will be home to more than 9 billion people by 2050, and we're already seeing critical levels of famine around the world mirrored by growing obesity in developed nations. In *The Perfect Protein*, Andy Sharpless maintains that protecting wild seafood can help combat both issues, because seafood is the healthiest, cheapest, most environmentally friendly source of protein on earth. While the conservation community has taken a simplistic, save-the-whales approach when it comes to oceans, Sharpless contends that we must save the world's

seafood not just to protect marine life and biodiversity but to stave off the coming humanitarian crisis. With high demand for predator species like tuna and salmon, wealthy nations like the U.S. convert "reduction" species such as anchovies, mackerel, and sardines into feed for salmon and other farmed animals—even though these overlooked fish are packed with health-boosting Omega-3 fatty acids and could feed millions. By establishing science-based quotas, protecting wild habitats, and reducing bycatch (and treating anchovies and their like as food, not feed), Sharpless believes that effective ocean stewardship can put healthy, sustainable seafood on the table forever. To that end, Oceana has tapped 20-plus chefs, including Mario Batali, Eric Ripert, and Jose Andres for recipes that give us all a role to play in this revolutionary mission: to save the fish so that we can eat more fish.

Buried Sunlight: How Fossil Fuels Have Changed the Earth Dec 26 2019 Acclaimed Caldecott Artist Molly Bang teams up with award-winning M.I.T. professor Penny Chisholm to present the fascinating, timely story of fossil fuels. What are fossil fuels, and how did they come to exist? This engaging, stunning book explains how coal, oil, and gas are really "buried sunlight," trapped beneath the surface of our planet for millions and millions of years. Now, in a very short time, we are digging them up and burning them, changing the carbon balance of our planet's air and water. What does this mean, and what should we do about it?

Fish Have No Feet Jul 21 2019 Longlisted for the Man Booker International Prize 2017 Keflavik: a town that may be the darkest place in Iceland, surrounded by black lava fields, hemmed in by a sea that may not be fished, and site of the U.S. military base, whose influences shaped Icelandic culture from the '50s to the dawning of the new millennium. Ari - a writer and publisher - lands back in Keflavik from Copenhagen. His father is dying, and he is flooded by memories of his youth in the '70s and '80s, listening to Pink Floyd and the Beatles, raiding American supply lorries and discovering girls. And one girl he could never forget. Layered through Ari's story is that of his grandparents in a village on the eastern coast, a world away from modern Keflavik. For his grandfather Oddur, life at sea was a destiny; for Margrét its elemental power brings only loneliness and fear. Both the story of a singular family and an epic that sparkles with love, pain and lifelong desire - with all of human life - *Fish have no Feet* is a novel of profound beauty and wisdom by a major international writer. By the author of the acclaimed trilogy, *Heaven and Hell*, *The Sorrow of Angels* and *The Heart of Man*.

Why Fish Don't Exist Apr 22 2022 A Best Book of 2020: The Washington Post * NPR * Chicago Tribune * Smithsonian A "remarkable" (Los Angeles Times), "seductive" (The Wall Street Journal) debut from the new cohort of Radiolab, *Why Fish Don't Exist* is a dark and astonishing tale of love, chaos, scientific obsession, and—possibly—even murder. "At one point, Miller dives into the ocean into a school of fish...comes up for air, and realizes she's in love. That's how I felt: Her book took me to strange depths I never imagined, and I was smitten." —The New York Times Book Review David Starr Jordan was a taxonomist, a man possessed with bringing order to the natural world. In time, he would be credited with discovering nearly a fifth of the fish known to humans in his day. But the more of the hidden blueprint of life he uncovered, the harder the universe seemed to try to thwart him. His specimen collections were demolished by lightning, by fire, and eventually by the 1906 San Francisco earthquake—which sent more than a thousand discoveries, housed in fragile glass jars, plummeting to the floor. In an instant, his life's work was shattered. Many might have given up, given in to despair. But Jordan? He surveyed the wreckage at his feet, found the first fish that he recognized, and confidently began to rebuild his collection. And this time, he introduced one clever innovation that he believed would at last protect his work against the chaos of the world. When NPR reporter Lulu Miller first heard this anecdote in passing, she took Jordan for a fool—a cautionary tale in hubris, or denial. But as her own life slowly unraveled, she began to wonder about him. Perhaps instead he was a model for how to go on when all seemed lost. What she would unearth about his life would transform her understanding of history, morality, and the world beneath her feet. Part biography, part memoir, part scientific

adventure, *Why Fish Don't Exist* is a wondrous fable about how to persevere in a world where chaos will always prevail.

A Sea without Fish Aug 26 2022 A “superbly written, richly illustrated” guide to the animals who lived 450 million years ago—in the fossil-rich area where Cincinnati, Ohio now stands (Rocks & Minerals). The region around Cincinnati, Ohio, is known throughout the world for the abundant and beautiful fossils found in limestones and shales that were deposited as sediments on the sea floor during the Ordovician Period, about 450 million years ago—some 250 million years before the dinosaurs lived. In Ordovician time, the shallow sea that covered much of what is now the North American continent teemed with marine life. The Cincinnati area has yielded some of the world’s most abundant and best-preserved fossils of invertebrate animals such as trilobites, bryozoans, brachiopods, molluscs, echinoderms, and graptolites. So famous are the Ordovician fossils and rocks of the Cincinnati region that geologists use the term “Cincinnatian” for strata of the same age all over North America. This book synthesizes more than 150 years of research on this fossil treasure-trove, describing and illustrating the fossils, the life habits of the animals represented, their communities, and living relatives, as well as the nature of the rock strata in which they are found and the environmental conditions of the ancient sea. “A fascinating glimpse of a long-extinct ecosystem.” —Choice

Gould's Book of Fish Nov 17 2021 FROM THE WINNER OF THE MAN BOOKER PRIZE 2014 Once upon a time that was called 1828, before all fishes in the sea and all living things on the land were destroyed, there was a man named William Buelow Gould, a white convict who fell in love with a black woman and discovered too late that to love is not safe. Silly Billy Gould, invader of Australia, liar, murderer and forger, condemned to the most feared penal colony in the British Empire and there ordered to paint a book of fish.

The Blue Revolution May 31 2020 Overfishing. For the world’s oceans, it’s long been a worrisome problem with few answers. Many of the global fish stocks are at a dangerous tipping point, some spiraling toward extinction. But as older fishing fleets retire and new technologies develop, a better, more sustainable way to farm this popular protein has emerged to profoundly shift the balance. *The Blue Revolution* tells the story of the recent transformation of commercial fishing: an encouraging change from maximizing volume through unrestrained wild hunting to maximizing value through controlled harvesting and farming. Entrepreneurs applying newer, smarter technologies are modernizing fisheries in unprecedented ways. In many parts of the world, the seafood on our plates is increasingly the product of smart decisions about ecosystems, waste, efficiency, transparency, and quality. Nicholas P. Sullivan presents this new way of thinking about fish, food, and oceans by profiling the people and policies transforming an aging industry into one that is “post-industrial”—fueled by “sea-foodies” and locavores interested in sustainable, traceable, quality seafood. Catch quotas can work when local fishers feel they have a stake in the outcome; shellfish farming requires zero inputs and restores nearshore ecosystems; new markets are developing for kelp products, as well as unloved and “underutilized” fish species. Sullivan shows how the practices of thirty years ago that perpetuated an overfishing crisis are rapidly changing. In the book’s final chapters, Sullivan discusses the global challenges to preserving healthy oceans, including conservation mechanisms, the impact of climate change, and unregulated and criminal fishing in international waters. In a fast-growing world where more people are eating more fish than ever before, *The Blue Revolution* brings encouraging news for conservationists and seafood lovers about the transformation of an industry historically averse to change, and it presents fresh inspiration for entrepreneurs and investors eager for new opportunities in a blue-green economy.

Vanishing Fish Aug 14 2021 "Daniel Pauly is a friend whose work has inspired me for years." —Ted Danson, actor, ocean activist, and co-author of *Oceana* "This wonderfully personal and accessible book by the world’s greatest living fisheries biologist summarizes and expands on the causes of collapse and the essential actions that will be required to rebuild fish stocks for future generations." —Dr. Jeremy Jackson, ocean scientist and author of *Breakpoint* The world’s fisheries are in crisis. Their catches are declining, and the stocks of key species, such as cod and bluefin tuna, are but a

small fraction of their previous abundance, while others have been overfished almost to extinction. The oceans are depleted and the commercial fishing industry increasingly depends on subsidies to remain afloat. In these essays, award-winning biologist Dr. Daniel Pauly offers a thought-provoking look at the state of today's global fisheries—and a radical way to turn it around. Starting with the rapid expansion that followed World War II, he traces the arc of the fishing industry's ensuing demise, offering insights into how and why it has failed. With clear, convincing prose, Dr. Pauly draws on decades of research to provide an up-to-date assessment of ocean health and an analysis of the issues that have contributed to the current crisis, including globalization, massive underreporting of catch, and the phenomenon of "shifting baselines," in which, over time, important knowledge is lost about the state of the natural world. Finally, *Vanishing Fish* provides practical recommendations for a way forward—a vision of a vibrant future where small-scale fisheries can supply the majority of the world's fish. Published in Partnership with the David Suzuki Institute
Flushed Mar 09 2021 An anecdotal history of plumbing from the Harappan of 3000 B.C. to the modern world is a tribute to such engineering achievements as the lead pipes of the Roman empire, the sewers of London, and Japanese toilets. By the author of *Stolen Water*. Reprint. 20,000 first printing.

Salmon May 23 2022 WINNER OF THE JOHN AVERY AWARD AT THE ANDRÉ SIMON AWARDS If we can save the salmon, we can save the world Over the centuries, salmon have been a vital resource, a dietary staple and an irresistible catch. But there is so much more to this extraordinary fish. As international bestseller Mark Kurlansky reveals, salmon persist as a barometer for the health of our planet. Centuries of our greatest assaults on nature can be seen in their harrowing yet awe-inspiring life cycle. Full of all Kurlansky's characteristic curiosity and insight, *Salmon* is a magisterial history of a wondrous creature. 'An epic, environmental tragedy' *Spectator* 'These creatures have nurtured our imagination as surely as our bodies. This book does them justice!' Bill McKibben

King of Fish Aug 22 2019 The salmon that symbolize the Pacific Northwest's natural splendor are now threatened with extinction across much of their ancestral range. In studying the natural and human forces that shape the rivers and mountains of that region, geologist David Montgomery has learned to see the evolution and near-extinction of the salmon as a story of changing landscapes. Montgomery shows how a succession of historical experiences -first in the United Kingdom, then in New England, and now in the Pacific Northwest -repeat a disheartening story in which overfishing and sweeping changes to rivers and seas render the world inhospitable to salmon. In *King of Fish*, Montgomery traces the human impacts on salmon over the last thousand years and examines the implications both for salmon recovery efforts and for the more general problem of human impacts on the natural world. What does it say for the long-term prospects of the world's many endangered species if one of the most prosperous regions of the richest country on earth cannot accommodate its icon species? All too aware of the possible bleak outcome for the salmon, *King of Fish* concludes with provocative recommendations for reinventing the ways in which we make environmental decisions about land, water, and fish.

Swim, Little Fish Apr 10 2021 A little fish has a big day In this sweet and simple story, a little fish rises from the sea to see the sun. After a long day of play, the little fish is ready for bed. This book is part of the Kika's First Books series, created by Altan for his young child. Kika's First Books are celebrating their 40th anniversary with new publications in English after being loved in Italy for generations. These sweet little books make excellent read alouds for the youngest listeners. Kika's First Books explore common childhood themes and experiences and are lots of fun for little ones. Xist Publishing is proud to present the Kika's First Books to a new generation of children. By bringing beloved stories from diverse cultures to new audiences, Xist Publishing celebrates childhood in all its beautiful forms. We hope your children will enjoy these stories and discover a lifetime love of reading and love for all the people and creatures of the world.

Do Fish Know They're Wet? Feb 20 2022 Just as fish in the ocean don't know they're wet, Christians usually don't realize they're being influenced

by the postmodern worldview that dominates today's culture. Tom Neven, a journalist and book editor for Focus on the Family, helps students and young adults realize that everyone has a worldview and shows them how to compare the Christian worldview to prevalent modern and postmodern philosophies and arguments. He then applies the Christian worldview to crucial life issues such as politics, sexuality, art, music, and science, encouraging readers to apply the truth to all of life. Neven challenges readers with his logical and practical approach while appealing to them with his conversational, no-nonsense style. An important book to help students and young adults live as more effective witnesses in a postmodern culture.

Flush Jun 12 2021 A hilarious, high-stakes adventure involving crooked casino boats, floating fish, toxic beaches, and one kid determined to get justice. This is Carl Hiaasen's Florida—where the creatures are wild and the people are wilder! You know it's going to be a rough summer when you spend Father's Day visiting your dad in the local lockup. Noah's dad is sure that the owner of the Coral Queen casino boat is flushing raw sewage into the harbor—which has made taking a dip at the local beach like swimming in a toilet. He can't prove it though, and so he decides that sinking the boat will make an effective statement. Right. The boat is pumped out and back in business within days and Noah's dad is stuck in the clink. Now Noah is determined to succeed where his dad failed. He will prove that the Coral Queen is dumping illegally . . . somehow. His allies may not add up to much—his sister Abbey, an unreformed childhood biter; Lice Peeking, a greedy sot with poor hygiene; Shelly, a bartender and a woman scorned; and a mysterious pirate—but Noah's got a plan to flush this crook out into the open. A plan that should sink the crooked little casino, once and for all.

The Rainbow Fish Jan 19 2022 The most beautiful fish in the entire ocean discovers the real value of personal beauty and friendship.

So Long, and Thanks for All the Fish Mar 29 2020 So Long, and Thanks for All the Fish is the fourth installment in Douglas Adams' bestselling cult classic, the Hitchhiker's Guide to the Galaxy 'trilogy'. This edition includes exclusive bonus material from the Douglas Adams archives, and an introduction by Neil Gaiman. There is a knack to flying. The knack lies in learning how to throw yourself at the ground and miss. It's not an easy thing to do, and Arthur Dent thinks he's the only human who's been able to master this nifty little trick – until he meets Fenchurch, the woman of his dreams. Fenchurch once realized how the world could be made a good and happy place. Unfortunately, she's forgotten. Convinced that the secret lies within God's Final Message to His Creation, they go in search of it. And, in a dramatic break with tradition, actually find it . . . Follow Arthur Dent's galactic (mis)adventures in the last of the 'trilogy of five', Mostly Harmless.

The Last Fish Tale Mar 21 2022 The bestselling author of Cod, Salt, and The Big Oyster has enthralled readers with his incisive blend of culinary, cultural, and social history. Now, in his most colorful, personal, and important book to date, Mark Kurlansky turns his attention to a disappearing way of life: fishing—how it has thrived in and defined one particular town for centuries, and what its imperiled future means for the rest of the world. The culture of fishing is vanishing, and consequently, coastal societies are changing in unprecedented ways. The once thriving fishing communities of Rockport, Nantucket, Newport, Mystic, and many other coastal towns from Newfoundland to Florida and along the West Coast have been forced to abandon their roots and become tourist destinations instead. Gloucester, Massachusetts, however, is a rare survivor. The livelihood of America's oldest fishing port has always been rooted in the life and culture of commercial fishing. The Gloucester story began in 1004 with the arrival of the Vikings. Six hundred years later, Captain John Smith championed the bountiful waters off the coast of Gloucester, convincing new settlers to come to the area and start a new way of life. Gloucester became the most productive fishery in New England, its people prospering from the seemingly endless supply of cod and halibut. With the introduction of a faster fishing boat—the schooner—the industry flourished. In the twentieth century, the arrival of Portuguese, Jews, and Sicilians turned the bustling center into a melting pot. Artists and writers such as Edward Hopper, Winslow Homer, and T. S. Eliot came to the fishing town and found inspiration. But the vital life of Gloucester was being threatened. Ominous signs were seen with the development of engine-powered net-dragging vessels in the first decade of the twentieth century. As early as 1911, Gloucester fishermen warned

of the dire consequences of this new technology. Since then, these vessels have become even larger and more efficient, and today the resulting overfishing, along with climate change and pollution, portends the extinction of the very species that fishermen depend on to survive, and of a way of life special not only to Gloucester but to coastal cities all over the world. And yet, according to Kurlansky, it doesn't have to be this way. Scientists, government regulators, and fishermen are trying to work out complex formulas to keep fishing alive. Engagingly written and filled with rich history, delicious anecdotes, colorful characters, and local recipes, *The Last Fish Tale* is Kurlansky's most urgent story, a heartfelt tribute to what he calls "socio-diversity" and a lament that "each culture, each way of life that vanishes, diminishes the richness of civilization."

The Basque History Of The World Nov 05 2020 The Basques are Europe's oldest people, their origins a mystery, their language related to no other on Earth, and even though few in population and from a remote and rugged corner of Spain and France, they have had a profound impact on the world. Whilst inward-looking, preserving their ancient language and customs, the Basques also struck out for new horizons, pioneers of whaling and cod fishing, leading the way in exploration of the Americas and Asia, were among the first capitalists and later led Southern Europe's industrial revolution. Mark Kurlansky, the author of the acclaimed *Cod*, blends human stories with economic, political, literary and culinary history to paint a fascinating picture of an intriguing people.

Four Fish Jul 13 2021 "A necessary book for anyone truly interested in what we take from the sea to eat, and how, and why." —Sam Sifton, *The New York Times Book Review* Acclaimed author of *American Catch* and *The Omega Principle* and life-long fisherman, Paul Greenberg takes us on a journey, examining the four fish that dominate our menus: salmon, sea bass, cod, and tuna. Investigating the forces that get fish to our dinner tables, Greenberg reveals our damaged relationship with the ocean and its inhabitants. Just three decades ago, nearly everything we ate from the sea was wild. Today, rampant overfishing and an unprecedented biotech revolution have brought us to a point where wild and farmed fish occupy equal parts of a complex marketplace. *Four Fish* offers a way for us to move toward a future in which healthy and sustainable seafood is the rule rather than the exception.

[Hooray for Fish!](#) Feb 26 2020 Lucy Cousins makes a big splash in this colorful read-aloud! Features an audio read-along! Paddle along with Little Fish on a mesmerizing underwater tour of friends spotty and stripy, happy and gripy, hairy and scary, even curly whirly and twisty twirly. From the creator of *Maisy* comes an eye-popping picture book that is sure to have little ones joining the chorus: Hooray for fish!

Save the World on Your Own Time Oct 04 2020 "Save the World on Your Own Time is invariably smart, stimulating, and provocative. It is filled with insights and crackles with verve. It is a joy to take in." - *Texas Law Review*

Swimmy (Oversized Board Book) Jun 19 2019 The gorgeous, Caldecott Honor-winning tale of a very clever fish by beloved picture book creator Leo Lionni. Deep in the sea lives a happy school of fish. Their watery world is full of wonders, but there is also danger, and the little fish are afraid to come out of hiding . . . until *Swimmy* comes along. *Swimmy* shows his friends how—with ingenuity and team work—they can overcome any danger. Winner of the 1964 Caldecott Honor, this beloved tale of a brave little fish has been a favorite to generations of readers. To celebrate *Swimmy*'s fiftieth anniversary, we are issuing a handsome special edition hardcover that includes a bonus poster.

A World Without You Jan 07 2021 What would you do to bring back someone you love? After the unexpected loss of his girlfriend, a boy suffering from delusions believes he can travel through time to save her in this gripping new novel from New York Times bestselling author Beth Revis. "A story that's both heartbreaking and hopeful." —Publishers Weekly, starred review "Revis's account of grief, loss, first love, and anguish, presented through a lens of mental illness, is a must-read." —VOYA, starred review "A heartrending, beautifully complex look at mental illness, life, and loss. I tore through the pages, and, days later, this story still has a hold on me." —Alexandra Bracken, #1 New York Times bestselling author of *The Darkest*

Minds series and Passenger Seventeen-year-old Bo has always had delusions that he can travel through time. When he was ten, Bo claimed to have witnessed the Titanic hit an iceberg, and at fifteen, he found himself on a Civil War battlefield, horrified by the bodies surrounding him. So when his concerned parents send him to a school for troubled youth, Bo assumes he knows the truth: that he's actually attending Berkshire Academy, a school for kids who, like Bo, have "superpowers." At Berkshire, Bo falls in love with Sofia, a quiet girl with a tragic past and the superpower of invisibility. Sofia helps Bo open up in a way he never has before. In turn, Bo provides comfort to Sofia, who lost her mother and two sisters at a very young age. But even the strength of their love isn't enough to help Sofia escape her deep depression. After she commits suicide, Bo is convinced that she's not actually dead. He believes that she's stuck somewhere in time — that he somehow left her in the past, and now it's his job to save her. Not since Ned Vizzini's *It's Kind of a Funny Story* has there been such a heartrending depiction of mental illness. In her first contemporary novel, Beth Revis guides readers through the mind of a young man struggling to process his grief as he fights his way through his delusions. As Bo becomes more and more determined to save Sofia, he has to decide whether to face his demons head-on, or succumb to a psychosis that will let him be with the girl he loves. [Salt](#) Dec 18 2021 Homer called it a divine substance. Plato described it as especially dear to the gods. As Mark Kurlansky so brilliantly relates here, salt has shaped civilisation from the beginning, and its story is a glittering, often surprising part of the history of mankind. Wars have been fought over salt and, while salt taxes secured empires across Europe and Asia, they have also inspired revolution - Gandhi's salt march in 1930 began the overthrow of British rule in India. From the rural Sichuan province where the last home-made soya sauce is produced to the Cheshire brine springs that supplied salt around the globe, Mark Kurlansky has produced a kaleidoscope of world history, a multi-layered masterpiece that blends political, commercial, scientific, religious and culinary records into a rich and memorable tale.

The Magic Fish Oct 16 2021 Tiến loves his family and his friends...but Tiến has a secret he's been keeping from them, and it might change everything. An amazing YA graphic novel that deals with the complexity of family and how stories can bring us together. Real life isn't a fairytale. But Tiến still enjoys reading his favorite stories with his parents from the books he borrows from the local library. It's hard enough trying to communicate with your parents as a kid, but for Tiến, he doesn't even have the right words because his parents are struggling with their English. Is there a Vietnamese word for what he's going through? Is there a way to tell them he's gay? A beautifully illustrated story by Trung Le Nguyen that follows a young boy as he tries to navigate life through fairytales, an instant classic that shows us how we are all connected. The Magic Fish tackles tough subjects in a way that accessible with readers of all ages, and teaches us that no matter what—we can all have our own happy endings.

Fish in a Tree Feb 08 2021 A New York Times Bestseller! The author of the beloved *One for the Murphys* gives readers an emotionally-charged, uplifting novel that will speak to anyone who's ever thought there was something wrong with them because they didn't fit in. "Everybody is smart in different ways. But if you judge a fish by its ability to climb a tree, it will live its life believing it is stupid." Ally has been smart enough to fool a lot of smart people. Every time she lands in a new school, she is able to hide her inability to read by creating clever yet disruptive distractions. She is afraid to ask for help; after all, how can you cure dumb? However, her newest teacher Mr. Daniels sees the bright, creative kid underneath the trouble maker. With his help, Ally learns not to be so hard on herself and that dyslexia is nothing to be ashamed of. As her confidence grows, Ally feels free to be herself and the world starts opening up with possibilities. She discovers that there's a lot more to her—and to everyone—than a label, and that great minds don't always think alike.
